List of Figures	xiii
List of Tables	xvii
Preface	xxi
Acknowledgments	xxiii
List of Abbreviations	xxv
1. Introduction	1
1.1 Introduction	1
1.2 Main Aims of the Book	5
1.3 Guide for the Reader	6
1.4 Concluding Remarks	10
2. Small Area Estimation	11
2.1 Introduction	11
2.2 Small Area Estimation	11
2.2.1 Concept of Small Area	12
2.2.2 Advantages of SAE	12
2.2.3 Why SAE Techniques?	13
2.2.4 Applications of SAE	13
2.3 Approaches to SAE	15
2.4 Direct Estimation	17
2.4.1 H-T Estimator	17
2.4.2 Generalized Regression Estimator	18
2.4.3 Modified Direct Estimator	18
2.4.4 Design-Based Model-Assisted Estimators	19
2.4.5 A Comparison of Direct Estimators	22
2.5 Concluding Remarks	24
3. Indirect Estimation: Statistical Approaches	27
3.1 Introduction	27
3.2 Implicit Models Approach	28
3.2.1 Synthetic Estimation	28
3.2.2 Composite Estimation	29
3.2.3 Demographic Estimation	30
3.2.4 Comparison of Various Implicit Models-Based Indirect Estimation	32
3.3 Explicit Models Approach	33
3.3.1 Basic Area Level Model	33
3.3.2 Basic Unit Level Model	35

3.3.3	Generalized Linear Mixed Model	36
3.3.4	Comparison of Various Explicit Models–Based Indirect Estimation	41
3.4	Methods for Estimating Explicit Models	42
3.4.1	EBLUP Approach	42
3.4.2	EB Approach	43
3.4.3	HB Approach	45
3.4	A Comparison of Three Methods	47
3.5	Concluding Remarks	49
4.	Indirect Estimation: Geographic Approaches	51
4.1	Introduction	51
4.2	Microsimulation Modeling	52
4.2.1	Process of Microsimulation	52
4.2.2	Types of Microsimulation Models	54
4.2.2.1	Static Microsimulation	55
4.2.2.2	Dynamic Microsimulation	57
4.2.2.3	Spatial Microsimulation	59
4.2.3	Advantages of Microsimulation Modeling	68
4.3	Methodologies in Microsimulation Modeling Technology	69
4.3.1	Techniques for Creating Spatial Microdata	69
4.3.2	Statistical Data Matching or Fusion	70
4.3.3	Iterative Proportional Fitting	72
4.3.4	Repeated Weighting Method	74
4.3.5	Reweighting	80
4.4	CO Reweighting Approach	81
4.4.1	Simulated Annealing Method in CO	83
4.4.2	Illustration of CO Process for Hypothetical Data	85
4.5	Reweighting: The GREGWT Approach	87
4.5.1	Theoretical Setting	88
4.5.2	How Does GREGWT Generate New Weights?	90
4.5.3	Explicit Numerical Solution for Hypothetical Data	91
4.6	Comparison between GREGWT and CO	97
4.7	Concluding Remarks	99
5.	Bayesian Prediction–Based Microdata Simulation	101
5.1	Introduction	101
5.2	Basic Steps	102
5.3	Bayesian Prediction Theory	103
5.4	Multivariate Model	103
5.5	Prior and Posterior Distributions	106
5.6	The Linkage Model	109
5.7	Prediction for Modeling Unobserved Population Units	110
5.8	Concluding Remarks	117

