

CONTENTS

<i>Preface</i>	vii
Books for which the Problems are Designed	1
(a) The Handbook of the Fundamentals of Financial Decision Making, Leonard C. MacLean and William T. Ziemba (eds.), (2013)	1
(b) Stochastic Optimization Models in Finance, William T. Ziemba and Raymond G. Vickson (eds.), Editions 1 & 2 (1975, 2006)	11
Section A: Arbitrage and Asset Pricing	33
Appendix A: Fundamentals of Asset Pricing	41
Section A Exercises	48
Section B: Utility Theory	57
Appendix B: Technical Fundamentals for Utility Theory	67
Section B Exercises	70

Section C: Stochastic Dominance	79
Appendix C: Probability and Random Variables	89
Section C Exercises	91
Section D: Risk Aversion and Static Portfolio Theory	103
Appendix D: Optimization	114
Section D Exercises	117
Section E: Risk Measures	131
Appendix E: Risk Assessment	139
Section E Exercises	144
Section F: Dynamic Portfolio Theory and Asset Allocation	149
Appendix F: Dynamic Pricing	160
Section F Exercises	168
<i>About the Authors</i>	195
<i>Index</i>	199
