Part I Games for Semantics Acquisition

2 State-of-the-Art: Semantics Acquisition and Crowdsourcing 9
2.1 Semantics: Forms and Standards 9
2.2 Semantics in Use. 10
2.2.1 Query-Based Search 11
2.2.2 Exploratory Search 12
2.2.3 Creation is the Harder Part. 13
2.3 Manual (Expert-Based) Approaches 13
2.4 Automated Approaches 15
2.4.1 Entity Recognition, Instance Population. 16
2.4.2 Relationship Discovery and Naming 17
2.4.3 Automated Multimedia Description Acquisition 18
2.5 Crowdsourcing 20
2.5.1 Crowdsourcing Classifications 21
2.5.2 Mechanical Turk. 23
2.5.3 Delicious 24
2.5.4 Wikipedia and DBpedia. 25
2.5.5 Duolingo: A "Gamified" Crowdsourcing. 26
2.5.6 Crowdsourcing Games. 27
2.6 Discussion 27
References 29

3 State-of-the-Art: Semantics Acquisition Games 35
3.1 Image Description Games. 38
3.2 Audio Track Semantics Acquisition Games 39
3.3 Text Annotation Games 41

Semantic Acquisition Games
2014

digitalisiert durch
IDS Basel/Bern, im Auftrag der
Schweizerischen Nationalbibliothek

3.4 Domain Modeling Games . . . 43
3.4.1 Verbosity . . . 43
3.4.2 GuessWhat!? . . . 43
3.4.3 OnToGalaxy . . . 44
3.4.4 Connecting the Ontologies: SpotTheLink . . . 44
3.4.5 Categorilla, Categodzilla and Free Association . . . 45
3.4.6 Akinator . . . 46
3.5 Discussion . . . 46
References . . . 49

4 Little Search Game: Lightweight Domain Modeling . . . 51
4.1 Little Search Game: Player Perspective . . . 51
4.2 Term Relationship Inference . . . 53
4.3 Little Search Game Evaluation . . . 54
4.3.1 Game Deployment . . . 54
4.3.2 Term Network Soundness . . . 55
4.3.3 Ability to Retrieve "Hidden" Relationships . . . 56
4.3.4 Network Relationship Types . . . 57
4.4 The TermBlaster . . . 59
4.4.1 TermBlaster Description . . . 61
4.4.2 TermBlaster Validation . . . 63
4.5 Discussion . . . 64
References . . . 65

5 PexAce: A Method for Image Metadata Acquisition . . . 67
5.1 Description of PexAce . . . 68
5.1.1 Image Tag Extraction . . . 70
5.2 Deployment and Tag Correctness in General Domain . . . 71
5.2.1 Game Deployment: Experimental Dataset Acquisition . . . 71
5.2.2 Experiment: Validation of Annotation Capabilities . . . 71
5.3 PexAce Personal: Personal Imagery Metadata . . . 74
5.4 PexAce Personal: Evaluation . . . 76
5.5 Discussion . . . 79
References . . . 80

6 CityLights: A Method for Music Metadata Validation . . . 81
6.1 CityLights: Method Overview . . . 82
6.1.1 A Music Question Example . . . 82
6.1.2 Validating Individual Tags . . . 84
6.1.3 More on the Game's Features . . . 85
6.1.4 Realization of the CityLights . . . 87
6.2 Experiments: Evaluation of the Metadata Validation Ability . . . 89
6.3 Discussion . . . 91
References . . . 92

Part II Designing the Semantics Acquisition Games

7 State-of-the-Art: Design of the Semantics Acquisition Games 95
7.1 Missing Methodology 96
7.1.1 Game Cloning and Casual Playing 96
7.1.2 Von Ahn's Approach 97
7.1.3 Mechanics, Dynamics and Aesthetics 98
7.1.4 Design Lenses 98
7.2 Aspects of SAG Design 99
7.2.1 Validation of Player Output (Artifacts) 100
7.2.2 Problem Decomposition and Task Difficulty 102
7.2.3 Task Distribution and Player Competences 103
7.2.4 Player Challenges 104
7.2.5 Purpose Encapsulation 106
7.2.6 Cheating and Dishonest Player Behavior 107
7.3 Evaluation of SAGs: Attention, Retention and Throughput 108
7.4 SAG Design at a Glance: Discussion 108
References 115

8 Our SAGs: Design Aspects and Improvements 119
8.1 Little Search Game 119
8.1.1 Player Motivation, Ladder System 120
8.1.2 Cheating Vulnerability and a Posteriori Cheating Detection 121
8.1.3 Evaluating the Appeal to the Player 124
8.2 PexAce 125
8.2.1 Helper Artifacts: A Novel Approach for Artifact Validation 125
8.2.2 Apparent Purpose and Motivation to Play PexAce 126
8.2.3 Player Competences 128
8.2.4 Cheating Vulnerability 132
8.3 CityLights 132
8.3.1 Validation Games 133
8.3.2 Game Aesthetics in CityLights 134
8.3.3 Player Competences Expressed Through Confidence 136