6. Microsimulation Modeling Technology for Small Area Estimation.....	119
6.1 Introduction.....	119
6.2 Data Sources and Issues.....	120
6.2.1 Census Data.....	120
6.2.2 Survey Data Sets	122
6.3 Microsimulation Modeling Technology–Based Model Specification.....	124
6.3.1 Model Inputs.....	125
6.3.1.1 General Model File.....	126
6.3.1.2 Unit Record Data Files.....	126
6.3.1.3 Benchmark Files	128
6.3.1.4 Auxiliary Data Files	128
6.3.1.5 GREGWT File.....	132
6.3.2 Generating Small Area Synthetic Weights.....	132
6.3.3 Model Outputs	134
6.4 Housing Stress.....	136
6.4.1 Definition	136
6.4.2 Measures of Housing Stress	136
6.4.3 Comparison of Various Measures	138
6.5 Small Area Estimation of Housing Stress	141
6.5.1 Inputs at the Second-Stage Model	141
6.5.1.1 Consumer Price Index File.....	141
6.5.2 Model Execution Process	142
6.5.3 Final Model Outputs	143
6.6 Concluding Remarks	144
7. Applications of the Methodologies.....	147
7.1 Introduction.....	147
7.2 Results of the Model: A General View.....	147
7.2.1 Model Accuracy Report	147
7.2.2 Scenarios of Housing Stress under Various Measures.....	148
7.2.3 Distribution of Housing Stress Estimation	150
7.2.4 Lorenz Curve for Housing Stress Estimates.....	151
7.2.5 Proportional Cumulative Frequency Graph and Index of Dissimilarity	152
7.2.6 Scenarios of Households and Housing Stress by Tenures	154
7.3 Estimation of Households in Housing Stress by Spatial Scales.....	155
7.3.1 Results for Different States	155
7.3.2 Results for Various Statistical Divisions.....	157
7.3.3 Results for Various Statistical Subdivisions.....	159

7.4	Small Area Estimates: Number of Households in Housing Stress.....	162
7.4.1	Estimated Numbers of Overall Households in Housing Stress.....	165
7.4.2	Estimated Numbers of Buyer Households in Housing Stress.....	166
7.4.3	Estimated Numbers of Public Renter Households in Housing Stress	167
7.4.4	Estimated Numbers of Private Renter Households in Housing Stress	169
7.4.5	Estimated Numbers of Total Renter Households in Housing Stress.....	170
7.5	Small Area Estimates: Percentage of Households in Housing Stress.....	171
7.5.1	Percentage Estimates of Housing Stress for Overall Households	171
7.5.2	Percentage Estimates of Housing Stress for Buyer Households	174
7.5.3	Percentage Estimates of Housing Stress for Public Renter Households	175
7.5.4	Percentage Estimates of Housing Stress for Private Renter Households	176
7.5.5	Percentage Estimates of Housing Stress for Total Renter Households	177
7.6	Concluding Remarks	177
8.	Analysis of Small Area Estimates in Capital Cities	181
8.1	Introduction	181
8.1.1	Scenarios of the Results for Major Capital Cities	182
8.1.2	Trends in Housing Stress for Some Major Cities.....	183
8.1.3	Mapping the Estimates at SLA Levels within Major Cities.....	184
8.2	Sydney.....	186
8.2.1	Housing Stress Estimates for Overall Households.....	186
8.2.2	Small Area Estimation by Households' Tenure Types...	188
8.2.2.1	Estimates for Buyers	188
8.2.2.2	Estimates for Public Renters	188
8.2.2.3	Estimates for Private Renters.....	189
8.2.2.4	Estimates for the Total Renters.....	189
8.3	Melbourne.....	190
8.3.1	Housing Stress Estimates for Overall Households.....	191
8.3.2	Small Area Estimation by Households' Tenure Types....	192
8.3.2.1	Estimates for Buyers	192
8.3.2.2	Estimates for Public Renters	192

