|---|----------|
| <i>Preface</i> | v |
| Foundations | 1 |
| 1. Differentiable Manifolds | 3 |
| 1.1 Differentiable manifolds | 3 |
| 1.1.1 Differentiable manifolds | 3 |
| 1.1.2 Examples of differentiable manifolds | 3 |
| 1.2 Vector fields and tensor fields | 6 |
| 1.2.1 Vector bundles | 6 |
| 1.2.2 Tensor fields | 7 |
| 1.3 Exterior forms and exterior differentials | 9 |
| 1.3.1 Exterior differential operators | 9 |
| 1.3.2 de Rham theorem | 10 |
| 1.4 Vector bundles and connections | 10 |
| 1.4.1 Connection of the vector bundle | 10 |
| 1.4.2 Curvature of a connection | 12 |
| Exercises | 13 |
| 2. Finsler Metrics | 15 |
| 2.1 Finsler metrics | 15 |
| 2.1.1 Finsler metrics | 15 |
| 2.1.2 Examples of Finsler metrics | 17 |
| 2.2 Cartan torsion | 22 |
| 2.2.1 Cartan torsion | 22 |
| 2.2.2 Deicke theorem | 24 |

| | | |
|-------|---|----|
| 2.3 | Hilbert form and sprays | 28 |
| 2.3.1 | Hilbert form | 28 |
| 2.3.2 | Sprays | 30 |
| 2.4 | Geodesics | 31 |
| 2.4.1 | Geodesics | 31 |
| 2.4.2 | Geodesic coefficients | 32 |
| 2.4.3 | Geodesic completeness | 33 |
| | Exercises | 36 |
| 3. | Connections and Curvatures | 39 |
| 3.1 | Connections | 39 |
| 3.1.1 | Chern connection | 39 |
| 3.1.2 | Berwald metrics and Landsberg metrics | 42 |
| 3.2 | Curvatures | 44 |
| 3.2.1 | Curvature form of the Chern connection | 44 |
| 3.2.2 | Flag curvature and Ricci curvature | 45 |
| 3.3 | Bianchi identities | 47 |
| 3.3.1 | Covariant differentiation | 47 |
| 3.3.2 | Bianchi identities | 51 |
| 3.3.3 | Other formulas | 53 |
| 3.4 | Legendre transformation | 54 |
| 3.4.1 | The dual norm in the dual space | 54 |
| 3.4.2 | Legendre transformation | 55 |
| 3.4.3 | Example | 56 |
| | Exercises | 57 |
| 4. | S -Curvature | 59 |
| 4.1 | Volume measures | 59 |
| 4.1.1 | Busemann-Hausdorff volume element | 59 |
| 4.1.2 | The volume element induced from SM | 62 |
| 4.2 | S -curvature | 65 |
| 4.2.1 | Distortion | 65 |
| 4.2.2 | S -curvature and E -curvature | 65 |
| 4.3 | Isotropic S -curvature | 68 |
| 4.3.1 | Isotropic S -curvature and isotropic E -curvature | 68 |
| 4.3.2 | Randers metrics of isotropic S -curvature | 69 |
| 4.3.3 | Geodesic flow | 72 |
| | Exercises | 75 |

| | | |
|-------|--|-----|
| 5. | Riemann Curvature | 77 |
| 5.1 | The second variation of arc length | 77 |
| 5.1.1 | The second variation of length | 77 |
| 5.1.2 | Elements of curvature and topology | 80 |
| 5.2 | Scalar flag curvature | 83 |
| 5.2.1 | Schur theorem | 83 |
| 5.2.2 | Constant flag curvature | 85 |
| 5.3 | Global rigidity results | 89 |
| 5.3.1 | Flag curvature with special conditions | 89 |
| 5.3.2 | Manifolds with non-positive flag curvature | 91 |
| 5.4 | Navigation | 94 |
| 5.4.1 | Navigation problem | 94 |
| 5.4.2 | Randers metrics and navigation | 99 |
| 5.4.3 | Ricci curvature and Einstein metrics | 104 |
| | Exercises | 112 |

Further Studies 115

| | | |
|-------|---|-----|
| 6. | Projective Changes | 117 |
| 6.1 | The projective equivalence | 117 |
| 6.1.1 | Projective equivalence | 117 |
| 6.1.2 | Projective invariants | 119 |
| 6.2 | Projectively flat metrics | 123 |
| 6.2.1 | Projectively flat metrics | 123 |
| 6.2.2 | Projectively flat metrics with constant flag curvature | 126 |
| 6.3 | Projectively flat metrics with almost isotropic \mathbf{S} -curvature | 136 |
| 6.3.1 | Randers metrics with almost isotropic \mathbf{S} -curvature | 136 |
| 6.3.2 | Projectively flat metrics with almost isotropic \mathbf{S} -curvature | 141 |
| 6.4 | Some special projectively equivalent Finsler metrics | 144 |
| 6.4.1 | Projectively equivalent Randers metrics | 144 |
| 6.4.2 | The projective equivalence of (α, β) -metrics | 148 |
| 6.4.3 | The projective equivalence of quadratic (α, β) -metrics | 152 |
| | Exercises | 155 |

