|------------------|---|------------|
| Foreword | | vii |
| by Jim Gray | | |
| Preface | | xix |
| Chapter 1 | Introduction to SQL:1999 | 1 |
| 1.1 | Introduction | 1 |
| 1.2 | What Is SQL? | 2 |
| | 1.2.1 SQL Versus Object-Oriented Database Systems | 3 |
| | 1.2.2 ODMG and OQL | 4 |
| 1.3 | The Structure and Goals of This Book | 5 |
| | 1.3.1 Volume 1: Relational Language Components | 6 |
| | 1.3.2 Volume 2: Object-Relational and Other Advanced Features | 6 |
| 1.4 | The SQL Object Model | 7 |
| | 1.4.1 An Overview of Object Orientation | 8 |
| | 1.4.2 Structured User-Defined Types | 10 |
| | 1.4.3 Attributes and Methods | 12 |
| | 1.4.4 Inheritance | 12 |
| | 1.4.5 Polymorphism | 14 |
| | 1.4.6 Typed Tables | 15 |
| 1.5 | Conforming to SQL:1999 Object Facilities | 16 |
| 1.6 | Relationship to Products | 18 |
| 1.7 | Chapter Summary | 19 |

| | | |
|------------------|---|-----------|
| Chapter 2 | User-Defined Types | 21 |
| 2.1 | Introduction | 21 |
| 2.2 | What Are UDTs? | 22 |
| | 2.2.1 Evolution of Type Systems | 22 |
| | 2.2.2 Introducing User-Defined Types | 24 |
| 2.3 | Using Objects: GUIs, Languages, and Major Applications | 25 |
| 2.4 | Three Kinds of UDTs | 26 |
| | 2.4.1 Distinct Types | 26 |
| | 2.4.2 Structured UDTs as Values | 29 |
| | 2.4.3 Structured UDTs as Objects | 30 |
| 2.5 | Major Characteristics of Structured UDTs | 30 |
| | 2.5.1 Structured Type Attributes | 31 |
| | 2.5.2 Behaviors and Semantics | 32 |
| | 2.5.3 Inheritance and Type Hierarchies | 33 |
| 2.6 | Attributes in Detail | 35 |
| | 2.6.1 Encapsulation | 35 |
| | 2.6.2 Data Types | 36 |
| | 2.6.3 Accessing Attributes | 37 |
| | 2.6.4 A Note about Table Names Versus Correlation Names | 38 |
| | 2.6.5 Attribute Characteristics | 40 |
| 2.7 | Behavior and Methods | 43 |
| | 2.7.1 Procedures, Functions, and Methods | 44 |
| | 2.7.2 Associated Type | 45 |
| | 2.7.3 Methods: Definition and Invocation | 47 |
| | 2.7.4 Observers and Mutators | 52 |
| | 2.7.5 Constructors | 53 |
| | 2.7.6 Encapsulation Redux | 54 |
| 2.8 | Defining Structured User-Defined Types | 58 |
| 2.9 | Inheritance | 68 |
| | 2.9.1 What Is a Type Hierarchy? | 68 |
| | 2.9.2 Subtypes and Supertypes | 70 |
| | 2.9.3 Instantiable Types Versus Noninstantiable Types | 74 |
| | 2.9.4 Single Inheritance Versus Multiple Inheritance | 75 |
| | 2.9.5 Most Specific Type | 76 |
| | 2.9.6 Substitutability | 76 |
| | 2.9.7 Implementation Versus Interface | 78 |
| 2.10 | Creating Instances of Structured Types | 78 |
| | 2.10.1 Instances Are Values | 79 |

