

# Contents

<b>1</b>	<b>Introduction — 1</b>
1.1	Linear, Nonlinear, and Chaos — 1
1.2	Development of Chaos — 2
1.3	Famous Scientists and Important Events — 4
1.3.1	Lorenz and Butterfly Effect — 4
1.3.2	Li Tien-Yien and the Concept of Chaos — 5
1.3.3	Feigenbaum and Feigenbaum Constant — 6
1.3.4	Leon Ong Chua and Chua's Circuit — 7
1.3.5	Guanrong Chen and Chen's Attractor — 8
1.4	Definition and Characteristics of Chaos — 9
1.5	Overview of Chaos Synchronization Method — 10
1.5.1	Chaos Synchronization Methods and Characteristics — 11
1.5.2	Other Synchronization Methods and Problems — 14
1.6	Summary of Chaos Secure Communication — 15
1.6.1	Chaotic Analog Communication — 16
1.6.2	Chaotic Digital Communication — 16
1.6.3	Encryption Communication based on Chaotic Sequence — 17
1.7	Chaos Research Methods and Main Research Contents — 18
	Questions — 20
<b>2</b>	<b>Characteristic Analysis Methods for Nonlinear System — 21</b>
2.1	Phase Diagram Analysis Method — 21
2.2	Power Spectral Analysis Method — 22
2.3	Poincaré Section Method — 24
2.4	Lyapunov Characteristic Exponent Method — 25
2.4.1	Definition of Lyapunov Characteristic Exponent — 25
2.4.2	Lyapunov Exponent Spectrum — 27
2.4.3	Physical Meaning of Lyapunov Exponent — 27
2.4.4	Condition Lyapunov Exponent — 29
2.5	Fractal Dimension Analysis Method — 30
2.6	0–1 Test Method — 30
2.6.1	0–1 Test Algorithm — 30
2.6.2	Improved 0–1 Test Algorithm — 32
2.6.3	Application of 0–1 Test Algorithm — 33
2.7	Dividing Frequency Sampling Method — 33
2.8	Pseudo-Phase Space Method — 34
2.9	Complexity Measure Algorithm — 35
2.9.1	Spectral Entropy Complexity Algorithm — 36
2.9.2	$C_0$ Complexity Algorithm — 38
	Questions — 40

<b>3</b>	<b>Typical Chaotic Systems — 41</b>
3.1	Discrete-Time Chaotic Map — 41
3.1.1	Logistic Map — 41
3.1.2	Tent Map — 44
3.1.3	Hénon Map — 44
3.1.4	Tangent Delay-Ellipse Reflecting Cavity System Map — 46
3.2	Continuous-Time Chaotic System — 47
3.2.1	Duffing Oscillator — 48
3.2.2	van der Pol Oscillator — 49
3.2.3	Lorenz System — 49
3.2.4	Rössler System — 50
3.2.5	Chua's Circuit — 51
3.2.6	Chen System — 55
3.2.7	Lü System — 55
3.2.8	Unified Chaotic System — 57
3.2.9	Simplified Lorenz System — 59
3.2.10	Standard for a New Chaotic System — 62
3.3	Hyperchaotic System — 62
3.3.1	Rössler Hyperchaotic System — 62
3.3.2	Chen Hyperchaotic System — 63
3.3.3	Folded Towel Hyperchaotic Map — 64
	Questions — 65
<b>4</b>	<b>Chaotic Synchronization Principle and Method — 66</b>
4.1	Definition of Chaos Synchronization — 66
4.2	Performance Index of Chaotic Synchronization System — 67
4.3	Principle and Performance of Feedback Control Synchronization — 69
4.3.1	Multivariable drive feedback synchronization for chaotic system — 69
4.3.2	Linear and Nonlinear Feedback Synchronization for Discrete Chaotic System — 73
4.4	Parameter Adaptive Synchronization Based on Pecora–Carroll Synchronization Criterion — 84
4.4.1	Principle for Adaptive Synchronization — 84
4.4.2	Choose Control Law and Control Parameters — 85
4.4.3	Determine the Boundary and Range of the Control Constant — 86
4.4.4	Simulation Results and Discussion — 87
4.5	Adaptive Synchronization Control Based on Lyapunov Stable Theory — 88
4.5.1	Adaptive Synchronization Control with Certain Parameter — 88
4.5.2	Adaptive Synchronization Control with Uncertain Parameters — 91

