List of Contributors.....	vii
Series Preface .....	ix
Preface.....	xi
<b>1 Physicochemical Kinetics and Transport at the Biointerface: Setting the Stage.....</b>	<b>1</b>
<i>W. Köster and H. P. van Leeuwen</i>	
<b>2 Molecular Modelling of Biological Membranes: Structure and Permeation Properties .....</b>	<b>15</b>
<i>F. A. M. Leermakers and J. M. Kleijn</i>	
<b>3 Biointerfaces and Mass Transfer.....</b>	<b>113</b>
<i>H. P. van Leeuwen and J. Galceran</i>	
<b>4 Dynamics of Biouptake Processes: the Role of Transport, Adsorption and Internalisation.....</b>	<b>147</b>
<i>J. Galceran and H. P. van Leeuwen</i>	
<b>5 Chemical Speciation of Organics and of Metals at Biological Interphases .....</b>	<b>205</b>
<i>B. I. Escher and L. Sigg</i>	
<b>6 Transport of Solutes Across Biological Membranes: Prokaryotes.....</b>	<b>271</b>
<i>W. Köster</i>	
<b>7 Transport of Solutes Across Biological Membranes in Eukaryotes: an Environmental Perspective .....</b>	<b>337</b>
<i>R. D. Handy and F. B. Eddy</i>	
<b>8 Transport of Colloids and Particles Across Biological Membranes....</b>	<b>357</b>
<i>M. G. Taylor and K. Simkiss</i>	
<b>9 Mobilisation of Organic Compounds and Iron by Microorganisms....</b>	<b>401</b>
<i>H. Harms and L. Y. Wick</i>	
<b>10 Critical Evaluation of the Physicochemical Parameters and Processes for Modelling the Biological Uptake of Trace Metals in Environmental (Aquatic) Systems.....</b>	<b>445</b>
<i>K. J. Wilkinson and J. Buffle</i>
