

CONTENTS

1 ANALYZING TEACHING BEHAVIOR

- The Chain of Classroom Events 1
Purposes and concepts for analyzing teaching behavior 2
- Techniques of Interaction Analysis 5
- Prospects and Problems for Improving Classroom Instruction Through the Use of Interaction Analysis 8
Interaction analysis and teacher education 8 Interaction analysis and inservice education 10 Interaction analysis and research on teaching effectiveness 11
- The Challenge and Tragedy of Current Teaching Practices 12
The current national scene 12 Some early returns from studying classroom interaction 13 Harbingers of our present problems 14 The crux of the matter 16
- The Search for Convictions 19
The inquiry process when behavior is an object of inquiry 19 The commitment to inquiry 22 The sense of urgency 24
- The Task Ahead 27

2 AN INTRODUCTION TO CODING PROCEDURES

- The Pause Before You Leap . . . 28
- What is Classroom Interaction Analysis? 28
- What Are Some Common Applications? 30
Immediate feedback applications 31 Applications which do not involve immediate feedback 32 Summary 33
- A Ten-Category System 33
Purpose and the nature of the category system 35
- The Procedure of Observation 37
- Practice in Distinguishing Categories 39
Category 1 40 Category 2 41 Category 3 42 Category 4 44
Category 5 45 Categories 6 and 7 47 Categories 8 and 9 48 Category 10 50

- Summary and Ground Rules 50
 - Summary 53
- 3 RECORDING AND ELEMENTARY TABULATING PROCEDURES
- Overview 54
 - Three Episodes 54
 - Episode A 56 Episode B 59 Episode C 63 Simple histogram displays 67
 - Formalities and Forms for Observation 73
 - Formalities 73 Forms and materials for classroom observation 74
 - Obtaining More Information by Tabulating Pairs of Entries 75
 - Ten for the price of one 75 Tabulating an interaction analysis matrix 77
 - Adjusting errors due to incorrect matrix tabulation 82 Checking your work on episodes A and B 86
- 4 INTERPRETING 10 × 10 INTERACTION MATRICES
- Decoding in Terms of Models 87
 - Learning to Think of Interaction in Three Ways 88
 - A short question, short answer model 88 A creative inquiry pattern 94
 - Five Steps to Set the Situation for Matrix Interpretation 97
 - How much time is involved? 99 What is the proportion of teacher talk, pupil talk, and silence or confusion? 100 How does the balance of the teacher's response-initiative compare with pupil initiation? 101 How does the teacher react when pupils stop talking? 103 How much emphasis is given to content? How much sustained expression in the same category is present? 105
 - Using Cell Frequencies to Support Theoretical Speculations About Teacher Behavior 106
 - Judging temporal sequence from the matrix 108 The game of blind matrix analysis 111 Drawing a flow chart from a matrix 115
 - The Over-all Process 120
 - The Answers to the Assignments in Chapter Four 121
 - Assignment one 121 Assignment two 121 Assignment three 121
 - Assignment four 122 Assignment five 122 Assignment six 122
 - Assignment seven 122 Assignments eight and nine 122 Assignment ten 123
 - Assignment eleven 123 Assignment twelve 123 Assignment thirteen 123 .
- 5 MULTIPLE CODING BY SUBDIVIDING CATEGORIES
- The Challenge of Flexible Coding 124
 - Relationships Between Purpose and Procedure 125
 - Subscripting Categories 126
 - The procedure of subscripting 127
 - Subscripting the Basic Ten Categories 139
 - A 22-category system: combining process and a cognitive orientation 140

- An 18-category system with cognitive orientation 146 Summary of procedures for subscripting 150
 - The Event and Other Units of Analysis 152
 - The nature of code symbols 152 Combining code symbols for analysis 155
- 6 MULTIPLE CODING WITH CATEGORY CLUSTERS
- Toward An Ideal Feedback Instrument 159
 - Urbach's Interaction Sequence Graph 160
 - Single Event Time Line Displays for FIAC Recording 161
 - Purpose 161 Procedures and conventions 161 Comments on interpretation 163
 - Time Line Displays for Cumulated Intervals 164
 - Choosing time intervals 164 The technique of time line displays for cumulated intervals 164
 - Introduction to Multiple Coding With Category Clusters 168
 - Category clusters and serial order 169 Behavior distinctions for category clusters 171 Strategy in the design of multiple clusters 179
 - An Application of Multiple Coding 183
 - Planning the analysis 184 The category clusters 185 The recording and display of data 188 Interpreting a display to see if it works 189 Field tests of multiple coding systems 193
 - Summary of Multiple Coding and Time-Line Displays 194
- 7 COMPUTER ASSISTED ENCODING AND DECODING
- Escape From Tedium 195
 - Current capabilities of the computer for schools 196 The computer based feedback loop 197
 - Classroom Interaction Analysis and Feedback—1984 200
 - Cumulative Matrix and Single Event Time Line Displays for Computer Feedback 202
 - Selecting the time interval for matrix cumulation 202 Display arrangement 203 Interpretation of the data 204 Substituting histograms for the cluster matrix 206
 - Collapsing the Total Number of Categories Through Computer Transformations 209
 - The general case of three clusters, each a dichotomy 210 Computer transformations to reduce clusters into dichotomous displays 218 Matrix displays based on three simplified dichotomies 219 Transformations from two clusters to one dichotomy 226 Time line displays based on transformed dichotomies 228 Partial transformations 233
 - Summary of Computer Supported Encoding and Decoding 234
 - Achieving computer supported classroom observation 234 The development of category systems and observation training 235 The types of displays which can be used 236