| | | |
|-------------|--|------------|
| 2.10.2 | A Little Mathematical Philosophy | 79 |
| 2.10.3 | Constructors and the NEW Expression | 80 |
| 2.11 | Using Structured Types | 84 |
| 2.11.1 | Storing in the Database | 84 |
| 2.11.2 | Updating in the Database | 85 |
| 2.11.3 | Retrieving from the Database | 87 |
| 2.11.4 | CAST Functions | 88 |
| 2.11.5 | Deleting from the Database | 92 |
| 2.11.6 | Copying an Instance from One Site to Another | 92 |
| 2.11.7 | User-Defined Type Locators | 93 |
| 2.11.8 | Transforms and Transform Groups | 95 |
| 2.11.9 | Comparison of UDTs | 100 |
| 2.11.10 | The Type Predicate | 105 |
| 2.12 | Security for User-Defined Types | 106 |
| 2.13 | More Than One Way to Model Your Application | 107 |
| 2.13.1 | Traditional SQL Tables and Columns | 107 |
| 2.13.2 | Type Hierarchies and Columns | 108 |
| 2.13.3 | Table Hierarchies | 109 |
| 2.14 | Implementation Issues | 110 |
| 2.15 | The SQL Object Model | 111 |
| 2.15.1 | Why Does SQL Have an Object Model? | 111 |
| 2.15.2 | SQL Object Model Summary | 112 |
| 2.16 | Chapter Summary | 117 |

Chapter 3 | Typed Tables **119**

| | | |
|------------|--|------------|
| 3.1 | Introduction | 119 |
| 3.2 | Typed Tables and Structured Types | 119 |
| 3.3 | Self-Referencing Columns | 121 |
| 3.4 | Table Hierarchies | 123 |
| 3.4.1 | Relationship to Type Hierarchies | 123 |
| 3.4.2 | Table Hierarchy Model | 126 |
| 3.5 | Defining Typed Tables | 129 |
| 3.6 | Reference Values and REF Types | 134 |
| 3.6.1 | Providing Self-Referencing Column Values | 134 |
| 3.6.2 | REF Types | 136 |
| 3.6.3 | <ref cast option> | 139 |

| | | |
|------------------|---|------------|
| 3.7 | Retrieving from Typed Tables | 140 |
| 3.7.1 | Basic Retrieval | 140 |
| 3.7.2 | Type Hierarchies and ONLY | 141 |
| 3.7.3 | Reference Values: Follow the Pointer | 142 |
| 3.8 | Inserting, Modifying, and Deleting in Typed Tables | 145 |
| 3.8.1 | INSERT | 145 |
| 3.8.2 | DELETE | 146 |
| 3.8.3 | UPDATE | 147 |
| 3.9 | Typed Views | 148 |
| 3.10 | Typed Tables and Privileges | 150 |
| 3.11 | Chapter Summary | 151 |
| | | |
| Chapter 4 | Routines and Routine Invocation | 153 |
| 4.1 | Introduction | 153 |
| 4.2 | SQL-Invoked Routines | 154 |
| 4.3 | External Routines and SQL Routines | 155 |
| 4.3.1 | External Routines | 155 |
| 4.3.2 | SQL Routines | 158 |
| 4.4 | SQL-Paths | 160 |
| 4.5 | Procedures, Functions, and Methods | 162 |
| 4.5.1 | Procedures | 163 |
| 4.5.2 | Functions | 170 |
| 4.5.3 | Methods | 177 |
| 4.5.4 | Complete Syntax to Define SQL-Invoked Routines | 187 |
| 4.6 | Routine Invocation—In Brief | 191 |
| 4.6.1 | Procedure Invocation Summary | 191 |
| 4.6.2 | Function Invocation Summary | 194 |
| 4.6.3 | Instance Method Invocation Summary | 195 |
| 4.6.4 | Effects of Null Parameters | 198 |
| 4.6.5 | Augmented and Unaugmented Parameter Lists | 199 |
| 4.6.6 | Type Precedence Lists | 202 |
| 4.7 | Polymorphism | 207 |
| 4.7.1 | Polymorphism and Overloading | 207 |
| 4.7.2 | Method Overriding | 210 |
| 4.7.3 | Classical Dispatch Versus Generalized Dispatch | 217 |
| 4.8 | Routine Invocation—The Details | 218 |
| 4.8.1 | Example Setup | 219 |
| 4.8.2 | The Algorithm | 223 |

| | | |
|------|---|-----|
| 4.9 | Security and Rights in Routine Invocation | 231 |
| 4.10 | Chapter Summary | 233 |