	8.3.2.3	Estimates for Private Renters.....	193
	8.3.2.4	Estimates for Total Renters	194
8.4	Brisbane		195
	8.4.1	Housing Stress Estimates for Overall Households.....	196
	8.4.2	Small Area Estimation by Households' Tenure Types....	197
	8.4.2.1	Estimates for Buyers	197
	8.4.2.2	Estimates for Public Renters	197
	8.4.2.3	Estimates for Private Renters.....	198
	8.4.2.4	Estimates for the Total Renters.....	198
8.5	Perth		199
	8.5.1	Housing Stress Estimates for Overall Households.....	200
	8.5.2	Small Area Estimation by Households' Tenure Types....	200
	8.5.2.1	Estimates for Buyers	200
	8.5.2.2	Estimates for Public Renters	201
	8.5.2.3	Estimates for Private Renters.....	202
	8.5.2.4	Estimates for the Total Renters.....	203
8.6	Adelaide.....		204
	8.6.1	Housing Stress Estimates for Overall Households.....	204
	8.6.2	Small Area Estimation by Households' Tenure Types....	205
	8.6.2.1	Estimates for Buyers	205
	8.6.2.2	Estimates for Public Renters	206
	8.6.2.3	Estimates for Private Renters.....	207
	8.6.2.4	Estimates for the Total Renters.....	207
8.7	Canberra.....		208
	8.7.1	Housing Stress Estimates for Overall Households.....	209
	8.7.2	Small Area Estimation by Households' Tenure Types....	210
	8.7.2.1	Estimates for Buyers	210
	8.7.2.2	Estimates for Public Renters	210
	8.7.2.3	Estimates for Private Renters.....	211
	8.7.2.4	Estimates for the Total Renters.....	211
8.8	Hobart.....		212
	8.8.1	Housing Stress Estimates for Overall Households.....	212
	8.8.2	Small Area Estimation by Households' Tenure Types....	213
	8.8.2.1	Estimates for Buyers	213
	8.8.2.2	Estimates for Public Renters	213
	8.8.2.3	Estimates for Private Renters.....	214
	8.8.2.4	Estimates for the Total Renters.....	214
8.9	Darwin.....		215
	8.9.1	Housing Stress Estimates for Overall Households.....	216
	8.9.2	Small Area Estimation by Households' Tenure Types....	217
	8.9.2.1	Estimates for Buyers	217
	8.9.2.2	Estimates for Public Renters	217
	8.9.2.3	Estimates for Private Renters.....	218
	8.9.2.4	Estimates for the Total Renters.....	218
8.10	Concluding Remarks		219

9. Validation and Measure of Statistical Reliability 221

9.1 Introduction 221

9.2 Some Validation Methods in the Literature 222

9.3 New Approaches to Validating Housing Stress Estimation 225

9.3.1 Statistical Significance Test of the MMT Estimates 225

9.3.2 Results of the Statistical Significance Test 228

9.3.3 Absolute Standardized Residual Estimate Analysis 235

9.3.4 Results from the ASRE Analysis 236

9.4 Measure of Statistical Reliability of the MMT Estimates 239

9.4.1 Confidence Interval Estimation 240

9.4.2 Results from the Estimates of Confidence Intervals 242

9.5 Concluding Remarks 246

10. Conclusions and Computing Codes 249

10.1 Introduction 249

10.2 Summary of Major Findings 249

10.3 Limitations 257

10.4 Areas of Further Studies 259

10.5 Computing Codes and Programming 260

10.5.1 The General Model File Codes 260

10.5.2 SAS Programming for Reweighting Algorithms 269

10.5.3 The Second-Stage Program File Codes 283

10.6 Concluding Remarks 294

References 295

Appendix A: The Newton–Raphson Iteration Method 321

Appendix B: Topics Index of the 2005–2006 Survey of Income and Housing: CURFs 325

Appendix C: Tables of the Housing Stress for 50 SLAs with the Highest Numbers and Percentages Estimates 341

Appendix D: Distribution of SLAs, Households, and Housing Stress by SSDs in Eight Major Capital Cities 361

Appendix E: Spatial Analyses by Households Tenure Types for the Eight Capital Cities 365

Appendix F: SAS Programming for the Reweighting Algorithms from Parts 2 to 10 441
