

Contents

Chapter 1. Introduction	1
Chapter 2. Analysis and Geometry on Quasi-Metric Spaces	13
2.1. A metrization result for general quasi-metric spaces	13
2.2. Geometrically doubling quasi-metric spaces	16
2.3. Approximations to the identity on quasi-metric spaces	24
2.4. Dyadic Carleson tents	30
Chapter 3. $T(1)$ and local $T(b)$ Theorems for Square Functions	35
3.1. An arbitrary codimension $T(1)$ theorem for square functions	35
3.2. An arbitrary codimension local $T(b)$ theorem for square functions	46
Chapter 4. An Inductive Scheme for Square Function Estimates	51
Chapter 5. Square Function Estimates on Uniformly Rectifiable Sets	57
5.1. Square function estimates on Lipschitz graphs	58
5.2. Square function estimates on $(BP)^k$ LG sets	62
5.3. Square function estimates for integral operators with variable kernels	64
Chapter 6. L^p Square Function Estimates	71
6.1. Mixed norm spaces	71
6.2. Estimates relating the Lusin and Carleson operators	81
6.3. Weak L^p square function estimates imply L^2 square function estimates	86
6.4. Extrapolating square function estimates	92
Chapter 7. Conclusion	101
