<b>Summary</b>	<b>ii</b>
<b>Zusammenfassung</b>	<b>iii</b>
<b>List of Figures</b>	<b>viii</b>
<b>List of Tables</b>	<b>x</b>
<b>Abbreviations</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Polyphenols . . . . .	1
1.1.1 Classification of polyphenols . . . . .	2
1.1.2 Non-flavonoids: tannic acid and cynarine . . . . .	5
Tannic acid . . . . .	5
Cynarine . . . . .	7
1.1.3 Flavonoids: EGCG and catechin . . . . .	7
EGCG . . . . .	8
Catechin . . . . .	9
1.1.4 Comparison between thymol and menthol . . . . .	10
Thymol . . . . .	10
Menthol . . . . .	11
1.2 Polyphenols and their interactions with proteins . . . . .	11
1.3 Interaction of polyphenols at cell level . . . . .	13
1.4 Cytoskeleton proteins . . . . .	14
1.4.1 Microtubules . . . . .	15
1.4.2 Actin filaments . . . . .	16

	Polymerization dynamics . . . . .	17
1.5	Muscle proteins . . . . .	19
1.5.1	Myosin . . . . .	19
1.5.2	Mechanism of muscle contraction . . . . .	21
1.6	Cancer chemoprevention and therapy by polyphenols . . . . .	23
1.6.1	Chemopreventive effects of polyphenols . . . . .	23
1.6.2	Chemotherapeutic effects of polyphenols . . . . .	24
1.7	Objectives . . . . .	26
<b>2</b>	<b>Materials and Methods</b>	<b>29</b>
2.1	Materials . . . . .	29
2.1.1	Instruments . . . . .	29
2.1.2	Laboratory materials . . . . .	30
2.1.3	Chemicals . . . . .	30
2.1.4	Buffers and Solutions . . . . .	33
2.2	Methods . . . . .	35
2.2.1	Cytotoxicity in cancer cell lines . . . . .	35
	Preparation of compounds . . . . .	36
	Cancer cell lines . . . . .	36
	Treatment of cells . . . . .	36
2.2.2	Immunofluorescence assay . . . . .	37
	Preparation of compounds . . . . .	37
	Staining of cells . . . . .	37
	Image observation . . . . .	38
2.2.3	Fluorescence imaging of actin-RFP expressed HeLa cells . . . . .	38
	Calculation of RFP reagent . . . . .	39
	Experimental procedure . . . . .	39
2.2.4	Fluorescence imaging of tubulin-GFP expressed U2OS cells . . . . .	40
	Treatment procedure . . . . .	40
2.2.5	<i>In vitro</i> motility assay . . . . .	41

Preparation of flow cell . . . . .	41
Preparation of compounds . . . . .	42
Preparation of buffer solutions . . . . .	42
Preparation of proteins . . . . .	43
Incubation steps for motility assay . . . . .	43
Microscopic observation . . . . .	45
<b>3 Cytotoxicity of polyphenols against human cancer cells</b>	<b>46</b>
3.1 Introduction . . . . .	46
3.2 Materials and methods . . . . .	47
3.2.1 Human cancer cell lines and compounds . . . . .	47
3.2.2 Cytotoxic activity . . . . .	48
3.3 Results . . . . .	48
3.4 Discussion . . . . .	53
<b>4 Interaction of polyphenols with cytoskeleton proteins: actin and microtubules</b>	<b>59</b>
4.1 Introduction . . . . .	59
4.2 Materials and methods . . . . .	61
4.2.1 Human cancer cell lines and compounds . . . . .	61
4.2.2 Immunofluorescence assay . . . . .	62
4.2.3 Fluorescence imaging of actin-RFP expressed HeLa cells . . . . .	62
4.2.4 Fluorescence imaging of tubulin-GFP expressed U2OS cells . . . . .	62
4.3 Results . . . . .	63
4.3.1 Alteration of HeLa cytoskeleton by polyphenols . . . . .	63
4.3.2 Alteration of actin HeLa cells by polyphenols . . . . .	69
4.3.3 Alteration of tubulin U2OS cells by polphenols . . . . .	73
4.4 Discussion . . . . .	77
<b>5 Interaction of polyphenols with muscle proteins: actin and myosin using <i>in vitro</i> motility assay</b>	<b>81</b>

5.1	Introduction . . . . .	81
5.2	Materials and methods . . . . .	84
5.2.1	Preparation of proteins and compounds . . . . .	84
5.2.2	Motility assay procedure . . . . .	84
5.3	Results . . . . .	85
5.3.1	Influence of polyphenols on the sliding velocity . . . . .	85
5.3.2	Influence of polyphenols on the length of actin filaments . . . . .	92
5.4	Discussion . . . . .	100
<b>6</b>	<b>Conclusions</b>	<b>108</b>
	<b>References</b>	<b>117</b>
