

CONTENTS

Preface	xiii
About the Companion Website	xvii
1 General Topic and Overview	1
1.1 Introduction / 2	
1.2 Assessing Organic Chemicals in the Environment / 4	
1.3 What is This Book All About? / 7	
1.4 Bibliography / 14	

PART I

Background Knowledge	17
-----------------------------	-----------

2 Background Knowledge on Organic Chemicals	19
2.1 The Makeup of Organic Compounds / 20	
2.2 Intermolecular Forces Between Uncharged Molecules / 37	
2.3 Questions and Problems / 40	
2.4 Bibliography / 43	
3 The Amazing World of Anthropogenic Organic Chemicals	45
3.1 Introduction / 47	
3.2 A Lasting Global Problem: Persistent Organic Pollutants (POPs) / 47	
3.3 Natural but Nevertheless Problematic: Petroleum Hydrocarbons / 48	
3.4 Notorious Air and Groundwater Pollutants: Organic Solvents / 53	
3.5 Safety First: Flame Retardants All Around Us / 56	
3.6 How to Make Materials “Repellent”: Polyfluorinated Chemicals (PFCs) / 58	
3.7 From Washing Machines to Surface Waters: Complexing Agents, Surfactants, Whitening Agents, and Corrosion Inhibitors / 60	
3.8 Health, Well-Being, and Water Pollution: Pharmaceuticals and Personal Care Products / 63	
3.9 Fighting Pests: Herbicides, Insecticides, and Fungicides / 65	
3.10 Our Companion Compounds: Representative Model Chemicals / 69	
3.11 Questions / 72	
3.12 Bibliography / 73	

4	Background Thermodynamics, Equilibrium Partitioning and Acidity Constants	81
4.1	Important Thermodynamic Functions / 83	
4.2	Using Thermodynamic Functions to Quantify Equilibrium Partitioning / 89	
4.3	Organic Acids and Bases I: Acidity Constant and Speciation in Natural Waters / 98	
4.4	Organic Acids and Bases II: Chemical Structure and Acidity Constant / 107	
4.5	Questions and Problems / 116	
4.6	Bibliography / 119	
5	Earth Systems and Compartments	121
5.1	Introduction / 123	
5.2	The Atmosphere / 125	
5.3	Surface Waters and Sediments / 131	
5.4	Soil and Groundwater / 148	
5.5	Biota / 154	
5.6	Questions / 155	
5.7	Bibliography / 158	
6	Environmental Systems: Physical Processes and Mathematical Modeling	165
6.1	Systems and Models / 167	
6.2	Box Models: A Concept for a Simple World / 174	
6.3	When Space Matters: Transport Processes / 191	
6.4	Models in Space and Time / 196	
6.5	Questions and Problems / 203	
6.6	Bibliography / 211	
PART II		
Equilibrium Partitioning in Well-Defined Systems		213
7	Partitioning Between Bulk Phases: General Aspects and Modeling Approaches	215
7.1	Introduction / 216	
7.2	Molecular Interactions Governing Bulk Phase Partitioning of Organic Chemicals / 217	
7.3	Quantitative Approaches to Estimate Bulk Phase Partition Constants/Coefficients: Linear Free Energy Relationships (LFERs) / 225	
7.4	Questions / 232	
7.5	Bibliography / 234	

