PART 1: SPECIFICATION, QUALITATIVE ANALYSIS AND ECONOMETRIC ESTIMATION OF CONTINUOUS TIME DYNAMIC ECONOMIC MODELS	1
Chapter 1. Continuous and discrete models in economics	3
1.1. Introduction	3
1.2. A digression on distributed lags and partial adjustment equations	7
Chapter 2. Specification and qualitative analysis of the models	15
2.1. Specification	15
2.2. Qualitative analysis	22
2.2.1. Search for the steady state	23
2.2.2. Comparative dynamics	24
2.2.3. Stability	25
2.2.4. Sensitivity	29
2.2.4.1. General results	29
2.2.4.2. Proof of the basic formula for the sensitivity matrix	31
2.3. Some examples	37
2.3.1. Wymer (1976)	37
2.3.1.1. General treatment	37

2.3.1.2. A numerical example	44
2.3.2. Bergstrom (1967)	49
 Chapter 3. Econometric estimation	 65
3.1. Introduction	65
3.2. A digression on stochastic processes	69
3.3. Theoretical aspects of the estimation method	74
3.3.1. The exact discrete analogue	75
3.3.1.1. Evaluation of the integral ψ_r	77
3.3.1.2. Models containing flow variables	81
3.3.2. The approximate discrete analogue	85
3.3.3. A simple illustration	87
3.4. Analysis, forecasting and simulation	89
3.4.1. Forecasting and simulation by the discrete linearized model	90
3.4.2. Forecasting and simulation by the original non-linear continuous model	93
3.5. A note on computer programs	95
Appendix I. Some linearization formulae	97
I.1. Linearization about a point	98
I.2. Linearization about the sample means	99
Appendix II. Autocorrelation in the disturbances in models containing flow variables	100
II.1. Generating functions and moving average processes	101
II.1.1. General principles	101
II.1.2. Moving average processes	103
II.2. Derivation of the process in eq. (34)	108
Appendix III. Interpolation of observations of continuous variables	114
III.1. Quarterly interpolation from annual observations	115
III.2. Monthly interpolation from quarterly observations	118
III.3. Further considerations	119
 References to Part I	 121

PART II: A MACRODYNAMIC GENERAL DISEQUILIBRIUM MODEL FOR THE DETERMINATION OF THE EQUILIBRIUM EXCHANGE RATE	127
Chapter 4. The equilibrium exchange rate: A critical survey (by Giancarlo Martinengo)	129
4.1. Introduction	129
4.2. The theory of purchasing power parity (PPP)	130
4.3. The standard model	133
4.4. The monetary approach to the BP and the asset-market approach to the determination of the exchange-rate	135
4.4.1. Exchange-rate determinants: the role of money and of expectations	135
4.4.2. The role of relative prices in the determination of the equilibrium exchange-rate	142
4.4.3. The interactions between current and capital accounts of the BP	147
4.5. The eclectic approach to the equilibrium exchange-rate	156
4.6. Conclusions	163
References	166
Chapter 5. A minimal model: The theoretical framework	171
5.1. Introduction and overview	171
5.2. The model	173
5.3. Steady-state properties of the model	186
5.4. Comparative dynamics, stability and sensitivity	191
Appendix I. Derivation of the steady-state	193
I.1. Introduction	196
I.2. Solution for the steady-state growth rates	196
I.3. Solution for the steady-state initial levels	197
I.4. Comparative dynamics results	201
Appendix II. Linearization about the steady-state	203
References	206

Chapter 6. A minimal model: Empirical results (by Pietro Carlo Padoan)	209
6.1. Introduction	209
6.2. Estimation results	211
6.3. Stability and sensitivity analyses	223
6.4. The equilibrium exchange rate	227
6.5. Conclusion	229
Appendix I. Specification of the approximate discrete analogue	229
Appendix II. Data sources and definitions	236
References	239
