Foreword	xi
Preface	xv
About the Cover Image	xxi
Contributor Bios	xxiii
SECTION 1 GENERAL PROGRAMMING	1
Introduction	3
<i>Adam Lake, Intel Software Solutions Group</i>	
1.1 Lock-Free Algorithms	5
<i>Toby Jones, Microsoft</i>	
1.2 Utilizing Multicore Processors with OpenMP	17
<i>Pete Isensee, Microsoft Corporation</i>	
1.3 Computer Vision in Games Using the OpenCV Library	25
<i>Arnau Ramisa, Institut d'Investigació en Intel·ligència Artificial</i>	
<i>Enric Vergara, Universitat Politècnica de Catalunya</i>	
<i>Enric Martí, Universitat Autònoma de Barcelona</i>	
1.4 Geographic Grid Registration of Game Objects	39
<i>Roger Smith, Modelbenders, LLC</i>	
1.5 BSP Techniques	49
<i>Octavian Marius Chincisan, Freelancer</i>	
1.6 Closest-String Matching Algorithm	69
<i>James Boer, ArenaNet</i>	
1.7 Using CppUnit To Implement Unit Testing	79
<i>Blake Madden, Oleander Solutions</i>	
1.8 Fingerprinting Pre-Release Builds To Deter and Detect Piracy	97
<i>Steve Rabin, Nintendo of America, Incorporated</i>	
1.9 Faster File Loading with Access-Based File Reordering	103
<i>David L. Koenig, Touchdown Entertainment, Incorporated</i>	
1.10 Stay in the Game: Asset Hotloading for Fast Iteration	109
<i>Noel Llopis and Charles Nicholson, High Moon Studios</i>	

SECTION 2 MATHEMATICS AND PHYSICS	117
Introduction	119
<i>Jim Van Verth, Red Storm Entertainment, Inc.</i>	
2.1 Floating-Point Tricks	121
<i>Chris Lomont, Cybernet Systems Corporation</i>	
2.2 GPU Computation in Projective Space Using Homogeneous Coordinates	137
<i>Vaclav Skala, University of West Bohemia</i>	
2.3 Solving Systems of Linear Equations Using the Cross Product	149
<i>Anders Hast, University of Gävle</i>	
2.4 Sequence Indexing for Game Development	161
<i>Palem GopalaKrishna, Indian Institute of Technology</i>	
2.5 Exact Buoyancy for Polyhedra	175
<i>Erin Catto, Crystal Dynamics</i>	
2.6 Real-Time Particle-Based Fluid Simulation with Rigid Body Interaction	189
<i>Takashi Amada, Sony Computer Entertainment, Inc.</i>	
 SECTION 3 ARTIFICIAL INTELLIGENCE	 207
Introduction	209
<i>Brian Schwab, Sony Computer Entertainment of America</i>	
3.1 Applying Model-Based Decision-Making Methods to Games: Applying the Locust AI Engine to <i>Quake® III</i>	211
<i>Armand Prieditis and Mukesh Dulal, Lookahead Desicions Incorporated</i>	
3.2 Achieving Coordination with Autonomous NPCs	223
<i>Diego Garcés, FX Interactive</i>	
3.3 Behavior-Based Robotic Architectures for Games	235
<i>Hugo Pinto and Luis Otavio Álvares</i>	
3.4 Constructing a Goal-Oriented Robot for <i>Unreal Tournament</i> Using Fuzzy Sensors, Finite-State Machines, and Extended Behavior Networks	245
<i>Hugo Pinto and Luis Otavio Álvares</i>	

