	Prai	ise for the first edition	XX		
	Pai	rt I Minerals as chemical compounds	1		
ı	Sub	ject and history of mineralogy	3		
	1.1	What is mineralogy?	3		
	1.2	History	3		
	1.3	Major directions of investigation	8		
	1.4	Some preliminary advice	9		
	1.5	Definition of crystal and mineral	10		
	1.6	Summary	10		
2	Elei	ments, bonding, simple structures, and ionic radii	12		
	2.1	Chemical elements	12		
	2.2	Bonding	15		
	2.3	Ionic radii	22		
	2.4	Radius ratio and coordination polyhedra	24		
	2.5	Some general rules concerning ionic structures	29		
	2.6	Summary	29		
3	lsor	morphism, solid solutions, and polymorphism	31		
	3.1	Isomorphism and solid solutions	31		
	3.2	Polymorphism and phase transitions	32		
	3.3	Summary	36		
4.	Che	mical formulas of minerals	37		
	4.1	Ideal formulas	37		
	4.2	Empirical formulas	37		
	4.3	Calculation of chemical formulas from weight percentage of oxides	37		
	4.4	Simplified formulas	38		
	4.5	How to use ternary diagrams	39		
	4.6	Summary	41		
5	Che	mical classification and names of minerals	42		
	5.1	Minerals, mineral species, and mineral varieties	42		
	5.2	Chemical classification of minerals	42		
	5.3	Mineral names	47		
	5.4	Summary	47		
6	Min	eral identification of hand specimens	49		
	6.1	Different scales	49		
	6.2	State of aggregation (including crystallographic form and habit)	49		

	6.3	Color, streak, and luster	50
	6.4	Mechanical properties	51
	6.5	Density and specific gravity	54
	6.6	Other properties	54
	6.7	Associations of minerals	54
	6.8	Some directions for practical mineral identification	54
	6.9	Summary	56
	Part	Il Symmetry expressed in crystal structures and morphology	59
7	The	concept of a lattice and description of crystal structures	61
	7.1	Discovery of the lattice	61
	7.2	Symmetry considerations	63
	7.3	The unit cell as the basic building block of a crystal	64
	7.4	Representation of lattice lines and planes with rational indices	72
	7.5	Relations between lattice planes and lattice lines	76
	7.6	Crystal structure	78
	7.7	Summary	80
8	-	tal symmetries: point-groups and space-groups	81
	8.1	Introduction	81
	8.2	Spherical representations of morphology	81
	8.3	Point-group symmetry	89
	8.4	Crystallographic forms	100
	8.5	Some comments on space-groups	102
	8.6	Summary	106
9	•	talline defects	108
	9.1	Types of defects	108
	9.2	Point defects	108
	9.3	Dislocations (line defects)	108
	9.4	Planar defects during growth	110
	9.5	Planar defects during phase transformations	111
	9.6	Quasicrystals	116
	9.7	Radiation defects and radioactive decay	116
	9.8	Summary	117
10		tal growth and aggregation	118
		Crystal habit	118
		Nucleation and growth	120
		Various growth effects	125
		Aggregation	127
	10.5	Summary	128
	Part	III Physical investigation and properties of minerals	131
П	X-ra	y diffraction	133
		Basic concepts	133
		Brief discussion of waves	136
		Laue and Bragg equations	137
	11.4	The powder method	141

	11.5	Crystal identification with the powder method	143
		X-rays and crystal structure	143
		Additional atomic scattering considerations	146
		Summary	146
ĺ	12 Phy	sical properties	149
,	•	Vectors and tensors: general issues	149
		Symmetry considerations	151
		Tensors of different ranks	152
		Density	152
		Thermal conductivity, thermal expansion, and specific heat	154
		Elastic properties	155
		Piezoelectricity and pyroelectricity	159
		Magnetic properties	160
		Summary	164
ı	3 Opti	ical properties	166
	-	Some physical background	166
		Refractive index and optical applications	168
		Polarization and birefringence	173
	13.4	The optical indicatrix	180
	13.5	Dispersion	185
	13.6	Pleochroism	186
	13.7	Summary	187

