

# Contents

Introduction	1
Chapter 1. Notation and preliminaries	5
Chapter 2. Rectifiable chains	13
Chapter 3. Lipschitz chains	23
Chapter 4. Flat norm and flat chains	29
Chapter 5. The lower semicontinuity of slicing mass	37
Chapter 6. Supports of flat chains	39
Chapter 7. Flat chains of finite mass	43
Chapter 8. Supports of flat chains of finite mass	53
Chapter 9. Measures defined by flat chains of finite mass	57
Chapter 10. Products	63
Chapter 11. Flat chains in compact metric spaces	67
Chapter 12. Localized topology	71
Chapter 13. Homology and cohomology	81
Chapter 14. $q$ -bounded pairs	89
Chapter 15. Dimension zero	95
Chapter 16. Relation to the Čech cohomology	101
Chapter 17. Locally compact spaces	109
References	113
