

Contents

Foreword	xi
Preface	xiii
CHAPTER 1 Overview of Microgrid	1
1.1 History	1
1.2 Current Situation of Microgrid Outside China and Analysis	3
1.2.1 USA	3
1.2.2 Japan	4
1.2.3 European Union	5
1.3 Analysis of Current Status in China	6
1.4 Prospects	9
CHAPTER 2 Composition and Classification of the Microgrid	11
2.1 Composition	11
2.2 Structure	11
2.2.1 Distribution Network Dispatch Layer	13
2.2.2 Centralized Control Layer	13
2.2.3 Local Control Layer	14
2.3 Operation Modes	14
2.3.1 Grid-Connected Operation	15
2.3.2 Islanded Operation	15
2.4 Control Modes	16
2.4.1 Microgrid Control Modes	16
2.4.2 Inverter Control Modes	18
2.5 Integration Voltage Class	23
2.6 Classification	23
2.6.1 By Function Demand	23
2.6.2 By Capacity	25
2.6.3 By AC/DC Type	26
CHAPTER 3 Microgrid and Distributed Generation	29
3.1 Concepts and Characteristics	29
3.2 Photovoltaics	31
3.2.1 Independent PV Power System	31
3.2.2 Grid-Connected PV Power System	32
3.3 Wind Power	33
3.3.1 Independent Wind Power System	34
3.3.2 Grid-Connected Wind Power System	34

3.4	Microturbine.....	35
3.4.1	Components of Microturbine	37
3.4.2	High-Speed AC Generator.....	38
3.4.3	Regenerator.....	38
3.4.4	Converter System	38
3.4.5	Control System	38
3.5	Other Types of DGs.....	41
3.5.1	Geothermal Energy	41
3.5.2	Biomass Energy	41
3.5.3	Ocean Energy	42
3.6	Energy Storage.....	43
3.6.1	Pumped Storage.....	43
3.6.2	Compressed Air ES.....	44
3.6.3	Flywheel ES.....	44
3.6.4	Superconducting Magnetic ES	44
3.6.5	Supercapacitor	45
3.6.6	Battery	45
CHAPTER 4	Control and Operation of the Microgrid	47
4.1	Three-State Control of Independent Microgrid.....	47
4.1.1	Steady-State Constant-Frequency and Constant-Voltage Control	49
4.1.2	Dynamic Generator Tripping and Load Shedding Control.....	51
4.1.3	Transient Fault Protection.....	53
4.2	Inverter Control.....	54
4.2.1	Grid-Tie Inverter Control	54
4.2.2	Power Converter System Control.....	54
4.3	Grid Connection and Separation Control.....	55
4.3.1	Grid Connection Control	56
4.3.2	Grid Separation Control	59
4.4	Operation.....	64
4.4.1	Grid-Connected Operation	64
4.4.2	Islanded Operation.....	65
CHAPTER 5	Protection of the Microgrid	69
5.1	Special Fault Characteristics of DG.....	69
5.2	Effects of Microgrid on Relay Protection of the Distribution Network	71
5.2.1	Protection of a Traditional Distribution Network.....	71
5.2.2	Protection of a Traditional LV Distribution Network.....	72

5.2.3	Impacts of Microgrid on Relay Protection of Distribution Network	73
5.2.4	Impacts of a Microgrid on Protection of Traditional LV Distribution Lines	74
5.3	Microgrid Operation and Protection Strategies.....	78
5.4	Protection Scheme for Distribution Network Connected with a Microgrid.....	79
5.4.1	Requirements of Microgrid on Primary Equipment and Relay Protection of Distribution Network.....	79
5.4.2	Differential Relay Protection of the Distribution Network.....	80
5.4.3	Protection of LV Distribution Network Based on Directional Impedance Relay	84
5.4.4	Protection at the PCC	88
CHAPTER 6	Monitoring and Energy Management of the Microgrid	91
6.1	Monitoring.....	91
6.1.1	Structure of the Monitoring System	91
6.1.2	Composition of the Monitoring System	91
6.1.3	Design of the Monitoring System.....	98
6.2	Energy Management	101
6.2.1	Forecast of DG	101
6.2.2	Load Forecast	102
6.2.3	Frequency Response Characteristics of DG and Loads	103
6.2.4	Power Balance	105
6.3	Optimized Control.....	110
6.3.1	Optimized Control of PV Power	111
6.3.2	Optimized Control of Wind Power.....	112
6.3.3	Optimized Control of Various Types of ESs.....	112
6.3.4	Optimized Dispatch Strategies	113
CHAPTER 7	Communication of the Microgrid	115
7.1	Special Requirements on Communication.....	115
7.1.1	High Integration.....	115
7.1.2	High Reliability	116
7.1.3	Commonly Recognized Standards	116
7.1.4	Higher Cost-Effectiveness.....	116
7.2	Design Principles of the Communication System.....	116
7.2.1	Unified Planning and Design.....	116
7.2.2	Secure, Reliable, and Open	116
7.2.3	Scalability	117

7.3	Communication System of the Microgrid.....	117
7.3.1	Communication Technologies	117
7.3.2	Structure	119
7.3.3	Design.....	119
CHAPTER 8	Earthing of a Microgrid	125
8.1	Secure Earthing of Low-Voltage Distribution Network.....	125
8.1.1	TN Earthing System	126
8.1.2	TT Earthing System.....	129
8.1.3	IT Earthing System.....	130
8.2	System Earthing of a Microgrid.....	132
8.2.1	Requirements for Earthing of Microgrid.....	132
8.2.2	Earthing Mode of DG in a TN or TT Earthing System	132
8.2.3	Earthing Mode of DG in an IT Earthing System.....	136
CHAPTER 9	Harmonic Control of the Microgrid.....	137
9.1	Harmonic Control Technologies	137
9.1.1	Passive Filtering of Grid Tie Inverter.....	137
9.1.2	Active Filtering of Grid Tie Inverter	137
9.1.3	Separately Configured Filtering Technologies	138
9.2	Passive Filtering Technologies.....	138
9.2.1	Basic Principles of Passive Filter	138
9.2.2	Design of Passive Filter.....	141
9.3	Active Filtering Technologies	141
CHAPTER 10	Related Standards and Specifications	145
10.1	Related International Standards and Specifications.....	145
10.1.1	Related IEEE Standards	145
10.1.2	Related IEC Standards.....	147
10.1.3	Other Related Standards	148
10.2	Related Standards and Specifications in China.....	150
10.3	Development Trend of Microgrid Standards.....	151
10.4	Microgrid Standard System.....	152
CHAPTER 11	A Practical Case.....	155
11.1	Project Background.....	155
11.2	Project Description.....	155
11.3	System Design.....	157
11.3.1	Three-Layer Control System	157
11.3.2	System Design	158
11.3.3	Energy Management System	160
11.3.4	Dispatch of Distribution Network	162

11.4	Operation of Microgrid	162
11.4.1	Operation of the Integrated Monitoring System.....	162
11.4.2	Operation of the PV System	162
11.4.3	Monitoring of ES	166
11.5	Tests.....	167
11.5.1	Test on Transfer from Grid-Connected Mode to Islanded Mode	167
11.5.2	Islanded Operation Test	169
11.5.3	Test on Transfer from Islanded Mode to Grid-Connected Mode	169
11.5.4	Grid-Connection Recovery Test	172
11.5.5	ES Charge and Discharge Control	172
11.5.6	Power Exchange Control.....	172
Appendix: List of Abbreviations.....		173
References		175
Index.....		177
