PART I INTRODUCTION

1	Introduction to health care evaluation	3
1.1	Introduction	3
1.2	Types of economic evaluation	6
1.3	CEA as CBA: using a threshold value for price	9
1.4	The basics of cost–benefit analysis	11
1.5	Applications	14
1.6	Final section	26

PART II CM AND CBA

2	Cost minimization and the definition of ‘cost’	31
2.1	Introduction	31
2.2	Cost minimization and economic theory	33
2.3	Cost–benefit analysis and cost minimization	39
2.4	Applications	44
2.5	Final section	56
3	Types of costs and their measurement	61
3.1	Introduction	61
3.2	Costs and markets	64
3.3	Costs versus charges	68
3.4	CM and cost standardization	70
3.5	Applications	73
3.6	Final section	83
4	External costs	88
4.1	Introduction	88
4.2	External costs and markets	91
4.3	External costs and interdependent markets: the role of complements and substitutes	95

4.4	External costs over time	98
4.5	Applications	101
4.6	Final section	111
5	Social cost of taxation	115
5.1	Introduction	115
5.2	Economic theory and the MCF	119
5.3	Estimates of the MCF	123
5.4	Economic evaluations without an MCF	130
5.5	Applications	132
5.6	Final section	143
PART III CEA AND CBA		
6	Fundamentals of cost-effectiveness analysis	149
6.1	Introduction	149
6.2	Basic principles of CEA	151
6.3	Estimating effects using randomized controlled trials	156
6.4	Methods for converting a CEA into a CBA	161
6.5	Applications	165
6.6	Final section	176
7	Further issues of cost-effectiveness analysis	180
7.1	Introduction	180
7.2	Discounting in CEA	181
7.3	Sampling error and uncertainty about estimates	188
7.4	Applications	199
7.5	Final section	210
PART IV CUA AND CBA		
8	Fundamentals of cost-utility analysis	217
8.1	Introduction	217
8.2	Basic principles of CUA	222
8.3	CUA versus CBA	227
8.4	Applications	229
8.5	Final section	243
9	Measuring utilities in cost-utility analysis	247
9.1	Introduction	247
9.2	Main measurement sources	252
9.3	Main measurement methods	255
9.4	The EUROQOL	258
9.5	Markov modelling	262
9.6	Applications	265
9.7	Final section	277

10	Cost–utility analysis and equity	281
10.1	Introduction	281
10.2	DALYs	283
10.3	QALYs and ageism	289
10.4	The person trade-off	291
10.5	The capability approach	294
10.6	Applications	300
10.7	Final section	307

PART V CBA

11	Cost–benefit analysis and the human capital approach	313
11.1	Introduction	313
11.2	Human capital approach	315
11.3	The relation between WTP and human capital	317
11.4	Using time as the numeraire	320
11.5	Putting a price on a QALY	321
11.6	Applications	326
11.7	Final section	336
12	Cost–benefit analysis and willingness to pay	340
12.1	Introduction	340
12.2	WTP and consumer sovereignty	345
12.3	WTP and willingness to accept compensation	348
12.4	WTP and rationing by time	352
12.5	Applications	358
12.6	Final section	370
13	Cost–benefit analysis and equity	374
13.1	Introduction	374
13.2	Distribution weights	380
13.3	Numbers effect	385
13.4	Applications	388
13.5	Final section	401

PART VI SUMMARY AND CONCLUSIONS

14	Methods for measuring the benefits of HIV/AIDS interventions	409
14.1	Introduction	409
14.2	Measuring the benefits of HIV/AIDS interventions	415
14.3	Final section	438
