TABLE OF CONTENTS

PREFACE ix

CHAPTER 1: APPROACHES TO THE ANALYSIS OF DEVALUATION: A BRIEF SURVEY 3

I The Traditional Elasticities Analysis 7
Derivations via the Balance of Payments Equation 8
Foreign Exchange Market Stability Condition 9
Objections 10
II The "Revised Traditional" Analysis and Absorption 10
"Revised Traditional" Models 10
Absorption 13
III Machlup's Attack and Some Attempts at Synthesis 15
Absorption Criticized 15
Alexander's Synthesis 17
Synthesis a la Brems and Michaely 19
The Role of Money: Tsiang's Synthesis 21
IV Walrasian General Equilibrium, Money, and Nontraded Goods 25
General Equilibrium and Money 25
Introducing Nontraded Goods 27
V Monetary Analyses 28
Portfolio Balance and International Capital Movements 29
The Monetarist Literature 30
VI Concluding Remarks 34

CHAPTER 2: MACROECONOMIC MODELS OF OPEN ECONOMIES: SOME SPECIFICATION PROBLEMS 35

I An Aggregate Model of the Closed Economy 35
Aggregate Demand 36
Aggregate Supply 39
II Specification Problems of the Open-Economy Model 43

CHAPTER 3: AN INTEGRATED MACROECONOMIC MODEL OF AN OPEN ECONOMY 47

I The Model 48
Aggregate Demand 50
Aggregate Supply 55

Kyle, John Francis
The balance of payments in a monetary economy
digitalisiert durch:
IDS Luzern

Balance of Payments Equilibrium Line 57
The Aggregate Expenditure Function 64
II Devaluation, Employment, and the Balance of Trade in a Keynesian World 65
Employment Effects 66
Balance of Payments Effects 75
III A Classical World 81
The Model 81
Employment Effects of a Devaluation 83
Balance of Payments Effects 85
IV Stability Analysis of the Model 87
Correspondence Principle Analysis 88
Stability of the Basic Model 89
Alternate Approaches to Stability 91

APPENDIX A: MATHEMATICAL DERIVATIONS 95
I The Basic Components of the Model 95
Aggregate Demand 95
Short-Run Balance of Payments Equilibrium Line 97
Aggregate Supply 99
II The Complete Models in the Small-Country Case 100
Keynesian Model 100
Classical Model 101

APPENDIX B: A TWO-COUNTRY MODEL 103
I The Keynesian Version of the Model 103
II A Classical World 106

CHAPTER 4: LONG-RUN ADJUSTMENT AND THE ROLE OF MONETARY AND FISCAL POLICIES 109
I The Model without Complete Sterilization 109
The Modified Model 110
Long-Run Adjustment: The Keynesian System 112
Long-Run Adjustment: The Classical System 117
Long-Run Adjustment: A Final Comment 120
II The Complete Model: A Diagrammatic Digression 120
The Keynesian System 121
The Classical System 128
III Monetary and Fiscal Policy 130
Monetary Policy under Complete Sterilization 131
Fiscal Policy in the Short and Long Run 135

APPENDIX: MATHEMATICAL DERIVATIONS 142
The Long-Run Models 142

CHAPTER 5: MACROECONOMIC VERSUS WALRASIAN MODELS OF AN OPEN ECONOMY 144
I Walras-Hahn Open-Economy Models 146
The Basic Model 146
The Model with Money 149
Walrasian versus Macroeconomic Results 152
The Role of Nontraded Goods 160
An Aside on Sterilization 163
II The Walras-Hahn Model with Unemployment 164
The Structure of the Basic Model 165
Unemployment in a Walrasian Model 168
The Balance of Trade and Financial Controls 170
III Macroeconomic versus Walrasian Models: A Summary 172

CHAPTER 6: CONCLUSIONS AND DISCLAIMERS 174
