1	Introduction – Robert J. Coe	1
	Aim of the book	1
	Structure of the book	1
	Chapter features	2
	What's new in the second edition?	2
	Companion website	2
	RT I INTRODUCTION TO RESEARCH METHODS AND METHODOLOGIES IN EDUCATION The nature of educational research – Robert J. Coe	3
_		
	Introduction	5 6
	Dimensions of difference: paradigms?	7
	What is a paradigm? Reconciling the different views	7
	Different aims for educational research	8
	Other ways of classifying different types of educational research	9
	Characteristics of research	10
	How is educational research different from other kinds of research?	11
	Research quality	12
	Questions for further investigation	13
	Suggested further reading	13
	References	13
3	Finding your theoretical position – Michael Waring	15
	Introduction	15
	Ontology, epistemology, methodology and methods	15

	The nature of paradigms: making sense of reality	17
	Conclusion	20
	Questions for further investigation	20
	Suggested further reading	20
	References	20
PA	RT II BASIC PRINCIPLES AND PRACTICE IN CONDUCTING RESEARCH	23
4	Design of empirical research – Larry V. Hedges	25
	Introduction	25
	Problem formulation	25
	Logic of enquiry	26
	Varieties of research designs	27
	Validity considerations	30
	Questions for further investigation	32
	Suggested further reading	32
	References	32
5	Planning your research – Laura Day Ashley	34
	Why is planning important?	34
	Starting to plan early on	34
	Managing your time and resources	40
	The research proposal or plan	41
	Planning as an ongoing activity	42
	Questions for further investigation	42
	Suggested further reading	43
	References	43
6	Inference and interpretation in research – Robert J. Coe	44
	Introduction	44
	Confusion over 'validity'	44
	Interpretation claims	46
	Transfer claims	51
	Questions for further investigation	55
	Suggested further reading	56
	References	56
7	Research ethics – Martyn Hammersley	57
	Introduction	57
	What is ethics?	57
	What is <i>research</i> ethics?	58
	Ethical principles	59
	Ethics in practice	64
	Ethical regulation and ethics committees Conclusion	65
	CONCIUSION	66

	Questions for further investigation	66
	Suggested further reading	66
	References	67
PA	RT III RESEARCH DESIGNS	69
8	Action research – Carol Munn-Giddings	71
	What is action research?	71
	Research design	73
	Example: Stress in the workplace	74
	The methodological approach	74
	Conclusion	75
	Questions for further investigation	75
	Suggested further reading	76
	References	76
9	Naturalistic research – Rob Walker	78
	Naturalistic enquiry	78
	A brief history	78
	Issues in naturalistic enquiry	80
	Methods of naturalistic enquiry	81
	Classic and exemplary cases	81
	Is there a future for naturalistic research?	82
	Questions for further investigation	82
	Suggested further reading	82
	Bibliography	83
10	Ethnographic research – Ghazala Bhatti	85
	Definition and brief history	85
	Research question and paradigmatic location	87
	Methods, data collection and analysis	88
	Conclusion	89
	Questions for further investigation	89
	Suggested further reading	90
	References	90
11	Visual methodologies – Claudia Mitchell	92
	Introduction	92
	Mapping the terrain of visual methodologies	93
	Applying the methods: the Friday Absenteeism Project	95
	Conclusion	96
	Questions for further investigation	97
	Suggested further reading	97
	References	98

12	Grounded theory – Michael Waring	100
	Introduction	100
	(Re)interpretations of grounded theory	100
	Locating yourself as a grounded theorist	101
	What is grounded theory?	101
	The helix model: a framework for enquiry	103
	Theoretical sensitivity	103
	The heart of the matter – coding	103
	Writing a grounded theory	108
	Criticisms of grounded theory	109
	Conclusion	110
	Questions for further investigation	110
	Suggested further reading	111
	References	111
13	Case study research – Laura Day Ashley	114
	What is case study research?	114
	Types of case study and selection of cases	114
	Case study research and validity	115
	Example: Multiple case study of private school outreach in India	116
	Other examples of case study research	119
	Questions for further investigation	120
	Suggested further reading	120
	References	120
14	Secondary data – Emma Smith	122
	Introduction	122
	What is secondary data analysis?	122
	The promises of secondary data analysis	123
	Sources of secondary data	123
	The role of big data in education research	124
	Using secondary data to provide a context for small-scale research	125
	Using secondary data to monitor trends over time	126
	Conclusion	128
	Questions for further investigation	128
	Suggested further reading and resources	128
	References	129
15	Longitudinal research – Anna Vignoles	130
	Longitudinal data and research designs	130
	Data	130
	Longitudinal research designs	130
	Applications of longitudinal research	134
		1)4

	Conclusion Questions for further investigation	136 136
	Suggested further reading and resources References	136 137
16	Statistical and correlational techniques – Stephen Gorard	138
	Introduction	138
	Statistical and correlational research	138
	An example: Correlational research	139
	Questions for further investigation	143
	Suggested further reading	144
	References	144
17	Impact evaluation – Steve Higgins	145
	Introduction	145
	Impact evaluation in education	145
	The 'Embedding ICT' impact evaluation	147
	Evaluation design, aims and methods	147
	Results of the evaluation	149
	Challenges for interpretation from the evaluation design	150
	Conclusion	150
	Questions for further investigation	151
	Suggested further reading	151
	References	152
18	Interventions: experiments – Peter Tymms	153
	Introduction	153
	The kinds of research questions which interventions seek to address	153
	Paradigmatic location	154
	Individual random assignment	156
	Clusters randomly assigned	156
	Questions for further investigation	157
	Suggested further reading	158
	References	158
19	Mixing methods in educational research – Gert Biesta	159
	Introduction	159
	The nature of mixed-methods research	160
	Different mixed designs	161
	An example: The Learning Lives project	162
	Questions for further investigation	163
	Suggested further reading	164
	References	164

20	Systematic reviews – Carole Torgerson, Jill Hall and Kate Lewis-Light	166
	Overview	166
	Introduction	166 168
	Undertaking a systematic review	108
	Conclusion	178
	Questions for further investigation	178
	Suggested further reading	179
	References	1/)
PA	RT IV DATA COLLECTION TOOLS	181
21	In-depth interviews – Carolyn L. Mears	183
	Introduction	183
	Interviewing: It's more than questions and answers	183
	Conducting the interview	185
	Challenges and dispositions	186
	Standards	187
	Conclusion	188
	Questions for further investigation	188
	Suggested further reading	189
	References	189
22	Focus groups and group interviews – Anita Gibbs	190