Chapter 5 | Foreign Servers and Foreign-Data Wrappers 235

| | | |
|-------|--|-----|
| 5.1 | Introduction | 235 |
| 5.2 | Overview of Distributed Databases | 236 |
| 5.2.1 | Homogeneous Distributed Databases | 237 |
| 5.2.2 | Heterogeneous Distributed Databases | 237 |
| 5.2.3 | Distributed Databases That Include Non-SQL Data | 238 |
| 5.2.4 | Managing a Distributed Database | 239 |
| 5.3 | Foreign Tables, Foreign Servers, and Foreign-Data Wrappers | 240 |
| 5.4 | Metadata Associated with Management of External Data | 244 |
| 5.4.1 | Foreign-Data Wrappers | 245 |
| 5.4.2 | Foreign Servers | 249 |
| 5.4.3 | Foreign Tables | 251 |
| 5.4.4 | Foreign Schemas | 256 |
| 5.4.5 | User Mappings | 258 |
| 5.4.6 | Capabilities Information | 261 |
| 5.4.7 | Generic Options | 261 |
| 5.5 | The SQL/MED API | 262 |
| 5.5.1 | SQL/MED Components | 262 |
| 5.5.2 | SQL/MED Routines | 264 |
| 5.6 | Processing Queries | 268 |
| 5.6.1 | Decomposition Mode and Pass-Through Mode | 269 |
| 5.6.2 | Query Planning—Decomposition Mode | 271 |
| 5.6.3 | Query Execution—Decomposition Mode | 274 |
| 5.7 | An Example | 275 |
| 5.8 | Chapter Summary | 278 |

Chapter 6 | Datalinks 279

| | | |
|-------|--|-----|
| 6.1 | Introduction | 279 |
| 6.2 | <i>Two Sides of a Coin</i> | 279 |
| 6.3 | Datalinkers and External Data Managers | 280 |
| 6.3.1 | Control and Integrity | 282 |
| 6.3.2 | Don't Move It—Link It | 283 |
| 6.3.3 | Functionality of the Datalinker | 284 |

| | | |
|------------|---------------------------|------------|
| 6.4 | DATALINK Data Type | 286 |
| 6.4.1 | Defining Datalinks | 290 |
| 6.4.2 | Accessing Datalinks | 292 |
| 6.4.3 | Using Datalinks | 294 |
| 6.5 | The Future | 296 |
| 6.6 | Chapter Summary | 297 |

Chapter 7 | OLAP **299**

| | | |
|------------|---|------------|
| 7.1 | Introduction | 299 |
| 7.2 | Facilities for Data Analysis without OLAP | 300 |
| 7.2.1 | Set Functions | 301 |
| 7.2.2 | GROUP BY and HAVING | 302 |
| 7.2.3 | CUBE and ROLLUP | 303 |
| 7.3 | What More Do We Need? | 306 |
| 7.4 | SQL Does Windows | 307 |
| 7.4.1 | Windows: Explicit and InLine | 310 |
| 7.4.2 | Window Partitioning | 313 |
| 7.4.3 | Window Ordering | 314 |
| 7.4.4 | Window Framing: Aggregations Groups | 317 |
| 7.4.5 | Multiple Windows and Building on Previous Windows | 325 |
| 7.4.6 | In-Line Window Specifications | 328 |
| 7.5 | Coordinated Nondeterminism | 330 |
| 7.6 | Query Functions | 332 |
| 7.6.1 | Grouped Table Functions | 332 |
| 7.6.2 | OLAP Functions | 334 |
| 7.6.3 | Additional Analysis Facilities | 345 |
| 7.7 | Chapter Summary | 349 |

