

Content

Abbreviations	II
List of Figures and Tables	III
1 Convergence and policy influences	1
2 State of the art	3
3 Modelling economic growth	7
3.1 Neoclassical growth model	7
3.2 Convergence in theory	8
3.3 Discussing the neoclassical growth model	11
3.4 Regional specification	13
4 Hypotheses	18
5 General econometric model	24
5.1 Data	24
5.2 Absolute convergence	25
5.3 Conditional convergence	28
5.3.1 East and West Germany, municipalities and convergence clubs	29
5.3.2 Control variables and policy impacts	35
5.3.3 Combinations	45
5.4 Results	50
6 Spatial considerations	52
6.1 Need for spatial econometrics	52
6.2 Neighborhoods in space	54
6.3 Moran's <i>I</i> – superseding OLS estimation	56
6.4 Choosing the Spatial Durbin Error Model	57
7 Brief econometric discussion	67
8 Regional policy implications of the GRW	70
9 Conclusion and outlook	74
References	76
Appendix	85
