## Contents

Abstract \hfill VII

Zusammenfassung \hfill IX

1 Introduction
   1.1 Challenges for Information Retrieval in Heterogeneous Domains \hfill 7
   1.2 Research Questions and Methods \hfill 12
   1.3 About This Work \hfill 15

2 Ontologies in Computer Science
   2.1 Concept Formation \hfill 17
   2.2 Approaches of Ontology Engineering \hfill 19
   2.3 Structuring and Using Ontologies \hfill 21

3 AIRS Knowledge Base
   3.1 Application Context \hfill 26
   3.2 Conceptualization \hfill 28
   3.3 Theory and Inference Rules \hfill 41
   3.4 Summary of AIRSKB Development \hfill 50

4 Ontology-based Retrieval Across Heterogeneous Document Landscapes
   4.1 Concepts of a Heterogeneous Document Landscape \hfill 55
   4.2 Advanced Ontology-based Information Retrieval System (AIRS) \hfill 60
   4.3 Conceptual Architecture of AIRS \hfill 61

5 Indexing and Retrieval for Advanced Ontology-based Information Retrieval
   5.1 Indexing Workflow \hfill 64
   5.2 General Retrieval and Feedback Workflow \hfill 71
   5.3 Related Documents for a Single Search Result \hfill 76
   5.4 Document Search Using Suggest Cluster Algorithm \hfill 77
   5.5 Update Suggest Clusters for Suggest Cluster Algorithm \hfill 81

6 Sharing Knowledge through AIRS
   6.1 Collecting Feedback with the Statistics Component \hfill 86
   6.2 Getting Relevance Judgments \hfill 89
   6.3 Summary \hfill 90

7 Architecture and Functionality of a Prototype Implementation
   7.1 Properties Management Using a Taxonomic Structure \hfill 93
   7.2 AIRS Index & Search Framework \hfill 97
8 Field Tests and Evaluation
8.1 Automotive Workshop Processes ............................................ 115
8.2 AIRS Prototype User Interface ............................................... 116
8.3 Experimental Setup of AIRS Prototype Field Tests .................. 123
8.4 Performing Field Tests Using the AIRS Prototype .................... 124
8.5 Results of Field Tests ............................................................. 127

9 Conclusion and Future Research
9.1 Summary ................................................................................. 135
9.2 Research Opportunities .......................................................... 138

A Appendix
A.1 Questionnaire 1 ................................................................. 141
A.2 Questionnaire 2 ................................................................. 145
A.3 User Tasks ............................................................................. 148

Glossary ..................................................................................... 151

Index ......................................................................................... 156

Bibliography .............................................................................. 158
