

Contents

Preface	ix
1. The Consequences of Computerization: Opportunities and Risks	1
1. Employment and job structure	1
2. Some reflections on the organization of work	4
3. Work content	9
4. Leadership and the role of leaders	14
5. Communication and computerization	17
6. Some aspects of equality	18
7. Considering the future	18
2. Computer Technology and Its Development	20
1. Phases in the development of computer technology	20
2. Computer technology and the future	22
3. Telematics	24
3. A Research Project on the Psychosocial Aspects of Computerization	27
1. Background and purpose	27
2. Problems	28
3. Methods	29
4. Theoretical models and concepts	31
5. Concluding remarks	38
4. Experiences from Company 1: The Postal Giro Centre	40
1. Computerization in the Postal Giro Centre	40
2. Research design and methods	43
3. Summary of results	49
4. The variables in the study	51
5. Additional problems	53
6. Findings: Analyses of the psychosocial work environment	55
7. Findings: Analyses of the effects of computerization	56
8. Action taken	58

5. Experiences from Company 2: The Trygg-Hansa Insurance Company	66
1. Computerization at Trygg-Hansa	66
2. Research design and methods	71
3. Results	77
4. A summary of the results	106
5. Female and male personnel: Comparisons	109
6. Follow-up interviews	120
6. An Electronics Company: The Changing Role of Secretaries Using Word Processing Systems	136
1. Introduction	136
2. Changes in the content of secretarial work	137
3. Changes in communication patterns	140
4. Has the professional role changed?	143
5. The effects on private life/family life and leisure time	144
6. Conclusions	144
7. Computerization and Stress	146
1. What is stress?	146
2. Stress and the 'paper office'	150
3. Stress and the batch-processing environment	150
4. Stress and display terminals	153
5. VDT work, work loads and psychological strain	155
6. What did we lose and what did we gain when display terminals were introduced?	158
7. Conclusions	159
8. The Impact of the Psychosocial Work Environment on Leisure, Family and Health	162
1. Introduction	162
2. Findings	165
3. Conclusions	174
9. Actions on Computers and the Work Environment	176
1. The national level	176
2. The individual level: Its importance	187
3. The psychosocial work environment: Requirements and preferences	188
4. Action at the corporate level	191
5. Roles	198

10. Future Research	208
1. Important areas for research	208
2. Research on computer technology, working life, general life conditions	211
3. Views on research strategies	213
4. Some personal reflections on the problems of research	214
Appendix 1. The main content of the indices	217
Appendix 2. Reports and books from the RAM Project	225
Appendix 3. A sample checklist for evaluating the working environment of computer systems, both planned and in use	228
Appendix 4. Changes in working life—Research priorities	233
Appendix 5. Labour Relations in Sweden	234
References	245
Index	251
