

# Table of contents

<b>Acknowledgements</b>	ii
<b>Table of contents</b>	iii
<b>1. Rapid prototyping</b>	<b>1</b>
1.1. Rapid tooling	5
1.2. Rapid manufacturing	6
1.3. Laser melting systems	8
References	11
<b>2. Laser sintering machine Phenix PM 100</b>	<b>13</b>
Summary	18
References	19
<b>3. Powder characterization</b>	<b>20</b>
3.1. Characterization of powder particles	22
3.2. Granulometric analysis of powders	25
3.3. Apparent density of powders	27
3.4. Tap density of powders	29
3.5. Powder flowability	30
3.6. Characteristics of employed powders	32
3.7. Powder layer deposition	40
Summary	43
List of symbols	45
References	46
<b>4. Physics and modelling of selective laser melting</b>	<b>49</b>
4.1. Thermal processes in the interaction zone	50
4.2. Absorption, reflection, radiation transfer	52
4.3. Heat transfer by conduction	62
4.4. Heat and mass transfer during laser heating	73
4.5. Evaporation and emission of material	87
4.6. Modelling of laser sintering and melting of powder	91
4.7. Numerical modelling of laser–substrate interaction (without powder)	92
4.8. Numerical modelling of laser–powder interaction	106
Summary	116
List of symbols	118
References	119
<b>5. Formation of single vector of the first layer</b>	<b>132</b>
5.1. Stainless steel powders	133
5.2. Copper-nickel alloy powders	143
5.3. Influence of the powder layer thickness on the single vector formation	147
5.4. Factor analysis of SLM parameters	156
Summary	162
List of symbols	163
References	164
<b>6. Balling process during SLS/SLM</b>	<b>166</b>
Summary	175
List of symbols	176
References	177

<b>7. 2D plane objects manufactured by SLM</b>	<b>178</b>
7.1. Influence of vector shifting on the formation of the first layer	178
7.2. Laser radiation parameters and formation of multilayer structures	183
Summary	191
List of symbols	192
References	193
<b>8. 3D objects fabricated by SLM</b>	<b>194</b>
8.1. Objects with fine structure	194
8.2. Strategy of manufacturing objects with engineered internal structure	199
8.3. Mechanical properties of the manufactured samples	205
Summary	221
References	223
<b>9. Net shape objects</b>	<b>226</b>
Summary	237
References	239
<b>10. General conclusions</b>	<b>240</b>
<b>Appendix 1. The Rapid Prototyping Patents</b>	<b>244</b>
<b>Appendix 2. Powder particle characteristics</b>	<b>253</b>
