## *Prologue*

Plutarch and the history of science: the case of <i>Quaestiones naturales</i>	15
1. Plato, Plutarch and scientific infancy	18
2. Date and chronology of <i>Quaestiones naturales</i> : a 'life's work'?	24
3. The value of Plutarch's natural problems	30
4. Classical philology and the petrification of science	46
5. <i>Status quaestionis</i>	51
6. Note on translations and abbreviations	53

## *Introduction*

I. Problems, problems, problems (and Aristotelian precedents)	61
1.1. <i>Quaestiones naturales</i> and the Aristotelian genre and tradition of natural problems	61
1. Preliminary remarks on Plutarch's <i>Naturwissenschaft</i>	61
2. <i>Quaestiones naturales</i> : the work of a <i>Plutarchus Aristotelicus</i> ?	67
3. The genre of problems and the Aristotelian tradition of natural problems	75
4. Internal organisation of Plutarch's natural problems (microstructure)	84
5. Coherent reading in <i>Quaestiones naturales</i> and <i>convivales</i> (macrostructure)	92
6. The title and its programmatic value	102
1.2. Problems related to Plutarch's scientific discourse	110
1. Trifles unworthy of Plutarch? Some remarks on authenticity	110
2. The rhetoric of scientific discourse according to Plutarch	112
3. The problem of style	117
4. The problem of morality	119

5. A 'generic' solution	127
6. Conclusion and new questions	129
2. The position of <i>Quaestiones naturales</i> in the <i>corpus Plutarcheum</i>	131
2.1. Scientific traits in the <i>corpus Plutarcheum</i>	131
1. Intellectual and literary interest of natural phenomena	132
2. Cluster analysis in <i>Quaestiones naturales</i>	138
3. Scientific digressions in the <i>Vitae</i>	141
4. Indirect references to <i>Quaestiones naturales</i>	148
2.2. A comparative study of <i>Quaestiones naturales</i> and <i>Quaestiones convivales</i>	150
1. The level of <i>elocutio</i>	151
2. The level of <i>dispositio</i>	156
3. The level of <i>inventio</i>	159
2.3. Hypomnematic text genetics of <i>Quaestiones naturales</i> and <i>Quaestiones convivales</i>	161
1. Historicity and fiction in <i>Quaestiones convivales</i>	162
2. Problems and personal notes	165
3. Zetetic autonomy in <i>Quaestiones naturales</i>	173
2.4. Opening up Plutarch's zetetic archive	177
1. The issue of publication: problems as functional literature	177
2. Classification and overlap	182
3. Conclusion and new questions	184
3. <i>Quaestiones naturales</i> and zetetic <i>παιδεία</i>	187
3.1. <i>Sitz im Leben</i> : readership and educational context	187
1. Natural problems and philosophical σχολή	188
2. Plutarch's academy	190
3. Digestive discussions and problematic promenades	195
4. <i>Quaestiones naturales</i> as school text: technicality and complexity	204
5. The dialogue between author and reader: vivacity and historicity	212
3.2. <i>Quaestiones naturales</i> as a preamble to metaphysics	219
1. Natural problems as a means of exercising the mind	219
2. Natural problems as a means of easing the mind	225
3. Conclusion and new questions	232
4. Plutarch's Platonic world view: the aetiological design of <i>Quaestiones naturales</i> and its scientific context	235
4.1. Science and its foes? The ancient scientific value of	

<i>Quaestiones naturales</i>	235
4.1.1. Saving popular beliefs: the wonders and paradoxes of nature	235
1. Natural problems and the fabric of strangeness	237
2. Democritus and the cucumber	244
3. Plutarch's popular beliefs: anti-Aristotelian and anti-Stoic dynamics	248
4.1.2. Plutarch's dualistic causality: rationalising the divine and the use of myth and poetry	258
1. Plato's scientific revolution	258
2. Science, religion and mythology	264
3. Science and poetry	274
4.2. Constructing scientific authority: between continuity, ingenuity and innovation	278
4.2.1. Character and use of the scientific tradition	279
1. Quotations from scientific prose authors	279
2. Problematisation of scientific knowledge	288
4.2.2. Scientific innovation and performance	291
1. A note on the sociology of knowledge and <i>παιδεία</i>	291
2. The pragmatics of Plutarch's scientific ingenuity and creativity	293
4.3. Plutarch's scientific methodology: a rough guide to explaining natural phenomena	299
4.3.1. Material principles and natural processes	299
1. Material principles	301
2. Natural processes	306
4.3.2. Towards the limits of natural science	312
1. A 'sceptical' Plutarch: <i>ἐμπειρία, ἐποχή</i> and <i>εὐλάβεια</i>	313
2. Truth and probability in <i>Quaestiones naturales</i>	321
3. Sense perception and the issue of autopsy in <i>Quaestiones naturales</i>	328
4.3.3. Logical-rhetorical dynamics	339
1. Contradiction, non-contradiction and aetiological freedom	340
2. Aetiological comprehensiveness and pluricausality	345
3. Aetiological subtlety and sophistication	349
4.3.4. Uniformity and technicality of the scientific terminology	354
1. Let's talk science: the birth and use of technical vocabulary	355

2. Big words? High-tech vs. low-tech vocabulary	359
3. Conclusion: Plutarch, Plato and Aristotle (again)	362

### *Commentary*

0. Approach and structure	367
1. Salt and water ( <i>Q.N.</i> 1–13)	368
2. Wheat and barley ( <i>Q.N.</i> 14–16)	420
3. Sea animals and fishing ( <i>Q.N.</i> 17–19)	425
4. Land animals and hunting ( <i>Q.N.</i> 20–28)	437
5. Viniculture ( <i>Q.N.</i> 30–31)	464
6. Longolius ( <i>Q.N.</i> 32–39)	469
7. Psellus ( <i>Q.N.</i> 40–41)	487
