Preface	xiii
About the Author	xvii
1 <i>Enzymes as Catalysts</i>	
I. What Are Enzymes, and How Do They Work?	1
A. Historical	1
B. Specificity of Enzyme-Catalyzed Reactions	4
C. Rate Acceleration	13
II. Mechanisms of Enzyme Catalysis	15
A. Approximation	16
B. Covalent Catalysis	18
C. General Acid/Base Catalysis	20
D. Electrostatic Catalysis	28
E. Desolvation	30
F. Strain or Distortion	30
III. Enzyme Catalysis in Organic Media	33
IV. Enzyme Nomenclature	34
V. Epilogue	35
References	36
2 <i>Group Transfer Reactions: Hydrolysis, Amination, Phosphorylation</i>	
I. Hydrolysis Reactions	39
A. Amide Hydrolysis: Peptidases	39
B. Ester Hydrolysis: Esterases and Lipases	60
II. Aminations	64
A. Glutamine-Dependent Enzymes	64
B. Aspartic Acid as a Source of Ammonia	76

III. Phosphorylations: Transfers of Phosphate and Phosphate Esters to Water or Other Acceptors	76
A. Phosphatases	79
B. Phosphodiesterases	85
C. Kinases	87
References	90
3 <i>Reduction and Oxidation</i>	
I. General	95
II. Redox without a Coenzyme	95
III. Redox Reactions That Require Coenzymes	100
A. Nicotinamide Coenzymes (Pyridine Nucleotides)	100
B. Flavin Coenzymes	119
C. Quinone-Containing Coenzymes	147
D. Other Redox Enzymes	157
References	169
4 <i>Monoxygenation</i>	
I. General	175
II. Flavin-Dependent Hydroxylases	175
A. No Reducing Agent Required	175
B. Hydroxylases Requiring an External Reducing Agent	177
III. Pterin-Dependent Hydroxylases	188
A. General	188
B. Mechanism	189
IV. Heme-Dependent Monoxygenases	193
A. General	193
B. Molecular Oxygen Activation	196
C. Mechanistic Considerations	198
V. Nonheme Iron Oxygenation	218
A. Methane Monoxygenase	218
VI. Copper-Dependent Oxygenation	219
A. Dopamine β -Monoxygenase	219
References	223
5 <i>Dioxygenation</i>	
I. General	227
II. Intramolecular Dioxygenases	227
A. Catechol Dioxygenases	227
B. Prostaglandin H Synthase (Cyclooxygenase)	232

III. Intermolecular Dioxygenases	239
A. α -Keto Acid-Dependent Dioxygenases	239
References	248

6 Substitutions

I. S_N1	251
A. Farnesyl Diphosphate Synthase and Related Enzymes	251
II. S_N1/S_N2	257
A. Disaccharide Phosphorylases	257
B. β -Glycosidases	260
III. S_N2	262
IV. S_N2'	265
V. S_NAr : Nucleophilic Aromatic Substitution	268
VI. Electrophilic Substitution (Addition/Elimination)	273
VII. Electrophilic Aromatic Substitution	282
References	286

7 Carboxylations

I. General Concepts	289
II. Carbon Dioxide as the Carboxylating Agent	290
A. Phosphoenolpyruvate (PEP) Carboxykinase	290
B. Phosphoenolpyruvate Carboxytransphosphorylase	293
C. Vitamin K-Dependent Carboxylation of Proteins	297
III. Bicarbonate as the Carboxylating Agent	303
A. Phosphoenolpyruvate Carboxylase	303
B. Biotin-Dependent Carboxylases	307
References	319

8 Decarboxylation

I. General	321
II. β -Keto Acids	321
A. Schiff Base Mechanism	323
B. Metal Ion-Catalyzed Mechanism	327
III. β -Hydroxy Acids	329
A. Isocitrate Dehydrogenase	329
B. 6-Phosphogluconate Dehydrogenase	330
IV. α -Keto Acids	331
A. General	331
B. Chemistry and Properties of Thiamin Diphosphate	331
C. Mechanism of Thiamin Diphosphate-Dependent Enzymes	335