8	Vapor Pressure (p_i^*)	237
8.1	Introduction and Theoretical Background / 238	
8.2	Molecular Interactions Governing Vapor Pressure and Vapor Pressure Estimation Methods / 246	
8.3	Questions and Problems / 253	
8.4	Bibliography / 257	
9	Solubility (C_{iw}^{sat}) and Activity Coefficient (γ_{iw}^{sat}) in Water; Air–Water Partition Constant (K_{iaw})	259
9.1	Introduction and Thermodynamic Considerations / 261	
9.2	Molecular Interactions Governing the Aqueous Activity Coefficient and the Air–Water Partition Constant / 267	
9.3	LFERs for Estimating Air–Water Partition Constants and Aqueous Activity Coefficients/Aqueous Solubilities / 270	
9.4	Effect of Temperature, Dissolved Salts, and pH on the Aqueous Activity Coefficient/Aqueous Solubility and on the Air–Water Partition Constant / 272	
9.5	Questions and Problems / 282	
9.6	Bibliography / 285	
10	Organic Liquid–Air and Organic Liquid–Water Partitioning	289
10.1	Introduction / 291	
10.2	Thermodynamic Considerations and Comparisons of Different Organic Solvents / 291	
10.3	The Octanol–Water System: The Atom/Fragment Contribution Method for Estimation of the Octanol–Water Partition Constant / 298	
10.4	Partitioning Involving Organic Solvent–Water Mixtures / 301	
10.5	Evaporation and Dissolution of Organic Compounds from Organic Liquid Mixtures–Equilibrium Considerations / 307	
10.6	Questions and Problems / 311	
10.7	Bibliography / 317	
11	Partitioning of Nonionic Organic Compounds Between Well-Defined Surfaces and Air or Water	321
11.1	Introduction / 322	
11.2	Adsorption from Air to Well-Defined Surfaces / 322	
11.3	Adsorption from Water to Inorganic Surfaces / 335	
11.4	Questions and Problems / 342	
11.5	Bibliography / 345	

PART III	
Equilibrium Partitioning in Environmental Systems	349
12 General Introduction to Sorption Processes	351
12.1 Introduction / 352	
12.2 Sorption Isotherms and the Solid–Water Equilibrium Distribution Coefficient (K_{id}) / 354	
12.3 Speciation (Sorbed versus Dissolved or Gaseous), Retardation, and Sedimentation / 360	
12.4 Questions and Problems / 366	
12.5 Bibliography / 368	
13 Sorption from Water to Natural Organic Matter (NOM)	369
13.1 The Structural Diversity of Natural Organic Matter Present in Aquatic and Terrestrial Environments / 371	
13.2 Quantifying Natural Organic Matter–Water Partitioning of Neutral Organic Compounds / 376	
13.3 Sorption of Organic Acids and Bases to Natural Organic Matter / 388	
13.4 Questions and Problems / 392	
13.5 Bibliography / 397	
14 Sorption of Ionic Organic Compounds to Charged Surfaces	405
14.1 Introduction / 407	
14.2 Cation and Anion Exchange Capacities of Solids in Water / 408	
14.3 Ion Exchange: Nonspecific Adsorption of Ionized Organic Chemicals from Aqueous Solutions to Charged Surfaces / 414	
14.4 Surface Complexation: Specific Bonding of Organic Compounds with Solid Phases in Water / 426	
14.5 Questions and Problems / 432	
14.6 Bibliography / 436	
15 Aerosol–Air Partitioning: Dry and Wet Deposition of Organic Pollutants	441
15.1 Origins and Properties of Atmospheric Aerosols / 442	
15.2 Assessing Aerosol–Air Partition Coefficients (K_{IPMa}) / 445	
15.3 Dry and Wet Deposition / 453	
15.4 Questions and Problems / 459	
15.5 Bibliography / 464	
16 Equilibrium Partitioning From Water and Air to Biota	469
16.1 Introduction / 471	
16.2 Predicting Biota–Water and Biota–Air Equilibrium Partitioning / 471	
16.3 Bioaccumulation and Biomagnification in Aquatic Systems / 485	
16.4 Bioaccumulation and Biomagnification in Terrestrial Systems / 498	

- 16.5 Baseline Toxicity (Narcosis) / 503
- 16.6 Questions and Problems / 507
- 16.7 Bibliography / 514

PART IV

Mass Transfer Processes in Environmental Systems 523

- 17 Random Motion, Molecular and Turbulent Diffusivity** 525
 - 17.1 Random Motion / 526
 - 17.2 Molecular Diffusion / 534
 - 17.3 Other Random Transport Processes in the Environment / 545
 - 17.4 Questions and Problems / 550
 - 17.5 Bibliography / 557

- 18 Transport at Boundaries** 559
 - 18.1 The Role of Boundaries in the Environment / 560
 - 18.2 Bottleneck Boundaries / 562
 - 18.3 Wall Boundaries / 567
 - 18.4 Hybrid Boundaries / 572
 - 18.5 Questions and Problems / 577
 - 18.6 Bibliography / 580

