

# Contents

Dedication .....	v
Preface .....	vii
Chapter 1: How Embryogenesis Began in Evolution.....	1
Chapter 2: Developmental Anatomy of the Axolotl .....	75
Chapter 3: Developmental Genetics: A Flying Tour .....	171
Chapter 4: Epigenetics: Higher Order Gene Control .....	277
Chapter 5: The Cytoskeleton.....	329
Chapter 6: The Cell State Splitter and Differentiation Waves .....	441
Chapter 7: The Differentiation Tree and the Fate Map of the Axolotl.....	501
Chapter 8: Signal Transduction from the Cell State Splitter to the Nuclear State Splitter.....	543
Chapter 9: The Nuclear State Splitter .....	603
Chapter 10: Irritable Protoplasm: Forerunners to Differentiation Waves .....	653
Chapter 11: Why Evolution is Progressive .....	671
Chapter 12: Wholeness and the Implicate Embryo: Embryogenesis as Self-Construction of the Observer .....	709
Index .....	745
