Preface	xi
Chapter 1. Introduction	1
§1.1. Ulam's Problem: Random Permutations	2
§1.2. Random Tilings of the Aztec Diamond	12
§1.3. General Remarks	14
Chapter 2. Poissonization and De-Poissonization	19
§2.1. Hammersley's Poissonization of Ulam's Problem	19
§2.2. De-Poissonization Lemmas	21
Chapter 3. Permutations and Young Tableaux	27
§3.1. The Robinson-Schensted Correspondence	28
§3.2. The Number of Standard Young Tableaux	49
§3.3. Applications and Equivalent Models	63
Chapter 4. Bounds on the Expected Value of ℓ_N	77
§4.1. Lower Bound	77
§4.2. Existence of c	78
§4.3. Young Diagrams in a Markov Chain and an Optimal Upper Bound	82
§4.4. Asymptotics of the Conjugacy Classes of the Symmetric Group	87

Chapter 5. Orthogonal Polynomials, Riemann-Hilbert Problems, and Toeplitz Matrices	95
§5.1. Orthogonal Polynomials on the Real Line (OPRL)	95
§5.2. Some Classical Orthogonal Polynomials	99
§5.3. The Riemann-Hilbert Problem (RHP) for Orthogonal Polynomials	100
§5.4. Orthogonal Polynomials on the Unit Circle (OPUC) and Toeplitz Matrices	106
§5.5. RHP: Precise Description	111
§5.6. Integrable Operators	118
§5.7. The Strong Szegő Limit Theorem	121
§5.8. Inverses of Large Toeplitz Matrices	130
Chapter 6. Random Matrix Theory	139
§6.1. Unitary Ensembles and the Eigenvalue Density Function	139
§6.2. Andréief's Formula and the Computation of Basic Statistics	142
§6.3. Gap Probabilities and Correlation Functions	146
§6.4. Scaling Limits and Universality	152
§6.5. The Tracy-Widom Distribution Function	157
Chapter 7. Toeplitz Determinant Formula	165
§7.1. First Proof	167
§7.2. Second Proof	169
§7.3. Recurrence Formulae and Differential Equations	170
§7.4. Heuristic Argument for Convergence of the Scaled Distribution for $L(t)$ to the Tracy-Widom Distribution	184
Chapter 8. Fredholm Determinant Formula	187
§8.1. First Proof: Borodin-Okounkov-Geronimo-Case Identity	190
§8.2. Second Proof	200
Chapter 9. Asymptotic Results	207
§9.1. Exponential Upper Tail Estimate	208
§9.2. Exponential Lower Tail Estimate	214
§9.3. Convergence of $L(t)/t$ and ℓ_N/\sqrt{N}	224
§9.4. Central Limit Theorem	226
§9.5. Uniform Tail Estimates and Convergence of Moments	239
§9.6. Transversal Fluctuations	240

Chapter 10. Schur Measure and Directed Last Passage Percolation	253
§10.1. Schur Functions	253
§10.2. RSK and Directed Last Passage Percolation	273
§10.3. Special Cases of Directed Last Passage Percolation	280
§10.4. Gessel's Formula for Schur Measure	290
§10.5. Fredholm Determinant Formula	294
§10.6. Asymptotics of Directed Last Passage Percolation	298
§10.7. Equivalent Models	301
Chapter 11. Determinantal Point Processes	305
Chapter 12. Tiling of the Aztec Diamond	317
§12.1. Nonintersecting Lattice Paths	318
§12.2. Density Function	334
§12.3. Asymptotics	347
Chapter 13. The Dyson Process and the Brownian Dyson Process	377
§13.1. Dyson Process	379
§13.2. Brownian Dyson Process	380
§13.3. Derivation of the Dyson Process and the Brownian Dyson Process	381
§13.4. Noncolliding Property of the Eigenvalues of Matrix Brownian Motion	389
§13.5. Noncolliding Property of the Eigenvalues of the Matrix Ornstein-Uhlenbeck Process	395
§13.6. Nonintersecting Processes	402
Appendix A. Theory of Trace Class Operators and Fredholm Determinants	421
Appendix B. Steepest-descent Method for the Asymptotic Evaluation of Integrals in the Complex Plane	431
Appendix C. Basic Results of Stochastic Calculus	437
Bibliography	445
Index	459