- 19 Air–Water Exchange** 581
 - 19.1 The Air–Water Interface / 583
 - 19.2 Air–Water Exchange Models / 585
 - 19.3 Measurement of Air–Water Exchange Velocities / 592
 - 19.4 Air–Water Exchange in Flowing Waters / 599
 - 19.5 Questions and Problems / 604
 - 19.6 Bibliography / 613

- 20 Interfaces Involving Solids** 617
 - 20.1 The Sediment–Water Interface / 618
 - 20.2 Transport in Unsaturated Soil / 626
 - 20.3 Questions and Problems / 630
 - 20.4 Bibliography / 634

PART V

Transformation Processes 635

- 21 Background Knowledge on Transformation Reactions of Organic Pollutants** 637
 - 21.1 Identifying Reactive Sites Within Organic Molecules / 638
 - 21.2 Thermodynamics of Transformation Reactions / 643

21.3	Kinetics of Transformation Reactions / 650	
21.4	Questions and Problems / 657	
21.5	Bibliography / 661	
22	Hydrolysis And Reactions With Other Nucleophiles	663
22.1	Nucleophilic Substitution and Elimination Reactions Involving Primarily Saturated Carbon Atoms / 665	
22.2	Hydrolytic Reactions of Carboxylic and Carbonic Acid Derivatives / 680	
22.3	Enzyme-Catalyzed Hydrolysis Reactions: Hydrolases / 695	
22.4	Questions and Problems / 701	
22.5	Bibliography / 710	
23	Redox Reactions	715
23.1	Introduction / 716	
23.2	Evaluating the Thermodynamics of Redox Reactions / 719	
23.3	Examples of Chemical Redox Reactions in Natural Systems / 730	
23.4	Examples of Enzyme-Catalyzed Redox Reactions / 747	
23.5	Questions and Problems / 756	
23.6	Bibliography / 765	
24	Direct Photolysis in Aquatic Systems	773
24.1	Introduction / 775	
24.2	Some Basic Principles of Photochemistry / 776	
24.3	Light Absorption by Organic Compounds in Natural Waters / 788	
24.4	Quantum Yield and Rate of Direct Photolysis / 800	
24.5	Effects of Solid Sorbents (Particles, Soil Surfaces, Ice) on Direct Photolysis / 803	
24.6	Questions and Problems / 804	
24.7	Bibliography / 811	
25	Indirect Photolysis: Reactions with Photooxidants in Natural Waters and in the Atmosphere	815
25.1	Introduction / 816	
25.2	Indirect Photolysis in Surface Waters / 817	
25.3	Indirect Photolysis in the Atmosphere (Troposphere): Reaction with Hydroxyl Radical (HO [•]) / 829	
25.4	Questions and Problems / 833	
25.5	Bibliography / 838	
26	Biotransformations	845
26.1	Introduction / 847	

26.2	Some Important Concepts about Microorganisms Relevant to Biotransformations / 848	
26.3	Initial Biotransformation Strategies / 858	
26.4	Rates of Biotransformations / 864	
26.5	Questions and Problems / 882	
26.6	Bibliography / 889	
27	Assessing Transformation Processes Using Compound-Specific Isotope Analysis (CSIA)	897
27.1	Introduction, Methodology, and Theoretical Background / 898	
27.2	Using CSIA for Assessing Organic Compound Transformations in Laboratory and Field Systems / 914	
27.3	Questions and Problems / 930	
27.4	Bibliography / 936	
PART VI		
Putting Everything Together		945
<hr/>		
28	Exposure Assessment of Organic Pollutants Using Simple Modeling Approaches	947
28.1	One-Box Model: The Universal Tool for Process Integration / 948	
28.2	Assessing Equilibrium Partitioning in Simple Multimedia Systems / 952	
28.3	Simple Dynamic Systems / 956	
28.4	Systems Driven by Advection / 960	
28.5	Bibliography / 974	
	Appendix	977
	Index	995
