

Table of Contents

Preface	ix
Abbreviations	xix
Alder ene reaction	1
Aldol condensation	3
Algar–Flynn–Oyamada reaction	6
Allan–Robinson reaction	8
Arndt–Eistert homologation	10
Baeyer–Villiger oxidation	12
Baker–Venkataraman rearrangement	14
Bamford–Stevens reaction	16
Baran reagents	18
Barbier reaction	21
Bargellini reaction	23
Bartoli indole synthesis	24
Barton radical decarboxylation	26
Barton–McCombie deoxygenation	28
Barton nitrite photolysis	30
Barton–Zard reaction	32
Batcho–Leimgruber indole synthesis	34
Baylis–Hillman reaction	36
Beckmann rearrangement	39
Abnormal Beckmann rearrangement	40
Beirut reaction	42
Benzilic acid rearrangement	44
Benzoin condensation	46
Bergman cyclization	48
Biginelli reaction	50
Birch reduction	52
Bischler–Möhlau indole synthesis	54

Bischler–Napieralski reaction	56
Blaise reaction	58
Blum–Ittah aziridine synthesis	60
Boekelheide reaction	62
Boger pyridine synthesis	64
Borch reductive amination	66
Borsche–Drechsel cyclization	68
Boulton–Katritzky rearrangement.....	70
Bouveault aldehyde synthesis	72
Bouveault–Blanc reduction	74
Boyland–Sims oxidation	75
Elbs oxidation.....	76
Bradsher reaction.....	77
Brook rearrangement.....	79
Brown hydroboration	81
Bucherer carbazole synthesis	83
Bucherer reaction	85
Bucherer–Bergs reaction	87
Büchner ring expansion.....	89
Buchwald–Hartwig amination	91
Burgess reagent	95
Burke boronates.....	97
Cadiot–Chodkiewicz coupling.....	100
Cadogan–Sundberg indole synthesis.....	102
Camps quinoline synthesis	104
Cannizzaro reaction.....	106
Carroll rearrangement	108
Castro–Stephens coupling.....	110
C–H activation	112
Catellani reaction.....	112
Sanford reaction	115
White catalyst	117
Yu C–H activation	121
Chan alkyne reduction.....	123
Chan–Lam C–X coupling reaction.....	125
Chapman rearrangement	128
Chichibabin pyridine synthesis	130
Chugaev elimination	133
Ciamician–Dennsted rearrangement	135
Claisen condensation.....	136
Claisen isoxazole synthesis	138
Claisen rearrangements	140
<i>para</i> -Claisen rearrangement.....	142
Abnormal Claisen rearrangement	144

Eschenmoser–Claisen amide acetal rearrangement	146
Ireland–Claisen (silyl ketene acetal) rearrangement	148
Johnson–Claisen (orthoester) rearrangement	150
Clemmensen reduction	153
Combes quinoline synthesis	155
Conrad–Limpach reaction	157
Cope elimination reaction	159
Cope rearrangement	161
Anionic oxy-Cope rearrangement	163
Oxy-Cope rearrangement	164
Siloxy-Cope rearrangement.....	166
Corey–Bakshi–Shibata (CBS) reagent	168
Corey–Chaykovsky reaction	171
Corey–Fuchs reaction.....	174
Corey–Kim oxidation.....	176
Corey–Nicolaou macrolactonization.....	178
Corey–Seebach reaction.....	180
Corey–Winter olefin synthesis	182
Criegee glycol cleavage.....	185
Criegee mechanism of ozonolysis.....	187
Curtius rearrangement	188
Dakin oxidation	190
Dakin–West reaction	192
Danheiser annulation.....	194
Darzens condensation.....	196
Delépine amine synthesis	198
de Mayo reaction.....	200
Demjanov rearrangement	202
Tiffeneau–Demjanov rearrangement.....	203
Dess–Martin periodinane oxidation	206
Dieckmann condensation	209
Diels–Alder reaction.....	211
Inverse electronic demand Diels–Alder reaction	213
Hetero-Diels–Alder reaction	215
Dienone–phenol rearrangement	217
Doebner quinoline synthesis	219
Doebner–von Miller reaction	221
Dötz reaction	223
Dowd–Beckwith ring expansion	225
Dudley reagent	227
Erlenmeyer–Plöchl azlactone synthesis	229
Eschenmoser’s salt	231
Eschenmoser–Tanabe fragmentation	233
Eschweiler–Clarke reductive alkylation of amines.....	235

