

Contents

1 Interactions Between Science, Technology and Society:	
An Introduction	1
1.1 Mapping the New Terrain.....	1
1.2 Issues and Rights in Scientific and Technological Innovations	4
1.3 Governing Science and Technology.....	6
1.4 Private Ownership of Information: Risks and Vulnerabilities.....	9
1.5 Boundary Problems in Science and Technology.....	11
1.6 Science and Technology Advances, Individual Rights, and Areas of Conflict.....	14
1.7 Theory, Methods and Analysis Approaches	21
1.8 Organization of the Book.....	23
References.....	24
2 Rights Claims in Digital Media	31
2.1 Communication Technologies, Social Changes and Individual Rights	31
2.1.1 Communication Technologies and Regulatory Dilemmas.....	33
2.1.2 Digital Communication Technologies, Protest Movements and Democracy	36
2.1.3 Reshaping the Boundary of Freedom of Expression in the Digital Age.....	41
2.2 A Legal Framework for the Internet.....	44
2.3 Controversial Internet Control Rules	45
2.4 Digital Content Reforms Recently Introduced or Discussed in Europe and in the U.S.....	47
References.....	50

3	Legal Controversies in Digital Media	57
3.1	Copyright Protection and the Access to Network Conundrum: The Case of the French Hadopi Anti-piracy Legislation	57
3.1.1	Ramifications of the Decision of the Conseil Constitutionnel	59
3.1.2	Fair Trial, Administrative Sanctions and Freedom of Communication	60
3.2	Defining the Balance Between Freedom of Expression and Property Rights.....	68
3.3	The UK Digital Economy Act.....	70
3.3.1	Terms and Effect of the British Reform	71
3.3.2	Judicial Review and Criticism	73
3.4	Freedom of Expression and Freedom of Connection.....	76
3.4.1	Bordering Communication Rights.....	78
3.5	Digital Media Pluralism and the Question of Internet Regulation	83
3.6	Digital Media Regulations at the Bar	88
	References.....	91
4	Rights Claims in the Biosciences	97
4.1	Introduction	99
4.2	Biosciences and the New Frontiers of Rights	100
4.2.1	Access to Scientific Knowledge and DNA-Based Inventions	101
4.3	Nucleic Acids, Genetic Codes and Stem Cells: Uses and Potential Market Value.....	104
4.4	Challenges and Opportunities in the Biosciences	111
4.5	Property Rights and the Commodification of Knowledge	114
4.6	Biotech Innovations and Fundamental Rights	115
4.6.1	The Protection of Genetic-Based Inventions	118
4.7	Genetic Information and Knowledge Commons.....	123
4.7.1	The Structure of Ownership in the Life Sciences.....	124
4.7.2	The Patentability of Expressed Sequence Tags	127
4.7.3	Property Rights and Human Genes	131
	References.....	134
5	Legal Controversies in the Biosciences	141
5.1	Legal Controversies in Genetics and Genomics.....	141
5.2	Patent Litigation in the Biosciences: From Brüstle to Myriad.....	143
5.3	Biosciences and Patentable Subject Matter.....	147
5.4	The Myriad Genetics Controversy and Its Ramifications	151
5.4.1	The District Court's Decision: "Myriad I"	154
5.4.2	The Federal Circuit's Decision: "Myriad II"	158
5.4.3	"Myriad III" and the Final Decision of the US. Supreme Court.....	160

5.5 Possible Alternatives to Private Ownership
of Genetic Resources..... 162

5.6 Changing the Landscape for Biotechnology 165

References..... 168

Final Remarks 177

References..... 183