8 ADAPTING INTERACTION ANALYSIS TO T-GROUPS,
SIMULATED SOCIAL SKILL TRAINING, AND MICROTEACHING

- A Critical Look At Feedback 239
- Ideal Conditions for Systematic Feedback 240
- Feedback in T-Groups 241
 - What a T-group is and how it works 242 Typical problems on which T-groups will work 243 The kind of feedback that a T-group provides 243 Expected outcomes of T-group training for teachers 244 Ways that Interaction analysis can be applied to T-groups for teachers 245 The T-group and the improvement of teaching 248
- Simulated Social Skill Training 248
 - What is SSST and how does it work? 249 Problems on which teachers work using SSST 252 The type of feedback that can occur in SSST 255 The expected outcomes of SSST exercises 256 Combining interaction analysis with SSST 257
- Feedback With Microteaching 258
 - What microteaching is and how it works 258 Typical problems on which teachers work in a microteaching clinic 259 The kinds of feedback teachers receive in a microteaching clinic 261 The expected outcomes of microteaching feedback 262 Combining interaction analysis with microteaching 263
- Summary of Applying Interaction Analysis to Other Feedback Techniques 265
 - The T-group 265 Simulated social skill training (SSST) 265 Microteaching 266 Interaction analysis coding with categories 266

9 ELEMENTS OF A CURRICULUM FOR CONTINUING
PROFESSIONAL SELF-DEVELOPMENT

- Starting from the Present 267
 - Review and overview 267 The cognitive and affective domains of inquiry 269
- A General Procedure for Professional Self-Development 272
 - Five steps of the inquiry project 273 Summarizing the steps in a cycle of self-development 279
- Curriculum Elements for Professional Self-Development 280
 - Level one patterns 280 Level two patterns 283 Level three patterns 287
- Reconstructing What Has Been Proposed 305

10 STRATEGIES OF TEACHING WHICH PROMOTE PUPIL
INITIATION

- Concepts For Thinking About Teaching Strategies 308
- Concepts for Describing Four Dimensions of Classroom Interaction 310
 - Goal orientation 311 Authority-in-use 314 Social contacts and range of ideas 315 Sequence and variety 316

- Concepts for Describing Educational Outcomes 317
Content achievement 317 Pupil attitudes 318 Independence-dependence and self-direction 318
- Explaining Variation in Teaching Behavior 319
- Hypotheses About Educational Outcomes 320
Ambiguous goals 321 Clear goal orientation 324 Sequence and variety 325
- Pupil Independence and Cognitive Functioning 331
Research on the cognitive aspects of classroom discourse 331 Sustaining longer thought units 333
- Summary of Concepts for Thinking About Pupil Independence 334

11 HELPING OTHERS CHANGE THEIR TEACHING BEHAVIOR

- Show and Tell in Teaching Teachers 336
Overview 336
- The Change Environment 337
The objectives of professional self-development 337 The density of a change environment 338 Speculations about a high density change environment 340 The ethics of shaping another person's behavior 344 Summary 347
- Research on Change in Teaching Behavior 347
Vexing problems to be faced in conducting research on changing teaching behavior 348 Research on helping others change their teaching behavior 351 Programmed simulation and interaction analysis for college students 357 Training both the cooperating classroom teacher and the student teacher 359 Some effects of the instructor's teaching behavior during inservice programs 360 The effects of sensitivity training laboratories, including T-groups 369 Early returns for minicourses involving microteaching 371
- The Present Status of Helping Another Change His Teaching Behavior 373
What we know about helping others change their teaching behavior 374 Prospects for the future 375

12 RESEARCH ON TEACHING EFFECTIVENESS BASED ON ANALYZING VERBAL INTERACTION IN THE CLASSROOM

- Deciding What is Relevant 376
- Difficulties in Conducting Research on Teaching Effectiveness 377
Measuring learning outcomes 377 Experimental controls 379 Patterns of teaching behavior 383 Sampling problems 385 Some suggestions 387
- Some Research Results on Teaching Effectiveness 389
Projects supervised or directed by the author 389 The results of other researchers who analyzed interaction analysis data and criteria of learning outcomes 402
- Comments on Unresolved Problems 425
Cause and effect during classroom interaction 426