17	Mechanical properties and deformation	251
	17.1 Stress-strain	251
	17.2 Deformation by slip	252
	17.3 Dislocation microstructures	254
	17.4 Mechanical twinning	254
	17.5 Polycrystal plasticity	256
	17.6 Summary	256
	Part IV Mineral-forming processes	259
18	Mineral genesis	261
	18.1 Overview	261
	18.2 Mineral-forming environments	261
	18.3 Types of mineral crystallization	264
	18.4 Types of mineral deposits	265
	18.5 Multistage processes, generations, and parageneses	267
	18.6 Typomorphism of minerals	267
	18.7 Summary	269
19	Considerations of thermodynamics	270
	19.1 Background	270
	19.2 Energy minimum in a system	271
	19.3 The simplest thermodynamic calculations and diagrams	272
	19.4 Electrolytes and Eh-pH phase diagrams	278
	19.5 Phase rule	282
	19.6 Summary	283
20	Phase diagrams	284
	20.1 Introduction	284
	20.2 Diagrams for crystallization from a melt	284
	20.3 Pressure-temperature phase diagrams and implications for the Earth mantle	285
	20.4 Melting behavior of solid solutions	286
	20.5 Exsolution	289
	20.6 Summary	290
	Part V A systematic look at mineral groups	293
2 I		205
	Their occurrence in granites and pegmatites	295
	21.1 Silica minerals	295
	21.2 Feldspars	299
	21.3 Brief description of silica minerals	307
	21.4 Brief description of feldspars	309
	21.5 The origin of granite	311
	21.6 Pegmatites	315
	21.7 Summary	315
22	Simple compounds. Unusual mineral occurrences	317
	22.1 Background about metals and intermetallics	317
	22.2 Crystal structures and relationships to morphology and physical properties	317
	22.3 Brief description of important minerals of the native elements	321

	22.4	Unusual conditions of formation	323
		Summary	324
	22.5	Summary	327
23	Hali	des. Evaporite deposits	325
		Common compositional and structural features of halides	325
		Brief description of halide minerals	327
		Origin of halide minerals	327
		Commercial deposits	334
		Summary	334
	2010	5 minus 2 y	
24	Carl	oonates and other minerals with triangular anion groups.	
		mentary origins	336
		Characteristic features of composition and crystal chemistry of carbonates	
		and borates	336
	24.2	Morphology and properties of carbonates	340
		Brief description of important carbonate minerals	340
	24.4	Formation conditions of carbonates	342
	24.5	Carbonates in sedimentary rocks: chemical and biological origins	344
	24.6	Summary	349
25	Pho	sphates, sulfates, and related minerals. Apatite as a biogenic mineral	350
LJ		Phosphates, arsenates, and vanadates	350
		Brief description of important phosphate minerals	350
	25.3	Sulfates and tungstates	352
		Brief description of important sulfate and tungstate minerals	352
		Biogenic processes	356
		Summary	360
24	CI£:	des and volated minovals. Uvduethoused museosses	361
26	26.1	des and related minerals. Hydrothermal processes Crystal chemistry	361
		Brief description of important sulfide minerals	365
	26.2	Sulfide genesis and hydrothermal deposits	368
		Weathering and oxidation of sulfides	374
		Summary	374
	20.5	Summary	313
27	0xid	es and hydroxides. Review of ionic crystals	377
	27.1	Overview	377
	27.2	Ionic crystal structures	377
	27.3	More complex oxide structures	382
	27.4	Brief description of important oxide and hydroxide minerals	385
	27.5	Summary	394
28	Orth	osilicates and ring silicates. Metamorphic mineral assemblages	396
	28.1	General comments on silicates	396
	28.2	Orthosilicates	399
		Brief description of important orthosilicate minerals	405
		Ring silicates	409
		Brief description of important ring silicate minerals	409
		Metamorphic minerals	410
	28.7		417

29	Shee	et silicates. Weathering of silicate rocks	418		
	29.1	Basic structural features	418		
	29.2	Polytypism	423		
	29.3	Structure of clay minerals	425		
	29.4	Brief description of important sheet silicate minerals	426		
	29.5	Formation conditions for sheet silicates and weathering of silicate rocks	431		
	29.6	Clay minerals in soils	431		
	29.7	Summary	435		
30	Chai	n silicates. Discussion of some igneous and metamorphic processes	437		
	30.1	Structural and chemical features	437		
	30.2	Brief description of important chain silicate minerals	445		
	30.3	Crystallization of igneous rocks	450		
	30.4	Metamorphic reactions in siliceous limestones	456		
	30.5	Summary	460		
31	Fran	nework silicates. Zeolites and ion exchange properties of minerals	462		
		The framework structure	462		
		Morphology and physical properties	464		
		Brief description of important framework silicate minerals	468		
		Ion exchange properties of some minerals	469		
	31.5	Summary	471		
32	_	nic minerals	473		
		Organic compounds	473		
		Chemical classes and some structures of organic minerals	474		
		Brief descriptions of some organic minerals	475		
	32.4	Summary	477		
	Part	t VI Applied mineralogy	479		
33	Met	alliferous mineral deposits	481		
	33.1	Applied mineralogy	481		
	33.2	Economically important minerals	482		
	33.3	Geological setting of metal deposits	482		
	33.4	Metal production around the world	489		
		Reserves	498		
	33.6	Summary	500		
34		nstones	501		
		General comments about gems	501		
		Instruments used by gemologists	504		
		Important gems	507		
		Gemstone enhancements	510		
		Crystal synthesis	512		
	34.6	Summary	517		
35		nent minerals	518		
	35.1	S	518		
	35.2	of manifestatic contents	519		
	35.3	Portland cement	519		

	35.4	Some problems with concrete	522
	35.5		524
