Introduction: Logical Structure and Linguistic Variation	1
1. Objectives	1
2. Preliminaries	2
3. The Logical Structure Controversy	3
4. The Problem of Linguistic Variation	4
4.1 The Unified-Analysis Approach	6
4.2 Data Collection	7
4.2.1 The Informant	7
4.2.2 The Interview	8
4.2.3 Reliability and Validity	9
5. Plan of the Book	11
Chapter 1: The Underlying Structure of Pre-Determiner Quantifiers	13
1. Introduction	13
2. A Counter-Example to the Usual Analysis	14
3. A Second Counter-Example	16
3.1 <i>Not</i> -Transportation	16
3.2 Negatives and Quantifiers	17
3.3 Quantifiers under <i>Not</i> -Transportation: an Asymmetry	19
3.4 Possible Solutions	19
3.4.1 Possible Solution I: Change Negation	20
3.4.2 Possible Solution II: Quantifiers from a Higher Sentence	22
3.5 A Side Excursion: The NT Argument in a More Powerful Model	25
4. Internal Structure of the Higher S	26
4.1 Relative Clause Structure	27
4.2 Quantifiers as Verbs	28
5. Independent Motivation	31
Chapter 2: The Underlying Structure of Post-Determiner Quantifiers	35
1. Introduction	35
2. True Adjectives, Pre-Determiner Q, and Post-Determiner Q	37

2.1	Examples Involving Negation	37
2.2	Noun-Phrase Identity Examples	40
2.3	Miscellaneous Examples	43
3.	An Overt-Predicate Deep Structure	44
4.	Conclusion	47
Chapter 3: Evidence from Idiolect Variation		49
1.	Introduction	49
2.	Quantifier Dialects	50
3.	<i>Until</i>	52
4.	Tag Questions: <i>did they?</i>	53
5.	<i>Until</i> and <i>did they?</i> with Quantifiers	54
6.	Conclusion	57
Chapter 4: Rule Order, Randomness, and Syntactic Idiolect Variation		59
1.	Introduction	59
2.	The Interaction of Quantifier-Lowering with Tag-Question	61
3.	The Interaction of Tag-Question with <i>Not</i> -Transportation	63
4.	Interaction among dialects	65
5.	Attested, Possible, and Impossible Dialects	67
6.	Conclusion	68
Chapter 5: Idiolect Variation and Linguistic Change		71
1.	Introduction	71
2.	The Scope Problem	71
3.	The Primacy-Relation Solution	72
4.	Counter-Examples	74
4.1	Counter-Example I	74
4.2	Counter-Example II	75
5.	Conclusion: Rejection of the Primacy-Relation Solution	76
6.	Towards a Solution	77
Appendix A: A Rule-Ordering Paradox		79
1.	Introduction	79
2.	QL is Cyclic	80
2.1	Reflexive	80
2.2	Reflexive and Raising	82
2.3	Conclusion	84
3.	QL is Last-Cyclic	84
3.1	<i>Not</i> -Transportation	84
3.2	NP-Identity Rules	86
3.3	Conclusion	86
4.	Possible Escapes	86
4.1	Making QL Cyclic: The NT Argument	86
4.2	Making QL Cyclic: The NP-Identity Argument	87
4.3	A New Sort of Reflexive	88

Appendix B: The Deep Structure of “Both”	91
1. Introduction	91
2. “Both” as a Quantifier	92
2.1 Surface-Structure Parallels	92
2.2 Deeper Parallels	92
3. “Both” as a Non-Quantifier	93
3.1 Lakoff-Peters Examples	93
3.2 Miscellaneous Examples	94
3.3 Predicate “Both”	94
4. Proposed Solution	95
5. Confirming Evidence	96
5.1 Surface-Structure Parallels	96
5.2 Deeper Parallels	97
5.2.1 Equi-NP Deletion	97
5.2.2 <i>Not</i> -Transportation	100
6. Conclusion and Speculation	101
Bibliography	103
Index	107