- 4.6 Intermittent Feedback Synchronization Control — 94
- 4.6.1 Intermittent Synchronization Control between Different Systems — 94
- 4.6.2 Synchronization Simulation and Performance Analysis — 97
- 4.7 Synchronization Control Based on State Observer Method — 99
- 4.7.1 Design Principle of State Observer — 99
- 4.7.2 Design of State Observer for Unified Chaotic System — 101
- 4.7.3 Simulation and Discussion — 101
- 4.8 Chaos Synchronization Based on Chaos Observer — 104
- 4.8.1 Design Principle of Chaos Observer — 104
- 4.8.2 Chaos Observer of the Unified Chaotic System — 105
- 4.8.3 Synchronization Simulation and Performance Analysis — 106
- 4.9 Projective Synchronization — 108
- 4.9.1 Principle and Simulation of Proportional Projection Synchronization — 109
- 4.9.2 Principle and Simulation of Function Projective Synchronization — 113
- 4.9.3 Principle and Simulation of the Adaptive Function Projective Synchronization — 116
- 4.10 Problems and Development of Chaos Synchronization — 123
- 4.10 Questions — 124
- 5 Secure Communication Technology Based on Chaos Synchronization — 125**
- 5.1 Chaotic Masking Communication — 125
- 5.2 Chaos Shift Keying Communication — 130
- 5.2.1 COOK Communication — 131
- 5.2.2 CSK Communication — 132
- 5.2.3 DCSK Communication — 137
- 5.2.4 FM-DCSK Communication — 139
- 5.2.5 QCSK Communication — 140
- 5.3 Chaos Parameter Modulation — 145
- 5.4 Chaotic Spread Spectrum Communication — 148
- 5.4.1 Principle of Chaotic DS/SS Communication — 148
- 5.4.2 Generation of Chaotic Spread Spectrum Code — 150
- 5.4.3 Simulation Module Design of Multiuser Chaotic Spread Spectrum System — 152
- 5.4.4 Design and Simulation of Multiuser Chaotic Spread Spectrum System Based on Rake Receiver — 158

- 5.4.5 Performance Analysis of Multiuser Chaotic Spread Spectrum System Based on Rake Receiver — **159**  
Questions — **163**
- 6 Data Encryption Based on Chaotic Sequence — 164**
  - 6.1 Chaos Cryptography — **164**
    - 6.1.1 Traditional Cryptography — **164**
    - 6.1.2 Relationship between Chaos Cryptography and Traditional Cryptography — **166**
    - 6.1.3 Principle of Chaos Sequence Encryption — **167**
  - 6.2 Data Encryption Algorithm Based on Chaotic Sequence — **168**
    - 6.2.1 Basic Requirements of Chaotic Encryption Algorithm — **168**
    - 6.2.2 Logistic Map and Its Statistics — **170**
    - 6.2.3 Chaotic Encryption Model and Algorithm — **170**
    - 6.2.4 Implement of Encryption Algorithm Based on Chaotic Sequence — **172**
    - 6.2.5 System Performance Analysis — **175**
  - 6.3 Binary Watermark Image Encryption Algorithm Based on Chaos — **176**
    - 6.3.1 Improvement of Chaotic Pseudo-Random Sequence Generator — **178**
    - 6.3.2 Binary Watermark Image Encryption Algorithm Based on TD-ERCS Map — **178**
    - 6.3.3 Performance Analysis of Encryption Algorithm — **179**
  - 6.4 Color Image Watermarking Algorithm Based on Chaotic Map and Wavelet Transform — **182**
    - 6.4.1 Wavelet Transformation Algorithm and Its Application — **183**
    - 6.4.2 Design and Implementation of Watermark Embedding and Extraction Algorithm — **186**
    - 6.4.3 Simulation and Performance Analysis — **190**
  - 6.5 Chaotic Image Encryption Algorithm — **196**
    - 6.5.1 Chaos-Based Image Encryption Technology — **196**
    - 6.5.2 A New Chaotic Image Encryption Scheme — **199**  
Questions — **205**
- 7 Audio and Video Chaotic Encryption and Communication Technology — 206**
  - 7.1 Principle of Real-Time Voice Encryption Communication — **206**
    - 7.1.1 Principle of Digital Encryption Communication System — **206**
    - 7.1.2 Real-Time Voice Encryption and Communication System — **208**

- 7.1.3 Cipher Synchronization Technology — 209
- 7.2 Real-Time Data Stream Encryption Algorithm — 210
  - 7.2.1 3DES Encryption Algorithm — 210
  - 7.2.2 Encryption Algorithm Based on 3DES and Chaotic Map — 211
  - 7.2.3 Network Synchronization Method — 213
  - 7.2.4 Security Analysis of Real-Time Voice Encryption System — 215
- 7.3 Realization of Real-Time Voice Encryption System — 216
  - 7.3.1 Structure of Real-Time Voice Encryption System — 216
  - 7.3.2 Real-Time Transmission Protocol and Its Data Structure — 218
  - 7.3.3 Implementation of RTP Based on Adaptive Communication Environment — 220
  - 7.3.4 System Debugging and Performance Testing — 222
- 7.4 MPEG Video Encryption Algorithm Based on Chaotic Sequence — 224
  - 7.4.1 Encryption Principle and Procedure of MPEG Video Data — 225
  - 7.4.2 Design of Stream Cipher Based on Chaos — 226
  - 7.4.3 Design of Scrambling Algorithm Based on Chaos — 229
  - 7.4.4 Encryption Experiment and Encryption Effect Analysis — 229
  - 7.4.5 Performance Analysis of MPEG Video Encryption System — 230
- 7.5 H.264 Video Encryption Algorithm Based on Chaos — 232
  - 7.5.1 Chaotic Stream Cipher Based on Tangent Delay-Ellipse Reflecting Cavity System — 233
  - 7.5.2 H.264 Video Encryption Scheme — 233
  - 7.5.3 Performance Analysis of Video Encryption Questions — 237
- 8 Analysis and Simulation of Fractional-Order Chaotic System — 238**
  - 8.1 Development of Fractional-Order Chaotic System — 238
  - 8.2 Definition and Physical Meaning of Fractional Calculus — 241
  - 8.3 Solution Methods of Fractional-Order Chaotic System — 243
    - 8.3.1 Frequency Domain Method for Solving Fractional-Order Chaotic System — 243
    - 8.3.2 Time Domain Method for Solving Fractional-Order Chaotic System — 247
  - 8.4 Simulation Method for Fractional-Order Chaotic System — 251
    - 8.4.1 Dynamic Simulation Method for Fractional-Order Chaotic System — 251

