Preface	7
-------------------	---

Abbreviations, symbols and country indicators	12
---	----

PART I.

GENERAL PARASITOLOGY	15
---------------------------------------	-----------

1. Parasite-host relationships	16	1.4 Parasite-host relationships	21
1.1 Parasitism and other interspecific relationships	16	1.4.1 Host-finding	21
1.2 Parasites and their properties	17	1.4.2 Infection and infestation	22
1.2.1 Origin of the term 'parasite'	17	1.4.3 Development of parasites in or on a host	22
1.2.2 Medically important groups of parasites	17	1.4.4 Pathogenicity, virulence and adverse effects of parasites	24
1.2.3 Nomenclature, taxonomy and systematics of parasites	17	1.5 Immunology of parasitoses	25
1.2.4 Evolution of parasitism	18	1.5.1 Innate and adaptive immunity	25
1.2.5 Genes and genomes of parasites	19	1.5.2 Parasite antigens	30
1.2.6 Categories of parasites	19	1.5.3 Immune effector mechanisms against parasites	30
1.2.7 Properties of parasites	19	1.5.4 Immune evasion strategies of parasites	36
1.3 Hosts and their properties	20	1.5.5 Immunopathology of parasitic infections	39
		1.6 Parasitoses: general aspects	40

PART II.

PARASITES AND PARASITOSEs: PROTOZOA	43
--	-----------

Protozoa	44
---------------------------	-----------

2. Phylum Metamonada	47	5.2 Class Haematozoa	127
2.1 Class Treponadea	47	5.2.1 Order Haemosporida	127
2.1.1 Order Diplomonadida	47	Family Plasmodiidae	127
Family Hexamitidae	47	5.2.2 Order Piroplasmida	129
		Family Babesiidae	129
3. Phylum Parabasala	52	Family Theileriidae	140
3.1 Class Trichomonadea	52	Subphylum Ciliophora	147
3.1.1 Order Trichomonadida	52	5.3 Classes Litostomatea and Oligohymenophorea	147
Family Monocercomonadidae	52	5.3.1 Orders Vestibuliferida and others	147
Family Trichomonadidae	54	Family Balantidiidae	147
		Family Pycnotrichidae	149
4. Phylum Euglenozoa	59	Families Ichthyophthiriidae and Chilodonellidae	149
Subphylum Kinetoplasta	59	5.3.2 Orders Sessilida and Mobilida	150
4.1 Class Kinetoplastea	59	Families Epistylidae and Trichodinidae	150
4.1.1 Order Trypanosomatida	59		
Family Trypanosomatidae	59	6. Phyla Amoebozoa and Percolozoa: amoebae	151
4.1.2 Order Bodonida	78	6.1 Classes Entamoebidea, Lobosea and Heterolobosea	151
Family Bodonidae	78	6.1.1 Order Entamoebida	151
		Family Entamoebidae	151
5. Phylum Alveolata	79	6.1.2 Order Centramoebida and other orders	153
Subphylum Apicomplexa	79	Family Acanthamoebidae and other families	153
5.1 Class Coccidea	79		
5.1.1 Order Adeleida	81	7. Phylum Microsporidia (syn. Microspora)	155
Family Hepatozoidae	81	7.1 Class Microsporea	155
Further families of the order Adeleida	82	7.1.1 Order Microsporida	155
5.1.2 Order Eimeriida	82	Family Nosematidae	157
Family Eimeriidae	82	Family Pleistophoridae	160
Family Sarcocystidae	98		
5.1.3 Order Cryptosporida	122		
Family Cryptosporidiidae	122		

PART III.

