

|  |     |
|--|-----|
| <b>Introduction</b>  | 1   |
| <b>1 Kinematics</b>  | 7   |
| 1.1 Material Bodies  | 7   |
| 1.2 Material and Spatial Representation  | 19  |
| 1.3 Deformation Gradient   | 23  |
| 1.4 Strain Tensors   | 32  |
| 1.5 Convective Coordinates   | 38  |
| 1.6 Velocity Gradient  | 42  |
| 1.7 Strain Rate Tensors  | 46  |
| 1.8 Strain Rates in Convective Coordinates   | 50  |
| 1.9 Geometric Linearisation  | 53  |
| 1.10 Incompatible Configurations   | 57  |
| 1.10.1 Euclidean Space   | 58  |
| 1.10.2 Non-Euclidean Spaces  | 63  |
| 1.10.3 Conditions of Compatibility   | 64  |
| <b>2 Balance Relations of Mechanics</b>  | 75  |
| 2.1 Preliminary Remarks  | 75  |
| 2.2 Mass   | 78  |
| 2.2.1 Balance of Mass: Global Form   | 78  |
| 2.2.2 Balance of Mass: Local Form  | 79  |
| 2.3 Linear Momentum and Rotational Momentum  | 84  |
| 2.3.1 Balance of Linear Momentum<br>and Rotational Momentum: Global Formulation      | 84  |
| 2.3.2 Stress Tensors   | 90  |
| 2.3.3 Stress Tensors in Convective Coordinates                                       | 95  |
| 2.3.4 Local Formulation of the Balance<br>of Linear Momentum and Rotational Momentum | 95  |
| 2.3.5 Initial and Boundary Conditions  | 101 |

|          |  |            |
|----------|--|------------|
| 2.4      | Conclusions from the Balance Equations of Mechanics                | 104        |
| 2.4.1    | Balance of Mechanical Energy                                       | 105        |
| 2.4.2    | The Principle of d'Alembert  | 109        |
| 2.4.3    | Principle of Virtual Work  | 114        |
| 2.4.4    | Incremental Form of the Principle of d'Alembert                    | 115        |
| <b>3</b> | <b>Balance Relations of Thermodynamics</b>                         | <b>119</b> |
| 3.1      | Preliminary Remarks  | 119        |
| 3.2      | Energy   | 120        |
| 3.3      | Temperature and Entropy  | 125        |
| 3.4      | Initial and Boundary Conditions                                    | 130        |
| 3.5      | Balance Relations for Open Systems                                 | 132        |
| 3.5.1    | Transport Theorem  | 132        |
| 3.5.2    | Balance of Linear Momentum<br>for Systems with Time-Dependent Mass | 135        |
| 3.5.3    | Balance Relations: Conservation Laws                               | 137        |
| 3.5.4    | Discontinuity Surfaces and Jump Conditions                         | 140        |
| 3.5.5    | Multi-Component Systems (Mixtures)                                 | 144        |
| 3.6      | Summary: Basic Relations of Thermomechanics                        | 153        |
| <b>4</b> | <b>Objectivity</b>   | <b>155</b> |
| 4.1      | Frames of Reference  | 155        |
| 4.2      | Affine Spaces  | 156        |
| 4.3      | Change of Frame: Passive Interpretation                            | 159        |
| 4.4      | Change of Frame: Active Interpretation                             | 162        |
| 4.5      | Objective Quantities   | 164        |
| 4.6      | Observer-Invariant Relations                                       | 171        |
| <b>5</b> | <b>Classical Theories of Continuum Mechanics</b>                   | <b>177</b> |
| 5.1      | Introduction   | 177        |
| 5.2      | Elastic Fluid  | 178        |
| 5.3      | Linear-Viscous Fluid   | 182        |
| 5.4      | Linear-Elastic Solid   | 185        |
| 5.5      | Linear-Viscoelastic Solid  | 188        |
| 5.6      | Perfectly Plastic Solid  | 207        |
| 5.7      | Plasticity with Hardening  | 211        |
| 5.8      | Viscoplasticity with Elastic Range                                 | 224        |
| 5.9      | Remarks on the Classical Theories                                  | 229        |
| <b>6</b> | <b>Experimental Observation and Mathematical Modelling</b>         | <b>231</b> |
| 6.1      | General Aspects  | 231        |
| 6.2      | Information from Experiments                                       | 235        |
| 6.2.1    | Material Properties of Steel XCrNi 18.9                            | 235        |
| 6.2.2    | Material Properties of Carbon-Black-Filled Elastomers              | 243        |
| 6.3      | Four Categories of Material Behaviour                              | 249        |
