Acknowledgements — VII

List of figures — XIII

List of tables — XVII

Abbreviations — XIX

- 1 **Constructions in cognitive contexts — 1****
- 1.1 Introduction — 1
- 1.2 Synopsis — 3

- 2 **Setting the theoretical scene — 6****
- 2.1 Linguistic relativity versus (?) usage-based linguistics — 6
- 2.1.1 Linguistic relativity — 6
- 2.1.2 Usage-based cognitive linguistics — 10
- 2.2 Linguistic construal, perceptual attention and the *Degrees of Object-focusedness Scale* — 12
- 2.3 Construal types as analytical tools — 17
- 2.3.1 Windowing of Attention — 18
- 2.3.2 Weighting of Attention — 22

- 3 **Construing spatial scenes in German and English — 27****
- 3.1 Spatial language and spatial referent scenes — 27
- 3.1.1 Functions of spatial language — 27
- 3.1.2 Modelling static spatial scenes for linguistic reference — 29
- 3.2 Search Spaces and static spatial language in German and English — 34
- 3.2.1 Search Spaces I: Topological spaces — 38
- 3.2.2 Search Spaces II: Dimensional spaces — 40
- 3.3 Spatial constructions and *degrees of object-focusedness* construal — 48
- 3.3.1 Transitive non-nominal terms and constructions — 50
- 3.3.2 Nominal terms and constructions — 52
- 3.3.3 Intransitive non-nominal terms and constructions — 64
- 3.3.4 Spatial constructions as [form-*degrees of object-focusedness* construal meaning]-associations: An overview and analytical tool — 76

- 4 Attention, ‘ception’ and language: Basic considerations — 83**
 - 4.1 Construal and cognition — 83
 - 4.2 Attention and selection — 84
 - 4.3 Perception and cognition, or ‘ception’? — 86
 - 4.4 Embodied cognition and language — 89
 - 4.4.1 From specific experiences to perceptual symbols — 91
 - 4.4.2 Perceptual symbols, language and language-cognition relations — 99

- 5 Constructions as [form-construal meaning]-associations — 106**
 - 5.1 Language as a dynamic network of associations — 110
 - 5.2 [Form-construal meaning]-associations: Their formation and establishment — 112
 - 5.2.1 Building [form-construal meaning]-associations — 113
 - 5.2.2 Entrenching [form-construal meaning]-associations — 118
 - 5.3 Two competing theories of construal meaning: Schematicity Theory and Differentiability Theory — 134
 - 5.4 Construal theory and linguistic relativity — 138
 - 5.4.1 Conventionalizing [form-construal meaning]-associations — 139
 - 5.4.2 Micro-conventionalization of construal meanings — 144

- 6 Spatial language, cognition and perception: Methods and hypotheses — 155**
 - 6.1 Construal and language-perception/cognition relations: Methodological considerations — 155
 - 6.2 Linguistic and non-linguistic forms of interaction with spatial scenes: Hypotheses — 157

- 7 Experiment 1 – linguistic interaction with spatial scenes: Patterns of language- and speaker-specific variation — 162**
 - 7.1 German and English spatial language in use I: Previous research — 163
 - 7.2 German and English spatial language in use II: A *director-matcher language game* experiment — 167
 - 7.2.1 Method and procedure — 167
 - 7.2.2 Data — 180
 - 7.2.3 Analytical dimensions and parameters — 190
 - 7.2.4 Analysis 1A: Spatial Construction Types (SCTs) — 193

7.2.5	Analysis 1B: Object-focusedness Degree Values (ODVs) and frequency distributions of Intermediate Level and Specific Level SCTs — 244
7.2.6	Summary and discussion — 271
8	Experiment 2 – linguistic and non-linguistic interaction with spatial scenes: The role of cognitive contexts — 277
8.1	Methodological and theoretical inspirations from previous research — 281
8.2	Hypotheses and general design features — 288
8.3	Describing, viewing and remembering spatial scenes: A <i>visual world eye-tracking</i> experiment — 290
8.3.1	Pre-test and participant recruitment — 291
8.3.2	Main test: Method and procedure — 296
8.3.3	Data, analytical categories and steps of analysis — 307
8.3.4	Analysis 2A: Variable Speakers/contrast-inducing cognitive contexts — 321
8.3.5	Analysis 2B: Consistent Speakers/preference-defined cognitive contexts — 353
8.3.6	Summary and discussion (Analyses 2A and 2B) — 386
8.4	Analysis 2C: Cognitive context as a determinant of processing strategies? Findings from a post hoc analysis — 395
8.4.1	Analysis 2C-1: Patterns of visual attention allocation I (LO-RO Ratio Values) — 396
8.4.2	Analysis 2C-2: Patterns of visual attention allocation II (LO-RO Abs Values) — 400
8.5	Summary and discussion: Main and post hoc findings (Analyses 2A, 2B and 2C) — 404
9	Conclusion: Constructions, cognition, cognitive contexts and beyond — 409
9.1	Summary of findings — 409
9.2	Limitations and perspectives for future research — 412
9.3	Final conclusions — 415
