Foreword (by Robert C. Merton)	ix
Preface	xi
PART ONE	
Efforts and Opinions	1
CHAPTER 1	
Introduction to Part I	3
CHAPTER 2	
Lifetime Achievement Award (by Dwight Cass)	7
CHAPTER 3	
One-on-One Interview with Oldrich Alfons Vasicek (by Nina Mehta)	13
CHAPTER 4	
Credit Superquant (by Robert Hunter)	21
PART TWO	
Term Structure of Interest Rates	27
CHAPTER 5	
Introduction to Part II	29
CHAPTER 6	
An Equilibrium Characterization of the Term Structure	33
CHAPTER 7	
The Liquidity Premium	45

CHAPTER 8	
Term Structure Modeling Using Exponential Splines (with Gifford Fong)	49
CHAPTER 9	
The Heath, Jarrow, Morton Model	63
PART THREE	
General Equilibrium	65
CHAPTER 10	
Introduction to Part III	67
CHAPTER 11	
The Economics of Interest Rates	71
CHAPTER 12	
General Equilibrium with Heterogeneous Participants and Discrete Consumption Times	89
CHAPTER 13	
Independence of Production and Technology Risks	107
CHAPTER 14	
Risk-Neutral Economy and Zero Price of Risk	111
PART FOUR	
Credit	125
CHAPTER 15	
Introduction to Part IV	127
CHAPTER 16	
Credit Valuation	131
CHAPTER 17	
Probability of Loss on Loan Portfolio	143
CHAPTER 18	
Limiting Loan Loss Probability Distribution	147

CHAPTER 19	
Loan Portfolio Value	149
CHAPTER 20	
The Empirical Test of the Distribution of Loan Portfolio Losses	161
PART FIVE	
Markets, Portfolios, and Securities	163
CHAPTER 21	
Introduction to Part V	165
CHAPTER 22	
The Efficient Market Model (with John A. McQuown)	169
CHAPTER 23	
A Risk Minimizing Strategy for Portfolio Immunization (with Gifford Fong)	195
CHAPTER 24	
The Tradeoff between Return and Risk in Immunized Portfolios (with Gifford Fong)	203
CHAPTER 25	
Bond Performance: Analyzing Sources of Return (with Gifford Fong and Charles J. Pearson)	213
CHAPTER 26	
The Best-Return Strategy	223
CHAPTER 27	
Volatility: Omission Impossible (with Gifford Fong and Daihyun Yoo)	237
CHAPTER 28	
A Multidimensional Framework for Risk Analysis (with Gifford Fong)	247
CHAPTER 29	
Plugging into Electricity (with Hélyette Geman)	261
CHAPTER 30	
Pricing of Energy Derivatives	277

PART SIX	
Probability Theory and Statistics	281
CHAPTER 31	
Introduction to Part VI	283
CHAPTER 32	
A Note on Using Cross-sectional Information in Bayesian Estimation of Security Betas	287
CHAPTER 33	
A Series Expansion for the Bivariate Normal Integral	297
CHAPTER 34	
A Conditional Law of Large Numbers	305
CHAPTER 35	
A Test for Normality Based on Sample Entropy	315
CHAPTER 36	
Monotone Measures of Ergodicity for Markov Chains (with Julian Keilson)	325
CHAPTER 37	
An Inequality for the Variance of Waiting Time under a General Queueing Discipline	333
About the Author	339
Index	341