Evans aldol reaction	237
Favorskii rearrangement.....	239
Quasi-Favorskii rearrangement.....	242
Feist-Bénary furan synthesis	243
Ferrier carbocyclization.....	245
Ferrier glycal allylic rearrangement	247
Fiesselmann thiophene synthesis	250
Fischer-Speier esterification.....	252
Fischer indole synthesis	253
Fischer oxazole synthesis.....	255
Fleming-Kumada oxidation.....	257
Tamao-Kumada oxidation.....	259
Friedel-Crafts reaction.....	260
Friedel-Crafts acylation reaction	260
Friedel-Crafts alkylation reaction.....	262
Friedländer quinoline synthesis.....	264
Fries rearrangement.....	266
Fukuyama amine synthesis	268
Fukuyama reduction.....	270
Gabriel synthesis	272
Ing-Manske procedure.....	273
Gabriel-Colman rearrangement	275
Gassman indole synthesis	276
Gattermann-Koch reaction	278
Gewald aminothiophene synthesis.....	279
Glaser coupling	282
Eglinton coupling	284
Gomberg-Bachmann reaction.....	287
Gould-Jacobs reaction	289
Grignard reaction.....	291
Grob fragmentation	293
Guareschi-Thorpe condensation.....	295
Hajos-Wiechert reaction	297
Haller-Bauer reaction	299
Hantzsch dihydropyridine synthesis	300
Hantzsch pyrrole synthesis.....	302
Heck reaction.....	304
Heteroaryl Heck reaction	307
Hegedus indole synthesis	309
Hell-Volhard-Zelinsky reaction.....	310
Henry nitroaldol reaction	312
Hinsberg synthesis of thiophenes.....	314
Hiyama cross-coupling reaction.....	316
Hofmann elimination.....	318

Hofmann rearrangement.....	319
Hofmann–Löffler–Freitag reaction	321
Horner–Wadsworth–Emmons reaction	323
Houben–Hoesch reaction	325
Hunsdiecker–Borodin reaction.....	327
Jacobsen–Katsuki epoxidation	329
Japp–Klingemann hydrazone synthesis	331
Jones oxidation	333
Collins oxidation	335
PCC oxidation	336
PDC oxidation	337
Julia–Kocienski olefination.....	338
Julia–Lythgoe olefination.....	340
Kahne glycosidation	342
Knoevenagel condensation.....	344
Knorr pyrazole synthesis	347
Koch–Haaf carbonylation.....	349
Koenig–Knorr glycosidation	350
Kostanecki reaction	353
Kröhnke pyridine synthesis	354
Krapcho reaction	356
Kumada cross-coupling reaction	357
Lawesson’s reagent	360
Leuckart–Wallach reaction.....	362
Li A ³ reaction	364
Lossen rearrangement.....	367
McFadyen–Stevens reduction	369
McMurry coupling	370
MacMillan catalyst	372
Mannich reaction	374
Markovnikov’s rule	376
Anti-Markovnikov	377
Martin’s sulfurane dehydrating reagent	379
Masamune–Roush conditions for the Horner–Emmons reaction	382
Meerwein’s salt	384
Meerwein–Ponndorf–Verley reduction.....	386
Meisenheimer complex	388
[1,2]-Meisenheimer rearrangement.....	390
[2,3]-Meisenheimer rearrangement.....	391
Meyers oxazoline method	393
Meyer–Schuster rearrangement.....	395
Michael addition.....	397
Michaelis–Arbuzov phosphonate synthesis	399
Midland reduction	401

