

Anghel DF:	<b>Preface</b> .....	V
Wang C, Tong Z, Zeng F, Ren B, Liu X, Wu S:	Surfactant structure effects on binding with oppositely charged polyelectrolytes observed by fluorescence of a pyrene probe and label .....	1
Dragan S, Schwarz S:	Dependence of the aggregation mode of two bidentate azo dyes in polycation/dye multilayers on the dye structure and the polycation conformation .....	8
Anghel DF, Saito S, Iovescu A, Băran A, Stîngă G, Neamtu C:	Counterion effect of cationic surfactants on the interaction with poly(acrylic acid) .....	16
Koetz J, Günther C, Kosmella S, Kleinpeter E, Wolf G:	Polyelectrolyte-induced structural changes in the isotropic phase of the sulfobetaine/pentanol/toluene/water system .....	27
Bakshi MS, Kaur I:	Surfactant–polymer aggregates of mixed cationic micelles and anionic polyelectrolytes: a surfactant head group contribution .	37
Burke SE, Palepu RM, Hait SK, Moulik SP:	Physicochemical investigations on the interaction of cationic cellulose ether derivatives with cationic amphiphiles in an aqueous environment .....	47
Berglund KD, Timko AE, Przybycien TM, Tilton RD:	Use of nonionic ethylene oxide surfactants as phase-transfer catalysts for poly(acrylic acid) adsorption to silica against an electrostatic repulsion .....	56
Vijan LE, Volanschi E, Hillebrand M:	Molecular modeling of anthracycline–DNA interaction .....	67
Müller AJ, Garcés Y, Torres M, Scharifker B, Sáez Eduardo A:	Interactions between high-molecular-weight poly(ethylene oxide) and sodium dodecyl sulfate .....	73
Shirahama K, Koga H, Takisawa N:	Diverse actions of added alkanols on the binding of dibucaine cation to an anionic polymer .....	82
Olteanu M, Mandru I, Dudau M, Peretz S, Cinteza O:	The aqueous liquid/liquid interphases formed by chitosan–anionic surfactant complexes .....	87
Barreiro-Iglesias R, Alvarez-Lorenzo C, Concheiro A:	Microcalorimetric evidence and rheological consequences of the salt effect on carbopol–surfactant interactions .....	95
Piculell L, Sjöström J, Lynch I:	Swelling isotherms of surfactant-responsive polymer gels .....	103
Roscigno P, D’Errico G, Ortona O, Sartorio R, Paduano L:	A comparison study between sodium decyl sulfonate and sodium decyl sulfate with respect to the interaction with poly(vinylpyrrolidone) .....	113
von Klitzing R, Kolarić B:	Influence of the polycation architecture on the oscillatory forces of aqueous free-standing polyelectrolyte/surfactant films .....	122
Tiefenbach K-J, Durchschlag H, Schneider G, Jaenicke R:	Thermodynamic analysis of serum albumin denaturation by sodium dodecyl sulfate .....	130

---

López-Fontán JL, Martínez-Land- eira P, Santamarina C, Ruso JM, Prieto G, Sarmiento F:	The surfactant characteristics of short-chain lecithins analyzed through lecithin–lecithin and lecithin–biopolymer interactions . . . . .	141
Miyazawa K, Winnik FM:	Isothermal titration calorimetry and fluorescence spectroscopy studies of the interactions between surfactants and a phosphorylcholine-based polybetaine . . . . .	149
