Contents

| | Figures and tables Preface | xi |
|------------------------------|--|------|
| | Author's acknowledgments | xxix |
| | Permissions | xxxi |
| Par | t I Fundamentals | I |
| 1 | Motor Behavior and Control | 3 |
| | 1.1 Goal-Directed Motor Behavior | 4 |
| | 1.2 Principles of Error-Correcting Feedback Control | 13 |
| | 1.3 Feedback Control Is Not All About Correcting Errors | 24 |
| | 1.4 Alternatives and Extensions to Feedback Control | 30 |
| 2 | Neuromechanical Foundations | 39 |
| | 2.1 Neurons | 40 |
| | 2.2 Motor Components of the Central Nervous System | 57 |
| | 2.3 Nerve and Muscle | 86 |
| | 2.4 Joint Movements and Muscles | 102 |
| 3 | Sensorimotor Foundations | 123 |
| | 3.1 General Principles | 124 |
| | 3.2 The Vestibular System | 137 |
| | 3.3 The Somatosensory System | 153 |
| | 3.4 Prophocepuve Alterence and Kinestnesis | 169 |
| 4 | Visuomotor Foundations | 195 |
| | 4.1 Eyes and Images | 196 |
| | 4.2 Pathways and Processes | 210 |
| | 4.3 Moving the Eyes and Head | 227 |
| | 4.4 Bringing images onto the Foveas | 242 |
| Part II Sensorimotor Control | | 265 |
| 5 | Stimulus-Elicited Behavior | 267 |
| | 5.1 Different Types of Stimulus-Elicited Behavior | 268 |
| | 5.2 Reflexes | 276 |
| | 5.3 Elemental Reflexes: The Building Blocks of Reflex Action | 281 |
| | 5.4 The Combinatorial Approach to Functional Reflex Action 5.5 Interactions Between Functional Reflexes | 293 |
| 6 | Reflex Circuitry and Voluntary Motor Control | 215 |
| | 6 I Central Processes Determine Reflex Excitability | 315 |
| | 6.2 The Contribution of Reflex Circuitry to Voluntary Movement | 310 |
| | 6.3 Reflexes and Feedback Control | 334 |
| | 6.4 The Stretch Reflex and Voluntary Movement | 341 |
| | | |

| | 6.5 An Introduction to the λ -Equilibrium Point Hypothesis | 349 |
|------|--|------|
| 7 | Orienting to the Environment and Controlling Upright Stance | 365 |
| | 7.1 Sensorimotor Orientation to the Gravitational Vertical | 366 |
| | 7.2 Orientation to the Gravitoinertial Vertical | 377 |
| | 7.3 Mechanics of Standing Posture | 389 |
| | 7.4 Quiet Standing and Postural Sway | 401 |
| | 7.5 Perturbed Stance | 421 |
| 8 | Locomotion on Legs | -137 |
| | 8.1 Describing Locomotion on Legs | 438 |
| | 8.2 Muscles, Forces and Energetics | 450 |
| | 8.3 Generator of Locomotor Patterns | 460 |
| | 8.4 Sensory Influences on Locomotor Pattern Generation | 474 |
| 9 | Getting Around: Visual Control of Locomotor Maneuvers | 485 |
| | 9.1 The Importance of Vision for Locomotion on Legs | 480 |
| | 9.2 The Role of Vision in Guidance and Decision Making | 490 |
| | | 202 |
| 10 | Staying on Track | 521 |
| | 10.1 Staying on Track by Correcting Errors | 522 |
| | 10.2 Perceiving That You Are Going in the Right Direction | 536 |
| | 10.3 Perceptual Information and Compensatory Steering Control | 540 |
| | 10.4 Comening and Steering Along winding Faths | 228 |
| 11 | Programs and Pattern Generation in Voluntary Action | 571 |
| | 11.1 The Nature of Motor Programs | 572 |
| | 11.2 Program Structures for Aimed Movement | 590 |
| 12 | Aiming To Be Accurate | 623 |
| | 12.1 Accuracy of Movements Aimed at Visible Targets | 624 |
| | 12.2 The Speed-Accuracy Trade-Off | 640 |
| | 12.3 Effects of Accuracy Requirements on Movement Kinematics | 652 |
| | 12.4 Aiming to Reach a Particular Place at a Particular Time | 001 |
| 13 | Successful informatics practice | 683 |
| | 13.1 A Combinatorial Approach to Senal Action | 684 |
| | 13.2 Speech Production | 697 |
| | 13.3 writing and Drawing | /12 |
| Part | III Sensorimotor Learning | 729 |
| 14 | Introduction to Sensorimotor Learning | 731 |
| | 14.1 Learning and Memory | 732 |
| | 14.2 Experience Changes Elicited Behavior: Learning Not to Respond | 756 |
| | 14.3 Experience Changes Elicited Behavior: Learning to Anticipate | 767 |
| 15 | Learning by Doing | 785 |
| | 15.1 Learning from Consequences | 786 |
| | 15.2 Sensorimotor Adaptation | 804 |
| | 15.3 Automaticity and Sequence Learning | 816 |
| | References | 825 |
| | Index | 861 |
