FOREWORD	v
PREFACE	vii
I. WHAT IT MEANS TO "UNDERSTAND" A CHILD	1
Early Cumulative Records	3
"Understanding" a Child	8
Teachers Changed during the Study	12
Purpose of This Report	18
Summary	19
II. LEARNING TO DESCRIBE BEHAVIOR	21
Record Analysis by a Psychologist	22
Observing Particular Children	27
Four Types of Anecdote	32
Choosing Incidents to Describe	36
Some Excellent Anecdotes	38
Summary	40
III. SEEING THE CHILD AS A MEMBER OF A FAMILY	42
Planning Home Visits	44
How the Plans Worked Out	48
The nature of first visits; parental concerns and hopes for the child; parental techniques for managing children; personal relationships in the home; the family's way of life; the impact of family events; working with fathers	
Summary	65
IV. HELP FROM A PSYCHOLOGIST	67
Some Essential Tasks in a Child-Study Program	68
The Plan of Work	71
The Case of Christopher	72
Anecdotal record; reaction of the consultant	
The Case of Isabelle	76
Anecdotal record; reaction of the consultant	
The Case of Juanita	85
Anecdotal record; reaction of the consultant	

The Case of Emory	93
Anecdotal record; Emory's home situation; reaction of the consultant	
Summary	101
V. LEARNING SOME EXPLANATORY PRINCIPLES	103
The Transition from Childhood to Adolescence	105
The Effects of Cultural Factors	108
The Need for Affection	110
A Study of Fantasy	114
The teacher's records; the group discussions; follow-up study by the teacher	
Summary	129
VI. GROUP MEETINGS AS A STUDY METHOD	131
The General Procedure	131
The Value of Group Meetings	133
The Case of Nicholas	135
Background statement; anecdotal record; discussion of Nicholas; the hypotheses of selected teachers	
The Case of Maxwell	148
Personality characteristics; basic attitudes and traits; the child in his home situation; interpersonal relationships in school; early childhood development; anecdotes; discussion of Maxwell; hypotheses of selected teachers	
Summary	164
VII. LOOKING FOR PATTERNS	166
The Case of Lawrence	167
Lawrence's first four months at school; anecdotal record; Larry's relations with others	
Variations in Interpretation	185
Essential Steps in Interpretation	188
Identifying Recurring Patterns of Behavior	194
The Case of Frank	198
Observations, September and October; anecdotal record; supplementary information; excerpts from Frank's cumulative record	
Looking for Patterns	223
The child as a physical being; the child's rela-	

relationship with others; the child as an individual personality	
Summary	226
VIII. STUDYING A PERSONALITY THROUGH TIME	227
The Case of Sam	230
Sam in the fifth grade; first stocktaking; Sam in the sixth grade; second stocktaking; Sam in the seventh grade; supplementary information; look- ing back over three years with Sam	
Summary and Conclusions	270
IX. STUDYING THE INTERACTION OF CHILDREN IN GROUPS: PART ONE	275
The Child Society in the Classroom	275
How the child society develops; common pat- terns of relationship and interaction; the child's striving to "belong"; the child society and the teacher	
A Teacher Studies a Child Society	281
Six Girls in Third Grade	282
Rhoda; Emily; Lurline; Lenora; Tess; Agnes; initial characterizations	
Sociometric Analysis Gives New Perspective	294
Giving the friendship test; interpreting the friendship sociogram; the work-companion socio- gram	
First Efforts to Observe Social Dynamics	305
Comparisons with Third-Grade Anecdotes	311
Summary	314
X. STUDYING THE INTERACTION OF CHILDREN IN GROUPS: PART TWO	316
The Second Set of Tests	316
Disappearance of ingroups A and B; consist- encies with the September sociogram; the roles of individuals	
The Teacher Studies Agnes	326
Agnes' home and family; Agnes at school (fourth grade); hypotheses about Agnes	
Further Study of Group Dynamics	341
Excerpts from the anecdotal record; some of the	

	hypotheses confirmed; Rhoda demonstrates how groups are organized	
	Teacher Growth through Such Study of Groups . . .	355
	Gaining new perspective; learning to appreciate significant detail; perceiving complex combinations of factors	
	Factors Influencing the Study of Groups . . .	361
XI.	TEACHERS AND ADMINISTRATORS EVALUATE THE STUDY	364
	Nature of the Evaluation	364
	Two Representative Evaluations	365
	Analysis of Evaluative Statements	372
	Each child is different; stage of development influences behavior; family situations influence children; social class influences behavior; the child society influences behavior; changed attitudes toward problem behavior; changed attitudes toward individual children	
	New Ways of Dealing with Children	382
	Adapting the school to the child; reclassifying children; helping children with problems	
	Changes in Emotional Climate	390
	Schools run more smoothly; increased friendliness; more freedom and spontaneity	
	Appraisal of the Study Procedure	397
	Summary	399
XII.	CONDUCTING A PROGRAM OF CHILD STUDY	401
	The Background	402
	Affiliation with the Cooperative Study	406
	Launching the study program; extending the study program	
	Practical Problems Met by the Study Groups	412
	Selecting children for intensive study; deciding what to record about a child; developing skill in gathering facts; interpreting accumulated information	
	Using Organizing Frameworks	426
	A framework for scientific knowledge; a framework for information about a child	

Two Blind Alleys	433
Keeping anecdotal records on all pupils; studying methods of handling problems	
Factors that Influenced Morale	437
Factors relating to study procedures; anxiety and insecurity; other factors	
Selecting, Training, and Using Leaders	446
Conditioning attitudes; roles of local leaders; special assistance	
Summary	453
XIII. WHAT EXPERIENCE HAS TAUGHT US	454
Deterrents to Learning and Adjustment	455
Needed Knowledge, Skills, and Values	460
Leads from the Commission's Experience	466