Chapter 8 | SQL/OLB and SQL/JRT **351**

| | | |
|------------|------------------------------|------------|
| 8.1 | Introduction | 351 |
| 8.2 | The SQLJ Group | 352 |
| 8.3 | The Joys of Java | 353 |
| 8.4 | Embedding SQL in Java | 355 |
| 8.4.1 | SQL/OLB (SQLJ Part 0) | 355 |
| 8.4.2 | The Reference Implementation | 360 |

| | | |
|------------|----------------------------------|------------|
| 8.5 | Java Routines | 360 |
| 8.5.1 | Technical Overview | 361 |
| 8.5.2 | NCITS 331.1 and SQL/JRT | 363 |
| 8.5.3 | Updated Syntax for Java Routines | 365 |
| 8.6 | Java Types | 369 |
| 8.6.1 | Technical Overview | 369 |
| 8.6.2 | NCITS 331.2 and SQL/JRT | 371 |
| 8.6.3 | Updated Syntax for Java Types | 372 |
| 8.7 | Chapter Summary | 374 |

Chapter 9 | SQL/XML **375**

| | | |
|------------|--------------------------------------|------------|
| 9.1 | Introduction | 375 |
| 9.2 | The SQLX Group | 376 |
| 9.3 | Brief Overview of XML | 376 |
| 9.3.1 | The XML Data Models | 379 |
| 9.3.2 | Related SQL Concepts | 381 |
| 9.4 | Mapping SQL and XML Concepts | 382 |
| 9.4.1 | Mapping Identifiers | 384 |
| 9.4.2 | Mapping Data Types | 388 |
| 9.4.3 | Mapping Data Values | 391 |
| 9.4.4 | Mapping SQL Tables | 392 |
| 9.5 | Publishing SQL Data Using XML | 397 |
| 9.5.1 | Storing XML in SQL Databases | 398 |
| 9.5.2 | XMLType | 399 |
| 9.5.3 | Querying XML within SQL Databases | 400 |
| 9.5.4 | XML Publishing Functions | 402 |
| 9.6 | Chapter Summary | 409 |

Chapter 10 | SQL Multimedia and Application Packages **411**

| | | |
|-------------|------------------------|------------|
| 10.1 | Introduction | 411 |
| 10.2 | What Is SQL/MM? | 411 |
| 10.3 | Framework | 414 |
| 10.4 | Full-Text | 415 |
| 10.5 | Spatial | 423 |
| 10.6 | Still Image | 432 |

| | | |
|-------------------|---|------------|
| 10.7 | Data Mining | 437 |
| 10.8 | Chapter Summary | 443 |
| Chapter 11 | A Look to the Future | 445 |
| 11.1 | Introduction | 445 |
| 11.2 | Additional Parts of SQL:1999 | 446 |
| 11.3 | SQL:2003 and Beyond | 447 |
| 11.4 | Chapter Summary | 448 |
| Appendix A | An SQL:1999 Example Using UDTs | 449 |
| A.1 | Introduction | 449 |
| A.2 | The Schema Definition | 449 |
| A.3 | Application Code | 465 |
| A.3.1 | Data Input | 465 |
| A.3.2 | Data Retrieval and Manipulation | 469 |
| Appendix B | The SQL:1999 Annexes | 471 |
| B.1 | Introduction | 471 |
| B.2 | Implementation-Defined and Implementation-Dependent | 472 |
| B.2.1 | Implementation-Defined | 473 |
| B.2.2 | Implementation-Dependent | 488 |
| B.3 | SQL:1999 Conformance Claims | 494 |
| B.4 | Appendix Summary | 495 |
| Appendix C | Relevant Standards Bodies | 497 |
| C.1 | Introduction | 497 |
| C.2 | Contacting ISO | 499 |
| C.3 | Selected National Standards Bodies | 499 |
| Appendix D | Status Codes | 505 |
| D.1 | Values of SQLSTATE | 505 |

| | | |
|-------------------|--|------------|
| Appendix E | The SQL Standardization Process | 519 |
| E.1 | Introduction | 519 |
| E.2 | The Various Standards Bodies | 519 |
| E.2.1 | National Standards | 519 |
| E.2.2 | International Standards | 521 |
| E.2.3 | Standards Development in ISO | 523 |
| E.3 | History of the SQL Standard | 524 |
| E.3.1 | SQL2 | 526 |
| E.3.2 | SQL3 | 527 |
| E.4 | NIST and the FIPS | 528 |
| E.5 | Other SQL-Related Organizations | 529 |
| E.6 | Appendix Summary | 530 |
| | Index | 531 |
| | About the Author | 563 |
