CONTENTS

PREFACE xvii

PART ONE BACKGROUND

1 **Work** 3
Overview
Introduction 3
Towards a definition. Personality and employment role. Functions of work.
Work down the centuries: an historical analysis 9
The Greeks. The Hebrews. The early Christians. The Christians of the Middle Ages. The Protestant ethic. Karl Marx and alienation. Scientific management. The Hawthorne view. The contemporary scene. Conclusion.
Analysing work roles 18
A clarification of terms. The purposes of job analysis. Methods of job analysis. Glacier concepts.
Work, job analysis, and change 26
References 27

PART TWO GUIDANCE AND SELECTION

2 **Personality** 31
Overview
Introduction 31
Informal and general theories 32
Economic man. Social man. Self-actualizing man.
Formal theories of personality 35
The concept of personality. Characteristics of personality theories. Holistic and trait theories. A Holistic theory of personality: A. H. Maslow. G. W. Allport: a theory of personal dispositions and common traits. Trait theory, factor analysis, and R. B. Cattell. Types of traits. The trait

approach in guidance and selection. Predictive and construct validity.
References 58

3 **Human Abilities** 59
Introduction and overview
Faculty psychology 60
Theory. Practical applications for occupational guidance and personnel selection.
Correlation and factor analysis 62
Spearman's two-factor theory 68
Theory. Practical applications for occupational guidance and personnel selection.
Hierarchical group factor theory 72
Group factors. Basic theory. Major and minor group factors. General points. Abilities and work. Practical applications for occupational guidance and personnel selection.
Primary mental abilities 81
Theory. Practical applications for occupational guidance and personnel selection.
Guilford's structure-of-intellect model 86
Theory. Practical applications for occupational guidance and personnel selection.
References 90

4 **Human Motivation** 91
Overview
Introduction 91
Interaction within personality. Interaction between personality and the environment.
Motives and needs 93
Introduction. The concept of general drive. Needs and functions. The work of Anne Roe. The assessment of motives and needs.
Motivational traits 100
Introduction. Attitudes, values, and interests. Trait-elements and the actuarial method. The relationship of trait-elements within the personality. Temperamental and dynamic traits (personal dispositions, source traits, common traits), and work. Values and work. Interests and work.
Conclusion 117

Personality and occupation. Schemes for analysing the individual and work.
References 122

5 **Techniques of Personality Assessment and Measurement** 125
Introduction 125
Reliability and validity. Overview, and four general points.
Assessment plans 129
The seven-point plan. Munro Fraser's five categories. Conclusion.
The interview 134
Introduction. Reliability. Validity. The useful interview.
Tests of ability 144
Testing
Interest inventories 146
The Kuder preference record (vocational). Conclusion.
Value questionnaires 151
The study of values. Conclusion.
Application forms 155
References 158

6 **Occupational Guidance and Vocational Counselling** 160
Overview
Occupational guidance 160
A case study. Occupational guidance—a trait appraisal of people and jobs. An experiment in guidance. The theory and practice of occupational guidance.
Vocational counselling 169
Holism and the whole person. A case study. The whole person and a decision on work. The concept of self. Life stages, work, and continuous counselling. Non-directive counselling and the growth of self. The developmental method and work. Vocational counselling in practice.
Conclusion 178
References 180

7 **Personnel Selection** 181
Introduction 181
Overview. Theory in selection.
A study in selection 182
Background information. The investigation. Causes of failure in the job. The new procedure. Discussion.

A selection procedure 185
A second study in selection 186
Introduction. Selection in the small organization, and synthetic validity. The study.
Criteria in selection 189
Introduction. The criteria for criteria.
Selection and the organization 192
The individual and his environment. Selection criteria and organizational goals.
Explanation in selection 194
Non-linear relationships in selection. Explaining non-linear relationships. Explanation and construct validity in selection.
References 200

PART THREE TRAINING

8 **The Organization and Training** 203
Overview
A framework for considering the training of the individual in the organization 203
The channels of training 206
Policy 207
The technology of training 209
A procedure for developing a training procedure. Explanation. A second procedure for developing a training procedure.
Motivation of the individual 216
Compliance. Identification. Internalization. A model of motivation and learning in an organization.
References 224

9 **Learning Theory** 225
Introduction 225
Definitions. Overview.
Connectionist theories 226
E. L. Thorndike (1874–1949). E. R. Guthrie (1886–1959): Contiguous conditioning. The anti-theory of B. F. Skinner.
A connectionist model for skills training 236
Cue. Force. Prompt. Reinforcement.
Cognitive theories 239
Learning in Gestalt psychology. Tolman's purposive behaviourism.

Proposals for a cognitive model of management and supervisory education and training 246
Schemes and strategies. Schemes and strategies as a basis for management and supervisory training.
References 249

10 **Factors in Learning** 250
Overview
Knowledge of results 250
Introduction. Some studies. Knowledge of results as a prompt. Conclusion.
Guidance 255
Introduction. Some studies. Conclusion.
Practice 259
Introduction. Speed and accuracy; whole and part. Massed versus distributed practice. Activity learning. Conclusion.
Sequence and order of material 264
Motivation 266
Transfer of training 267
Understanding 271
Conclusion 272
References 274

11 **Induction** 276
Overview
Introduction 276
Induction, socialization, and the group 277
Induction, socialization, and morale 279
Induction, socialization, and the nature of management influence 280
References 285

12 **Supervisory and Management Training and Development** 286
Overview
Introduction 287
Approaches to supervisory training 291
Common-skills supervisory training 293
A human relations training programme. Common-skills training and effective job performance.
Supervisory training based on job analysis 297
Analysis of the overall system. Organizational solutions to

supervisory problems. Job description and task analysis. Specification of knowledge and skill requirements. Determining the capabilities of trainees. Statement of training requirements. Development of appropriate training methods. Training course evaluation.

Management training and development 304

Introduction. Training for role 1. Role 2. Management development. Training and development.

Methods 308

Lecture. Seminar. Case Study. Project. T-Groups. Role-playing. A connectionist evaluation of methods. A cognitive evaluation of methods.

References 319

13 **Training in Skills** 320

Overview

Introduction 320

Skill training and the connectionist tradition

Skills analysis 322

T. F. Gilbert's mathetics 326

The process of mathetics. Retrogression through the basic exercise model. Conclusion.

References 334

14 **Conclusion Work Problems** 335

Overview

Introduction 336

Alloys Ltd, a case study. Guidance, selection, and training.

Alternative units of analysis and other approaches 340

An integration of approaches 342

Solving work problems. The repercussions of selection and training in the organization.

A framework for considering alternative approaches 347

The socio-technical system. Open systems. Goals of the organization. The framework.
