

# Table of Contents

**Introduction** vii

## **Part I THE COMPLETE OVERVIEW 1**

<b>Chapter 1</b>	The Very Basics 3
<b>Chapter 2</b>	A Sample Project in Mathematica 11
<b>Chapter 3</b>	Input and Output 21
<b>Chapter 4</b>	Word Processing and Typesetting 43
<b>Chapter 5</b>	Presenting with Slide Shows 59
<b>Chapter 6</b>	Fundamentals of the Wolfram Language 73
<b>Chapter 7</b>	Creating Interactive Models with a Single Command 93
<b>Chapter 8</b>	Sharing Mathematica Notebooks 115
<b>Chapter 9</b>	Finding Help 125

## **Part II EXTENDING KNOWLEDGE 133**

<b>Chapter 10</b>	2D and 3D Graphics 135
<b>Chapter 11</b>	Visualizing Data 157
<b>Chapter 12</b>	Styling and Customizing Graphics 179
<b>Chapter 13</b>	Creating Figures and Diagrams with Graphics Primitives 213
<b>Chapter 14</b>	Algebraic Manipulation and Equation Solving 233
<b>Chapter 15</b>	Calculus 245
<b>Chapter 16</b>	Differential Equations 261
<b>Chapter 17</b>	Linear Algebra 271
<b>Chapter 18</b>	Probability and Statistics 289
<b>Chapter 19</b>	Importing and Exporting Data 305
<b>Chapter 20</b>	Data Filtering and Manipulation 327
<b>Chapter 21</b>	Working with Curated Data 359
<b>Chapter 22</b>	Using Wolfram Alpha Data in Mathematica 393
<b>Chapter 23</b>	Statistical Functionality for Data Analysis 419
<b>Chapter 24</b>	Creating Programs 437
<b>Chapter 25</b>	Creating Parallel and GPU Programs 459