3.5	A Goal-Oriented Unreal Bot: Building a Game Agent with Goal-Oriented Behavior and Simple Personality Using Extended Behavior Networks.	259
	<i>Hugo Pinto and Luis Otavio Alvares</i>	
3.6	Short-Term Memory Modeling Using a Support Vector Machine.	273
	<i>Julien Hamaide, Elsewhere Entertainment</i>	
3.7	Using the Quantified Judgment Model for Engagement Analysis	283
	<i>Michael Ramsey</i>	
3.8	Designing a Multilayer, Pluggable AI Engine	291
	<i>Sébastien Schertenleib, Swiss Federal Institute of Technology</i>	
3.9	A Fuzzy-Control Approach to Managing Scene Complexity.	307
	<i>Gabriel Wong and Jialiang Wang, Nanyang Technological University</i>	
SECTION 4 SCRIPTING AND DATA-DRIVEN SYSTEMS		317
	Introduction	319
	<i>Graham Rhodes, Applied Research Associates, Incorporated</i>	
4.1	Scripting Language Survey	323
	<i>Diego Garcés, FX Interactive</i>	
4.2	Binding C/C++ Objects to Lua	341
	<i>Waldemar Celes, PUC-Rio</i>	
	<i>Luiz Henrique de Figueiredo, IMPA</i>	
	<i>Roberto Ierusalimschy, PUC-Rio</i>	
4.3	Programming Advanced Control Mechanisms with Lua Coroutines	357
	<i>Luiz Henrique de Figueiredo, IMPA</i>	
	<i>Waldemar Celes, PUC-Rio</i>	
	<i>Roberto Ierusalimschy, PUC-Rio</i>	
4.4	Managing High-Level Script Execution Within Multithreaded Environments	371
	<i>Sébastien Schertenleib, Swiss Federal Institute of Technology</i>	
4.5	Exposing Actor Properties Using Nonintrusive Proxies	383
	<i>Matthew Campbell and Curtiss Murphy, BMH Associates, Incorporated</i>	
4.6	Game Object Component System	393
	<i>Chris Stoy, Red Storm Entertainment</i>	

SECTION 5 GRAPHICS	405
Introduction	407
<i>Paul Rowan, Rho, Incorporated</i>	
5.1 Synthesis of Realistic Idle Motion for Interactive Characters	409
<i>Arjan Egges, Thomas Di Giacomo, and Nadia Magnenat-Thalmann; MIRALab, University of Geneva</i>	
5.2 Spatial Partitioning Using an Adaptive Binary Tree	423
<i>Martin Fleisz</i>	
5.3 Enhanced Object Culling with (Almost) Oriented Bounding Boxes ..	437
<i>Ben St. John, Siemens</i>	
5.4 Skin Splitting for Optimal Rendering	449
<i>Dominic Fillion</i>	
5.5 GPU Terrain Rendering	461
<i>Harald Vistnes</i>	
5.6 Interactive Fluid Dynamics and Rendering on the GPU	473
<i>Frank Luna</i>	
5.7 Fast Per-Pixel Lighting with Many Lights	489
<i>Frank Puig Placeres, University of Informatic Sciences, Cuba</i>	
5.8 Rendering Road Signs Sharply	501
<i>Jörn Loviscach, University of Applied Sciences</i>	
5.9 Practical Sky Rendering for Games	517
<i>Aurelio Reis, Raven Software</i>	
5.10 High Dynamic Range Rendering Using OpenGL Frame Buffer Objects	529
<i>Allen Sherrod, Ultimate Game Programming</i>	
SECTION 6 AUDIO	537
Introduction	539
<i>Alexander Brandon, Midway Home Entertainment</i>	
6.1 Real-Time Sound Generation from Deformable Meshes	541
<i>Marq Singer, Red Storm Entertainment</i>	

6.2	A Lightweight Generator for Real-Time Sound Effects	549
	<i>Frank Luchs, Visiomedica, Ltd.</i>	
6.3	Real-Time Mixing Busses	555
	<i>James Boer, ArenaNet</i>	
6.4	Potentially Audible Sets.	561
	<i>Dominic Filion</i>	
6.5	A Cheap Doppler Effect.	573
	<i>Julien Hamaide, Elsewhere Entertainment</i>	
6.6	Faking Real-Time DSP Effects.	583
	<i>Robert Sparks, Radical Entertainment</i>	
SECTION 7 NETWORK AND MULTIPLAYER		589
	Introduction	591
	<i>Scott Jacobs, Virtual Heroes</i>	
7.1	Dynamically Adaptive Streaming of 3D Data for Animated Characters.	593
	<i>Thomas Di Giacomo, HyungSeok Kim, Stephane Garchery, and Nadia Magnenat-Thalmann, MIRALab, C.U.I.; University of Geneva, and Chris Joslin, School of Information Technology, Carleton University, Ottawa</i>	
7.2	Complex Systems-Based High-Level Architecture for Massively Multiplayer Games	607
	<i>Viknashvaran Narayanasamy, Kok-Wai Wong, and Chun Che Fung, Murdoch University</i>	
7.3	Generating Globally Unique Identifiers for Game Objects.	623
	<i>Yongha Kim, Nexon Corporation</i>	
7.4	Massively Multiplayer Online Prototype Utilizing Second Life for Game Concept Prototyping	629
	<i>Peter A. Smith, University of Central Florida</i>	
7.5	Reliable Peer-to-Peer Gaming Connections Penetrating NAT.	641
	<i>Larry Shi</i>	
	About the CD-ROM	651
	Index	653