PARASITES AND PARASITOSEs: METAZOA			163
8. Phylum Myxozoa	164	8.1.2 Order Malacovalvulida	167
8.1 Classes Myxosporea and Malacosporea	164	8.1.3 Order Multivalvulida	168
8.1.1 Order Bivalvulida	165		
Helminths			169
9. Phylum Platyhelminthes (flatworms)	173	Family Molineidae	302
■ Subphylum Trematoda (flukes)	173	Families Amidostomatidae and Ornithostrongylidae	303
9.1 Class Digenea	173	Family Dictyocaulidae	303
9.1.1 Order Echinostomida	175	■ Superfamily Metastrongyloidea	312
Family Fasciolidae	175	Family Metastrongylidae	312
Family Echinostomatidae	186	Family Protostrongylidae	313
9.1.2 Order Amphistomida	188	Family Crenosomatidae	318
Family Paramphistomidae	189	Family Angiostrongylidae	320
9.1.3 Order Plagiorchiida	191	Family Filaroididae	324
Family Dicrocoeliidae	191	10.1.3 Order Ascaridida	326
9.1.4 Order Opisthorchiida	197	■ Superfamily Ascaridoidea	326
Family Opisthorchiidae	197	Family Ascarididae	327
Family Heterophyidae	199	Family Anisakidae	339
9.1.5 Order Strigeatida	200	■ Superfamily Heterakoidea	341
Family Strigeidae	200	Family Heterakidae	341
Family Diplostomidae	200	Family Ascaridiidae	342
Family Schistosomatidae	201	10.1.4 Order Oxyurida	343
9.2 Class Monogenea	205	Family Oxyuridae	343
9.3 Class Cestoda	206	10.1.5 Order Spirurida	346
Subclass Eucestoda	206	■ Suborder Camallanina	346
9.3.1 Order Pseudophyllida	208	■ Suborder Spirurina	346
Family Diphylobothriidae	208	■ Superfamily Thelazioidea	346
9.3.2 Order Cyclophyllida	212	Family Thelaziidae	346
Family Mesocestoididae	213	■ Superfamily Spiruroidea	349
Family Anoplocephalidae	215	Family Spirocercidae	349
Families Davaineidae, Dilepididae and		■ Superfamily Habronematoidea	349
Hymenolepididae	220	Family Habronematidae	349
Family Dipylidiidae	222	■ Superfamily Filarioidea	352
Family Taeniidae	224	Family Filariidae	353
		Family Onchocercidae	357
10. Phylum Nematoda (syn. Nematozoa)	254	10.2 Class Adenophorea (Aphasmdia)	368
(threadworms or roundworms)	254	10.2.1 Order Enoplida	368
10.1 Class Secernentea	258	■ Superfamily Trichinelloidea	368
10.1.1 Order Rhabditida	258	Family Trichuridae	368
Family Strongyloididae	259	Family Trichinellidae	376
Families Rhabditidae and Cephalobidae	263	■ Superfamily Diectophymatoidea	383
10.1.2 Order Strongylida	264	Family Diectophymatidae	383
■ Superfamily Strongyloidea	264		
Family Strongylidae	264	11. Phylum Acanthocephala (thorny-	
Family Chabertiidae	275	headed or spiny-headed worms)	384
Family Syngamidae	278		
■ Superfamily Ancylostomatoidea	280	12. Phylum Annelida (segmented worms)	387
Family Ancylostomatidae	280		
■ Superfamily Trichostrongyloidea	287	13. Phylum Pentastomida (incertae sedis)	
Family Trichostrongylidae	287	(so-called tongue worms)	389

14. Phylum Arthropoda (arthropods)	392	Family Psoroptidae	435
■ Subphylum Amandibulata	395	Family Sarcoptidae	442
14.1 Class Arachnida	395	Other families of the order Astigmata	448
Subclass Acari (mites s.l.)	395	■ Subphylum Mandibulata	449
14.1.1 Order Metastigmata (Ixodida, ticks)	396	14.2 Class Crustacea (crustaceans)	449
Family Ixodidae	399	14.3 Class Insecta (insects)	449
Family Argasidae	415	14.3.1 Order Blattaria (cockroaches)	449
■ Subfamily Ornithodorinae	418	14.3.2 Order Phthiraptera	450
14.1.2 Order Mesostigmata (syn. Gamasida)	420	14.3.3 Order Heteroptera (true bugs)	457
Family Dermanyssidae	420	14.3.4 Order Coleoptera (beetles)	457
Family Macronyssidae	422	14.3.5 Order Diptera (flies)	458
Family Halarachnidae	423	■ Suborder Nematocera ('thread-horn flies')	458
Family Rhinonyssidae	424	Family Culicidae	459
Family Laelaptidae	424	Family Psychodidae	463
Family Varroidae	424	Family Simuliidae	465
14.1.3 Order Prostigmata (syn. Trombidiformes)	426	Family Ceratopogonidae	469
Family Demodicidae	426	■ Suborder Brachycera ('short-horn flies')	472
Family Cheyletiellidae	430	Family Tabanidae	472
Family Syringophilidae	431	Family Braulidae and Drosophilidae	474
Family Trombiculidae	431	Family Muscidae and Fanniidae	475
Family Psorergatidae	433	Family Glossinidae	481
Family Myobiidae	433	Families Calliphoridae and Sarcophagidae	483
Family Pyemotidae	433	Family Oestridae	489
Family Tarsonemidae	434	Family Hippoboscidae	498
14.1.4 Order Astigmata (Sarcoptiformes)	435	14.3.6 Order Siphonaptera (fleas)	500