Minisci reaction.....	403
Mislow–Evans rearrangement.....	405
Mitsunobu reaction.....	407
Miyaura borylation.....	409
Moffatt oxidation.....	411
Morgan–Walls reaction.....	413
Pictet–Hubert reaction.....	413
Mori–Ban indole synthesis.....	415
Mukaiyama aldol reaction.....	417
Mukaiyama Michael addition.....	419
Mukaiyama reagent.....	421
Myers–Saito cyclization.....	423
Nazarov cyclization.....	424
Neber rearrangement.....	426
Nef reaction.....	428
Negishi cross-coupling reaction.....	430
Nenitzescu indole synthesis.....	432
Newman–Kwart rearrangement.....	434
Nicholas reaction.....	436
Nicolaou IBX dehydrogenation.....	438
Noyori asymmetric hydrogenation.....	440
Nozaki–Hiyama–Kishi reaction.....	443
Nysted reagent.....	445
Oppenauer oxidation.....	447
Overman rearrangement.....	449
Paal thiophene synthesis.....	451
Paal–Knorr furan synthesis.....	452
Paal–Knorr pyrrole synthesis.....	454
Parham cyclization.....	456
Passerini reaction.....	458
Paternó–Büchi reaction.....	460
Pauson–Khand reaction.....	462
Payne rearrangement.....	464
Pechmann coumarin synthesis.....	466
Perkin reaction.....	468
Perkow vinyl phosphate synthesis.....	470
Petasis reaction.....	472
Petasis reagent.....	474
Peterson olefination.....	476
Pictet–Gams isoquinoline synthesis.....	478
Pictet–Spengler tetrahydroisoquinoline synthesis.....	480
Pinacol rearrangement.....	482
Pinner reaction.....	484
Polonovski reaction.....	486

Polonovski–Potier reaction.....	488
Pomeranz–Fritsch reaction.....	490
Schlittler–Müller modification.....	492
Pavorov reaction.....	493
Prévost <i>trans</i> -dihydroxylation.....	495
Prins reaction.....	496
Pschorr cyclization.....	499
Pummerer rearrangement.....	501
Ramberg–Bäcklund reaction.....	503
Reformatsky reaction.....	505
Regitz diazo synthesis.....	507
Reimer–Tiemann reaction.....	509
Reissert reaction.....	510
Reissert indole synthesis.....	512
Ring-closing metathesis (RCM).....	514
Ritter reaction.....	517
Robinson annulation.....	519
Robinson–Gabriel synthesis.....	521
Robinson–Schöpf reaction.....	523
Rosenmund reduction.....	525
Rubottom oxidation.....	527
Rupe rearrangement.....	529
Saegusa oxidation.....	531
Sakurai allylation reaction.....	533
Sandmeyer reaction.....	535
Schiemann reaction.....	537
Schmidt rearrangement.....	539
Schmidt’s trichloroacetimidate glycosidation.....	541
Scholl reaction.....	543
Shapiro reaction.....	544
Sharpless asymmetric amino hydroxylation.....	546
Sharpless asymmetric dihydroxylation.....	549
Sharpless asymmetric epoxidation.....	552
Sharpless olefin synthesis.....	555
Shi asymmetric epoxidation.....	557
Simmons–Smith reaction.....	560
Skraup quinoline synthesis.....	562
Smiles rearrangement.....	564
Truce–Smile rearrangement.....	566
Sommelet reaction.....	568
Sommelet–Hauser rearrangement.....	570
Sonogashira reaction.....	572
Staudinger ketene cycloaddition.....	574
Staudinger reduction.....	576

Stetter reaction.....	578
Stevens rearrangement	580
Still–Gennari phosphonate reaction	582
Stille coupling	584
Stille–Kelly reaction.....	586
Stobbe condensation.....	587
Stork–Danheiser transposition	589
Strecker amino acid synthesis	591
Suzuki–Miyaura coupling	593
Swern oxidation.....	595
Takai reaction.....	597
Tebbe reagent	599
TEMPO oxidation	601
Thorpe–Ziegler reaction.....	603
Tsuji–Trost reaction	605
Ugi reaction.....	608
Ullmann coupling.....	611
van Leusen oxazole synthesis	613
Vilsmeier–Haack reaction.....	615
Vinylcyclopropane–cyclopentene rearrangement.....	617
von Braun reaction	619
Wacker oxidation	620
Wagner–Meerwein rearrangement.....	622
Weiss–Cook condensation	624
Wharton reaction.....	626
Williamson ether synthesis	628
Willgerodt–Kindler reaction	629
Wittig reaction.....	632
Schlosser modification of the Wittig reaction.....	634
[1,2]-Wittig rearrangement	636
[2,3]-Wittig rearrangement	638
Wohl–Ziegler reaction.....	640
Wolff rearrangement	642
Wolff–Kishner reduction	644
Woodward <i>cis</i> -dihydroxylation.....	646
Yamaguchi esterification	648
Zaitsev’s elimination rule.....	650
Zhang enyne cycloisomerization	652
Zimmerman rearrangement.....	654
Zincke reaction.....	656
Zinin benzidine (semidine) rearrangement	659
Index.....	661
