Contents

1 Patient-Generated EHR Input System Trials: An Analysis of Perceived Benefits Across a Range of Disease Groups .......................... 1
George E. Karagiannis, Lida Tzachani, Bryan R. M. Manning,
Vasileios G. Stamatopoulos, Michael Roughton, Athina A. Lazakidou,
Maria Petridou, Dimitra Iliopoulou and Michael L Rigby

2 Utilizing Semantic Web Technologies in Healthcare ......................... 9
Vassileios D. Kolias, John Stoitsis, Spyretta Golemati and
Konstantina S. Nikita

3 Exploiting Ontology Based Search and EHR Interoperability to Facilitate Clinical Trial Design .................................................. 21
Anastasios Tagaris, Vassiliki Andronikou, Efthymios Chondrogiannis,
George Tsatsaronis, Michael Schroeder, Theodora Varvarigou and
Dionysios-Dimitrios Koutsouris

4 Ontology-Driven Authorization Policies on Personal Health Records for Sustainable Citizen-Centered Healthcare .......................... 43
Mikaela Poulymenopoulou, Flora Malamateniou
and George Vassilacopoulos

5 Privacy-Preserving Access Control for PHR-Based Emergency Medical Systems .............................................................. 61
Vassiliki Koufi, Flora Malamateniou and George Vassilacopoulos

6 Monitoring Patients in a Comorbid Condition with the Aid of Computerized Decision Support System ........................................ 79
Di Lin and Fabrice Labeau

7 Critical Success Factors in the Implementation of Integrated Healthcare Information Systems ....................................................... 103
Anna Paidi and Dimitra Iliopoulou
8 A Preventive Adverse Drug Events System ................................................. 121
Zina Nakhla and Kaouther Nouira

9 Computational Modeling and Simulations in Life Sciences .................. 135
Athina A. Lazakidou, Maria Petridou and Dimitra Iliopoulou

10 Stent Deployment Computer Based Simulations for Health Care Treatment of Diseased Arteries ................................................................. 143
Georgia S. Karanasiou, Evanthia E. Tripoliti, Elazer R. Edelman,
Lampros K. Michalis and Dimitrios I. Fotiadis

11 Development of Collaborative Modular Assembly Micro-Robot Colonies for Use in Natural Orifice Transluminal Endoscopic Surgery: The LABYRINTH Approach ............................................. 169
Dimitra Iliopoulou, Georgios Papantonakis, Alexandros Perrakis,
Athina A. Lazakidou, Maria Petridou, Kostas Giokas,
Nikos Katevas and Dionysios-Dimitrios Koutsouris

12 Impacts of Robotic Assisted Surgery on Hospital’s Strategic Plan: A Social Cost Approach ................................................................. 195
Charalampos Platis, Emmanuel Zoulias and Stelios Zimeras

13 Feature Analysis of Blind Watermarked Electromyogram Signal in Wireless Telemonitoring ................................................................. 205
Nilanjan Dey, Goutami Dey, Sayan Chakraborty and Sheli Sinha Chaudhuri

Index ........................................................................................................ 231