V. Amino Acids	343
A. Pyridoxal Phosphate-Dependent Decarboxylation	343
B. Pyruvoyl-Dependent Decarboxylation	348
VI. Other Substrates	349
A. Orotidine 5'-Monophosphate	349
B. Mevalonate Diphosphate	354
References	356
9 Isomerizations	
I. General	359
II. [1,1]-Hydrogen Shift	359
A. Amino Acid Racemases That Require No Cofactors	359
B. Amino Acid Racemases That Require Pyridoxal 5'-Phosphate	364
C. Other Racemases	367
D. Epimerases	369
III. [1,2]-Hydrogen Shift	376
A. Aldose-Ketose Isomerases	376
IV. [1,3]-Hydrogen Shift	378
A. Enolization	378
B. Allylic Isomerizations	379
C. Aza-Allylic Isomerizations	387
V. <i>Cis/Trans</i> Isomerizations	390
A. Maleylacetoacetate Isomerase	390
B. Retinol Isomerase	391
C. Catalytic Antibody-Catalyzed <i>Cis/Trans</i> Isomerization	393
VI. Phosphate Isomerization	393
References	395
10 Eliminations and Additions	
I. <i>Anti</i> Eliminations and Additions	399
A. Dehydratases and Hydratases	399
B. Elimination of Phosphate	420
C. Ammonia Lyases: Elimination of Ammonia	424
II. <i>Syn</i> Eliminations and Additions	428
A. Schiff Base Mechanism	428
B. Pyridoxal 5'-Phosphate-Dependent Eliminations	429
C. Pyridoxamine 5'-Phosphate and Iron-Sulfur Cluster-Dependent Reactions	445
D. A Catalytic Antibody-Catalyzed <i>Syn</i> Elimination	448
References	449
11 Aldol and Claisen Reactions and Retroreactions	
I. Aldol Reactions	453
A. General Chemical Considerations	453
B. Aldolases	454

C. Porphobilinogen Synthase (5-Aminolevulinate Dehydratase)	458
D. ATP Citrate-Lyase	464
E. Transketolase	467
F. Dehydroquinase Synthase	468
II. Claisen Reactions	471
A. General	471
B. Thiolase	472
C. Kynureninase	474
References	476

12 *Formylations, Hydroxymethylations, and Methylations*

I. Tetrahydrofolate-Dependent Enzymes: The Transfer of One-Carbon Units	479
A. Formation of the Active Coenzyme	479
B. Transfer of One-Carbon Units	483
II. S-Adenosylmethionine-Dependent Enzymes: The Transfer of Methyl Groups	500
References	502

13 *Rearrangements*

I. Pericyclic Reactions	505
A. Sigmatropic Rearrangements	505
B. Cycloaddition Reactions	511
II. Rearrangements That Proceed via Carbenium Ion Intermediates	516
A. Acyloin Rearrangement	516
B. Cyclizations	518
III. Rearrangements That Proceed via Radical Intermediates	526
A. DNA Photolyase, Formally a [2+2] Cycloreversion Reaction	526
B. Coenzyme B ₁₂ -Dependent and Related Rearrangements	530
IV. Epilogue	554
References	556

Appendix I Enzyme Kinetics 563

I. Substrate Kinetics	563
A. Michaelis-Menten Equation	563
B. Graphical Representations	567
II. Kinetics of Enzyme Inhibition	570
A. Reversible Enzyme Inhibition	570
B. Irreversible Enzyme Inhibition	584
III. Substrate Inhibition	587
IV. Nonproductive Binding	589

V. Competing Substrates	590
VI. Multisubstrate Systems	591
A. Sequential Mechanisms	591
VII. Allosterism and Cooperativity	593
A. General	593
B. Monod-Wyman-Changeux (MWC) Concerted Model	594
C. Koshland-Némethy-Filmer (KNF) Sequential Model	595
General References	596
References	596

Appendix II Problems and Solutions 597

I. Problems	597
A. Chapter 1	597
B. Chapter 2	600
C. Chapter 3	604
D. Chapter 4	605
E. Chapter 5	608
F. Chapter 6	611
G. Chapter 7	613
H. Chapter 8	614
I. Chapter 9	616
J. Chapter 10	617
K. Chapter 11	620
L. Chapter 12	622
M. Chapter 13	623
N. Biosynthetic Pathways	624
II. Solutions to Problems	626
A. Chapter 1	626
B. Chapter 2	631
C. Chapter 3	636
D. Chapter 4	643
E. Chapter 5	650
F. Chapter 6	655
G. Chapter 7	657
H. Chapter 8	662
I. Chapter 9	667
J. Chapter 10	672
K. Chapter 11	681
L. Chapter 12	686
M. Chapter 13	688
N. Biosynthetic Pathways	691
