Preface to the Third Edition	vii
Preface to the Second Edition	ix
Preface to the First Edition	xi
Chapter 1 Inverse Problems	1
1.1 The Inverse Problem of Gravimetry	1
1.2 The Inverse Conductivity Problem	6
1.3 Inverse Scattering	8
1.4 Tomography and the Inverse Seismic Problem	12
1.5 Inverse Spectral Problems	16
Chapter 2 Ill-Posed Problems and Regularization	23
2.1 Well- and Ill-Posed Problems	23
2.2 Conditional Correctness: Regularization	27
2.3 Construction of Regularizers	30
2.4 Convergence of Regularization Algorithms	37
2.5 Iterative Algorithms	42
Chapter 3 Uniqueness and Stability in the Cauchy Problem	47
3.1 The Backward Parabolic Equation	48
3.2 General Carleman Estimates and the Cauchy Problem	58
3.3 Elliptic and Parabolic Equations	65
3.4 Hyperbolic and Schrödinger Equations	73
3.5 Systems of Partial Differential Equations	95
3.6 Open Problems	101

Chapter 4	Elliptic Equations: Single Boundary Measurements	105
	4.0 Results on Elliptic Boundary Value Problems	105
	4.1 Inverse Gravimetry	108
	4.2 Reconstruction of Lower-Order Terms	114
	4.3 The Inverse Conductivity Problem	119
	4.4 Methods of the Theory of One Complex Variable	130
	4.5 Linearization of the Coefficient Problem	135
	4.6 Some Problems of Detection of Defects	139
	4.7 Open Problems	146
Chapter 5	Elliptic Equations: Many Boundary Measurements	149
	5.0 The Dirichlet-to-Neumann Map and the Cauchy Set	149
	5.1 Boundary Reconstruction	154
	5.2 Completeness of Products of Solutions of PDE	159
	5.3 Uniqueness and Stability in Ω	165
	5.4 Recovery of Several Coefficients	172
	5.5 The Plane Case	178
	5.6 Nonlinear Equations	186
	5.7 Transmission Problems	193
	5.8 Maxwell's and Elasticity Systems	202
	5.9 Open Problems	208
Chapter 6	Scattering Problems and Stationary Waves	211
	6.0 Direct Scattering	211
	6.1 From \mathcal{A} to Near Field	214
	6.2 The Inverse Source Problem with Many Wave Numbers	222
	6.3 Scattering by a Medium	225
	6.4 Scattering by Obstacles	231
	6.5 Open Problems	238
Chapter 7	Integral Geometry and Tomography	241
	7.1 The Radon Transform and its Inverse	241
	7.2 The Energy Integral Methods	251
	7.3 Boman's Counterexample	255
	7.4 The Transport Equation	259
	7.5 Open Problems	266
Chapter 8	Hyperbolic Problems	269
	8.0 Introduction	269
	8.1 The One-Dimensional Case	273
	8.2 Single Boundary Measurements	281
	8.3 Many Measurements: The Use of Beam Solutions	290

8.4	Many measurements: Methods of Boundary Control	296
8.5	Recovery of Discontinuity of the Speed of Propagation	303
8.6	Open Problems	307
Chapter 9	Inverse Parabolic Problems	309
9.0	Introduction	309
9.1	Final Overdetermination	313
9.2	Lateral Overdetermination: Single Measurements	319
9.3	The Inverse Problem of Option Pricing	325
9.4	Lateral Overdetermination: Many Measurements	331
9.5	Discontinuous Principal Coefficient and Recovery of a Domain	335
9.6	Nonlinear Equations	345
9.7	Interior Sources	350
9.8	Open Problems	352
Chapter 10	Some Numerical Methods	355
10.1	Numerics for the Cauchy Problem	356
10.2	Linearization	362
10.3	Relaxation Methods	367
10.4	Layer Stripping	370
10.5	Range Test Algorithms	373
10.6	Discrete Methods	377
	Appendix. Function Spaces	381
	References	385
	Index	405