- 8.4.2 Circuit Simulation Method of Fractional-Order Chaotic System — **253**
- 8.4.3 Numerical Simulation Method of Fractional-Order Chaotic System — **256**
- 8.4.4 Comparison of Simulation Methods — **258**
- 8.5 Dynamics of Fractional-Order Unified System Based on Frequency Domain Method — **259**
  - 8.5.1 Fractional-Order Unified Chaotic System Mode — **259**
  - 8.5.2 Dynamic Simulation of Fractional-Order Unified Chaotic System — **260**
  - 8.5.3 Dynamics of Fractional-Order Unified System with Fixed Parameter — **261**
  - 8.5.4 Dynamics of Fractional-Order Unified System with Different Parameter — **264**
- 8.6 Dynamics of Fractional-Order Diffusionless Lorenz System Based on Time Domain Method — **266**
  - 8.6.1 Fractional-Order Diffusionless Lorenz System Model — **266**
  - 8.6.2 Chaotic Characteristic of Fractional-Order Diffusionless Lorenz System — **267**
  - 8.6.3 Bifurcation Analysis with Varying System Parameter  $R$  — **268**
  - 8.6.4 Bifurcation Analysis with Varying Fractional Order  $q$  — **269**
  - 8.6.5 Bifurcations with Different Fractional Order — **270**  
Questions — **272**
- 9 Simulation and Hardware Implementation of Chaotic System — 274**
  - 9.1 Dynamic Simulation of Chaotic System — **274**
    - 9.1.1 Dynamic Simulation Steps on Simulink — **274**
    - 9.1.2 Simulation Result Analysis and Performance Improvement — **276**
  - 9.2 Circuit Simulation of Chaotic System — **276**
  - 9.3 Design of Chaotic Analog Circuit — **277**
    - 9.3.1 Procedure of Chaotic Circuit Design — **277**
    - 9.3.2 Modular Design of Chaotic Circuit — **279**
    - 9.3.3 Basic Components of Chaotic Circuit — **279**
  - 9.4 Improved Modular Design of Chaotic Circuit — **282**
    - 9.4.1 Design of Multiscroll Jerk Circuit Based on OA — **283**
    - 9.4.2 Design of Multiscroll Jerk Circuit Based on CC — **283**
    - 9.4.3 Multiscroll Jerk Circuit Implementation — **286**
  - 9.5 Digital Signal Processor Design and Implementation of Chaotic Systems — **287**

- 9.5.1 DSP Experimental Platform of Chaotic System — 287
- 9.5.2 DSP Implementation of Integer-Order Chaotic System — 290
- 9.5.3 DSP Implementation of Fractional-Order Chaotic System — 292  
Questions — 294

**Appendix A: Important Academic Journals  
in the Field of Chaos — 295**

**Appendix B: Matlab Source Programs  
of Chaos Characteristic Analysis — 296**

- B.1 Mode of the Simplified Lorenz System — 296
- B.2 Programs about Characteristic Analysis of Integer-Order Simplified Lorenz System — 297
  - B.2.1 Simulation Codes for Matlab Toolbox with Runge–Kutta Algorithm — 297
  - B.2.2 Solution Based on Euler and Runge–Kutta Algorithm — 297
  - B.2.3 Program of Calculating LE — 300
  - B.2.4 Program of Calculating the Maximum LE — 303
  - B.2.5 Program for Calculating Bifurcation Diagram — 304
  - B.2.6 Program for Plotting Poincaré Section — 305
  - B.2.7 Program for 0–1 Test — 307
- B.3 Solution Program for the Fraction-Order Simplified Lorenz System — 308
  - B.3.1 Solution Program Based on Predictor–Corrector Approach — 308
  - B.3.2 Solution Program Based on Adomian Decomposition Approach — 309
  - B.3.3 Analysis Program of Complexity and Chaos Diagram — 312
- B.4 Simulation of Chaotic Synchronization — 316
  - B.4.1 Drive–Response Synchronization — 316
  - B.4.2 Coupling Synchronization — 318
  - B.4.3 Tracking Synchronization — 320