PART IV.

ZOONOSSES AND PARASITES IN FOOD 507

15. Zoonoses and parasites in food	508
15.1 Zoonoses	508
15.2 Parasites in food	515

PART V.

DIAGNOSTICS 519

16. Diagnostics	520	16.1.7 Examination of environmental samples	536
16.1 Laboratory procedures	520	16.1.8 Preservation of helminths and arthropods	536
16.1.1 Introduction	520	16.2 Diagnostic plates	538
16.1.2 Diagnostic samples	521	16.2.1 Ruminants	538
16.1.3 Diagnostic laboratories	521	16.2.2 Equidae	544
16.1.4 Procedures for intravital parasite detection	521	16.2.3 Pig	547
16.1.5 Methods for post mortem parasite detection	533	16.2.4 Dog and cat	548
16.1.6 Hints for microscopic identification of parasite stages	536	16.2.5 Poultry	551
		16.2.6 Characteristics of tick genera	552

PART VI.

PRINCIPLES OF THERAPY AND CONTROL OF PARASITOSSES 555

17. Therapy	556	18. Control	566
17.1 Categories of therapy	556	18.1 Control methods	566
17.2 Antiparasitic drugs	556	18.1.1 Technical and operational control methods	566
17.2.1 Use of antiparasitics	557	18.1.2 Legal and regulatory measures	566
17.2.2 Chemical groups of antiparasitic drugs	557	18.1.3 Physical measures	566
17.3 Drug resistance	563	18.1.4 Use of antiparasitics	566
		18.1.5 Biological parasite control	566
		18.1.6 Immunological control of parasites	567
		18.1.7 Sterilisation and disinfection	571
		18.2 Control strategies	572

PART VII.

PARASITOSSES OF DIFFERENT ANIMAL SPECIES AND ORGAN SYSTEMS, ANTIPARASITIC DRUGS AND STRATEGIC CONTROL 575

19. Parasitoses of different animal species and organ systems, antiparasitic drugs and strategic control	576	19.4.1 Parasitoses of organ systems, antiparasitics and vaccines	597
19.1 Parasitoses of cattle, sheep and goats	576	19.4.2 Strategic control of important parasitoses of dogs and cats	599
19.1.1 Parasitoses of organ systems and antiparasitics	576	19.4.3 Parasitoses and companion animal travel	606
19.1.2 Strategic control of important parasitoses of cattle	576	19.5 Parasitoses of rabbits	607
19.1.3 Strategic control of important parasitoses of sheep and goats	584	19.6 Parasitoses of poultry	608
19.2 Parasitoses of pigs	587	19.6.1 Parasitoses of organ systems, antiparasitics and vaccines	608
19.2.1 Parasitoses of organ systems and antiparasitics	587	19.6.2 Strategic control of important parasitoses of poultry	610
19.2.2 Strategic control of important parasitoses of pigs	587	19.7 Parasitoses of the honey bee	612
19.3 Parasitoses of horses	590		
19.3.1 Parasitoses of organ systems and antiparasitics	590	20. Trade names of antiparasitics and vaccines	615
19.3.2 Strategic control of important parasitoses of the horse	590	Antiparasitics (endo-, ecto- and endectoparasitics)	615
19.3.3 Export and import of horses	597	Vaccines	617
19.4 Parasitoses of dogs and cats	597		

PART VIII.

APPENDIX 619

21. Glossary 620

22. Graphics and sources of pictures 633

23. Index 634