| | | |
|-------|---|-----|
| 7. | Comparison Theorems | 157 |
| 7.1 | Volume comparison theorems for Finsler manifolds | 157 |
| 7.1.1 | The Jacobian of the exponential map | 157 |
| 7.1.2 | Distance function and comparison theorems | 162 |
| 7.1.3 | Volume comparison theorems | 165 |
| 7.2 | Berger-Kazdan comparison theorems | 174 |
| 7.2.1 | The Kazdan inequality | 174 |
| 7.2.2 | The rigidity of reversible Finsler manifolds | 180 |
| 7.2.3 | The Berger-Kazdan comparison theorem | 185 |
| | Exercises | 190 |
| 8. | Fundamental Groups of Finsler Manifolds | 191 |
| 8.1 | Fundamental groups of Finsler manifolds | 191 |
| 8.1.1 | Fundamental groups and covering spaces | 191 |
| 8.1.2 | Algebraic norms and geometric norms | 194 |
| 8.1.3 | Growth of fundamental groups | 199 |
| 8.2 | Entropy and finiteness of fundamental group | 205 |
| 8.2.1 | Entropy of fundamental group | 205 |
| 8.2.2 | The first Betti number | 209 |
| 8.2.3 | Finiteness of fundamental group | 213 |
| 8.3 | Gromov pre-compactness theorems | 218 |
| 8.3.1 | General metric spaces | 218 |
| 8.3.2 | δ -Gromov-Hausdorff convergence | 224 |
| 8.3.3 | Pre-compactness of Finsler manifolds | 231 |
| 8.3.4 | On the Gauss-Bonnet-Chern theorem | 233 |
| | Exercises | 235 |
| 9. | Minimal Immersions and Harmonic Maps | 237 |
| 9.1 | Isometric immersions | 237 |
| 9.1.1 | Finsler submanifolds | 237 |
| 9.1.2 | The variation of the volume | 241 |
| 9.1.3 | Non-existence of compact minimal submanifolds | 245 |
| 9.2 | Rigidity of minimal submanifolds | 246 |
| 9.2.1 | Minimal surfaces in Minkowski spaces | 246 |
| 9.2.2 | Minimal surfaces in (α, β) -spaces | 249 |
| 9.2.3 | Minimal surfaces in special Minkowskian (α, β) - spaces | 253 |
| 9.3 | Harmonic maps | 259 |

| | | |
|--------|--|-----|
| 9.3.1 | A divergence formula | 259 |
| 9.3.2 | Harmonic maps | 262 |
| 9.3.3 | Composition maps | 267 |
| 9.4 | Second variation of harmonic maps | 270 |
| 9.4.1 | The second variation | 270 |
| 9.4.2 | Stress-energy tensor | 273 |
| 9.5 | Harmonic maps between complex Finsler manifolds | 276 |
| 9.5.1 | Complex Finsler manifolds | 276 |
| 9.5.2 | Harmonic maps between complex Finsler manifolds | 280 |
| 9.5.3 | Holomorphic maps | 287 |
| | Exercises | 289 |
| 10. | Einstein Metrics | 293 |
| 10.1 | Projective rigidity and m -th root metrics | 293 |
| 10.1.1 | Projective rigidity of Einstein metrics | 293 |
| 10.1.2 | m -th root Einstein metrics | 296 |
| 10.2 | The Ricci rigidity and Douglas-Einstein metrics | 298 |
| 10.2.1 | The Ricci rigidity | 298 |
| 10.2.2 | Douglas (α, β) -metrics | 300 |
| 10.3 | Einstein (α, β) -metrics | 305 |
| 10.3.1 | Polynomial (α, β) -metrics | 305 |
| 10.3.2 | Kropina metrics | 307 |
| | Exercises | 317 |
| 11. | Miscellaneous Topics | 319 |
| 11.1 | Conformal changes | 319 |
| 11.1.1 | Conformal changes | 319 |
| 11.1.2 | Conformally flat metrics | 322 |
| 11.1.3 | Conformally flat (α, β) -metrics | 328 |
| 11.2 | Conformal vector fields | 330 |
| 11.2.1 | Conformal vector fields | 330 |
| 11.2.2 | Conformal vector fields on a Randers manifold | 338 |
| 11.3 | A class of critical Finsler metrics | 344 |
| 11.3.1 | The Einstein-Hilbert functional | 344 |
| 11.3.2 | Some special \mathcal{E} -critical metrics | 349 |
| 11.4 | The first eigenvalue of Finsler Laplacian and the generalized maximal principle | 351 |
| 11.4.1 | Finsler Laplacian and weighted Ricci curvature | 351 |

| | | |
|--------------------------|---|-----|
| 11.4.2 | Lichnerowicz-Obata estimates | 354 |
| 11.4.3 | Li-Yau-Zhong-Yang type estimates | 360 |
| 11.4.4 | Mckean type estimates | 364 |
| | Exercises | 365 |
| Appendix A Maple Program | | 367 |
| A.1 | Spray coefficients of two-dimensional Finsler metrics . . . | 367 |
| A.2 | Gauss curvature | 372 |
| A.3 | Spray coefficients of (α, β) -metrics | 374 |
| | <i>Bibliography</i> | 379 |
| | <i>Index</i> | 389 |
