Contents

Keynote Paper

Accountability in Cloud Service Provision Ecosystems .......................... 3
  Siani Pearson

Information Management and Data Privacy

Information Classification Issues ...................................................... 27
  Erik Bergström and Rose-Mharia Åhlfeldt

DEICS: Data Erasure in Concurrent Software ..................................... 42
  Kalpana Gondi, A. Prasad Sistla, and V.N. Venkatakrishnan

A Practical Analysis of Oblivious Sorting Algorithms for Secure
Multi-party Computation .................................................................. 59
  Dan Bogdanov, Sven Laur, and Riivo Talviste

Cloud, Big Data and Virtualization Security

Security of OS-Level Virtualization Technologies ............................... 77
  Elena Reshetova, Janne Karhunen, Thomas Nyman, and N. Asokan

Processing Private Queries over an Obfuscated Database Using Hidden
Vector Encryption ........................................................................... 94
  Alberto Trombetta, Giuseppe Persiano, and Stefano Braghin

π-Cipher: Authenticated Encryption for Big Data ................................. 110
  Danilo Gligoroski, Hristina Mihajloska, Simona Samardjiska,
  Håkon Jacobsen, Rune Erlend Jensen, and Mohamed El-Hadedy

What Would it Take for You to Tell Your Secrets to a Cloud? -
Studying Decision Factors When Disclosing Information to Cloud
Services ....................................................................................... 129
  Julio Angulo, Erik Wästlund, and Johan Högberg

Network Security and Logging

Efficient Record-Level Keyless Signatures for Audit Logs ....................... 149
  Ahto Buldas, Ahto Truu, Risto Laanoja, and Rainer Gerhards

Static Semantics of Secret Channel Abstractions ................................ 165
  Marco Giunti
Browser Randomisation against Fingerprinting: A Quantitative Information Flow Approach ........................................... 181
Frédéric Besson, Nataliia Bielova, and Thomas Jensen

Attacks and Defenses

Attacker Profiling in Quantitative Security Assessment Based on Attack Trees .......................................................... 199
Aleksandr Lenin, Jan Willemsen, and Dyan Permata Sari

Denial-of-Service Mitigation for Internet Services ......................... 213
Aapo Kalliola, Tuomas Aura, and Sanja Šćepanović

Spook in Your Network: Attacking an SDN with a Compromised OpenFlow Switch .................................................... 229
Markku Antikainen, Tuomas Aura, and Mikko Särelä

Security in Healthcare and Biometrics

Patients’ Privacy Protection against Insurance Companies in eHealth Systems ................................................................. 247
Liangyu Xu and Armin B. Cremers

Segmentation and Normalization of Human Ears Using Cascaded Pose Regression ..................................................... 261
Anika Pflug and Christoph Busch

Poster Papers

Dynamic Enforcement of Dynamic Policies ........................................ 275
Pablo Buiras and Bart van Delft

Availability by Design .............................................................. 277
Roberto Vigo, Flemming Nielson, and Hanne Riis Nielson

Pareto Efficient Solutions of Attack Trees ..................................... 279
Zaruhi Aslanyan and Flemming Nielson

Verification of Stateful Protocols: Set-Based Abstractions in the Applied \( \pi \)-Calculus .............................................................. 281
Alessandro Bruni, Sebastian Mödersheim, Flemming Nielson, and Hanne Riis Nielson

Improvement Proposal for the CryptoCloak Application .................. 283
Dijana Vukovic, Danilo Gligoroski, and Zoran Djuric

Process Tracking for Forensic Readiness ..................................... 285
Yi-Ching Liao and Hanno Langweg
Computationally Analyzing the ISO 9798-2.4 Authentication Protocol
Britta Hale and Colin Boyd

Differential Privacy and Private Bayesian Inference
Christos Dimitrakakis, Blaine Nelson, Aikaterini Mitrokotsa, and Benjamin I.P. Rubinstein

Event Invitations in Privacy-Preserving DOSNs: Formalization and Protocol Design
Guillermo Rodríguez-Cano, Benjamin Greschbach, and Sonja Buchegger

Attacks on Privacy-Preserving Biometric Authentication
Aysajan Abidin, Elena Pagnin, and Aikaterini Mitrokotsa
