Glossary	xix
1 Introduction – Perspectives on Legume Production and Use in European Agriculture	1
<i>Christine A. Watson and Frederick L. Stoddard</i>	
Introduction: Importance of Legumes in European Union (EU) Agriculture	1
Producing Legumes	2
Nutrition – Humans and Livestock	3
Non-food Uses of Legumes	5
Legumes in Crop Rotations	7
Current Perspectives on Legume Production	8
Conclusion	12
2 The Role of Legumes in Bringing Protein to the Table	18
<i>Donal Murphy-Bokern, Alain Peeters and Henk Westhoek</i>	
Introduction	19
Legumes: the Mainstay of Protein Provision in Natural Terrestrial Ecosystems	19
Quantity and Fate of Fixed Nitrogen	22
Legumes and Our Protein Supplies	24
Europe’s Evolving Agri-food System	28
Pointers to Change in Developing the European Agri-food System	32

3	Nitrogen and Phosphorus Losses from Legume-supported Cropping	37
	<i>Michael Williams, Valentini A. Pappa and Robert Rees</i>	
	Introduction	37
	Nitrous Oxide Production in Agricultural Soils	38
	Nitrous Oxide Emissions from Legume-supported Cropping Systems	40
	Nitrate Leaching from Legume Crops	46
	Nitrogen and Phosphorus Losses from Intercropping of Legumes	46
	Conclusions	48
4	Legume Crops and Biodiversity	55
	<i>Georg Everwand, Susannah Cass, Jens Dauber, Michael Williams and Jane Stout</i>	
	Introduction	55
	How Legume Traits Influence Local Biodiversity and Farmed Land	56
	How Management of Legume-supported Cropping Affects Biodiversity	60
	Legume-supported Cropping Affects Biodiversity at Site and Landscape Scale	64
	Conclusions	65
5	Grain Legumes: an Overview	70
	<i>Frederick L. Stoddard</i>	
	Introduction	70
	Origin and Spread in Europe	71
	The Cool-season Starchy Legumes	73
	The Warm-season Legumes	82
	Conclusion	84
6	Lupins in European Cropping Systems	88
	<i>Fabio Gresta, Michael Wink, Udo Prins, Michael Abberton, Jessica Capraro, Alessio Scarafoni and George Hill</i>	
	Introduction and Taxonomy	88
	Secondary Metabolites: Quinolizidine Alkaloids	91
	Properties and Uses	91
	Genetic Resources, Genomic Tools and Breeding	93
	Genetic and Genomic Tools	94
	Breeding	95
	Canopy Structures	97
	Adaptation: Climate and Soil	97
	Calcium Tolerance	97
	Management Techniques	98
	Crop Rotation	101
	Diseases and Pests	101
7	Developing Soy Production in Central and Northern Europe	109
	<i>Fredrik Fogelberg and Jürgen Recknagel</i>	
	The Biology of Soy	109
	Status of Soybean Cropping Development	110
	History of Soy Development in Europe	112

Future Potential for Soy in Central and Northern Europe	114
Identifying Potential – an Example from Germany	117
Production Techniques	119
Harvest and Processing of Soybean for Food or Feed	120
Prospects for Soybean in Northern Europe	121
8 Legume-based Green Manure Crops	125
<i>John A. Baddeley, Valentini A. Pappa, Aurelio Pristeri, Göran Bergkvist, Michele Monti, Moritz Reckling, Nicole Schläfke and Christine A. Watson</i>	
Introduction	126
Types of LGMs	126
Legume Species Suitable for Green Manures	127
Crop Management	131
Effects of Legume Green Manures	133
Rotational Considerations	134
Conclusion	136
9 White Clover Supported Pasture-based Systems in North-west Europe	139
<i>James Humphreys, Paul Phelan, Dejun Li, William Burchill, Jørgen Eriksen, Imelda Casey, Daniel Enríquez-Hidalgo and Karen Søegaard</i>	
Introduction	140
BNF and Herbage Production	144
Nutritive Value and Milk Production	146
Management	147
Economics	150
Environmental Impact	151
Conclusions	153
10 Red Clover in Cropping Systems	157
<i>Bodil Frankow-Lindberg</i>	
Introduction	157
Botany	159
Agronomy	160
Fixation and Transfer of Nitrogen to Companion Species	162
Feeding Quality	164
Conclusions	165
11 Lucerne (Alfalfa) in European Cropping Systems	168
<i>Bernadette Julier, François Gastal, Gaëtan Louarn, Isabelle Badenhausser, Paolo Annicchiarico, Gilles Crocq, Denis Le Chatelier, Eric Guillemot and Jean-Claude Emile</i>	
Introduction	168
Botany, Biology and Main Characteristics	169
Area of Production, Yield, Harvest Methods and Use	169
Genetic Resources	171
Agronomy, Ecology and Crop Physiology	172
Breeding	178
Agronomical Role and Environmental Impacts of Lucerne	180

Harvest	183
Lucerne in Farming Systems	184
Feeding Value for Ruminants and Monogastrics	185
Novel and Non-food Use	186
Seed Production	186
Outlook	187
12 Mixtures of Legumes for Forage Production	193
<i>Branko Ćupina, Aleksandar Mikić, Đorđe Krstić, Svetlana Vujić, Lana Zorić, Vuk Đorđević and Pero Erić</i>	
Introduction	193
Developing and Managing Mixtures of Legumes – the Fundamentals	197
Optimizing Interspecific Interactions when Establishing Perennial Forage Crops	198
Mixtures of Annual Legumes	199
Annual Legume Forage Intercrops for Farm Use	201
Conclusions	203
Acknowledgements	205
13 Introducing Legumes into European Cropping Systems: Farm-level Economic Effects	209
<i>Sara Preissel, Moritz Reckling, Johann Bachinger and Peter Zander</i>	
Introduction	209
Approach	210
Economic Evaluation from Crop to Rotation Level	212
Environmental Impact of Profitable Legume Rotations	218
Potential for Increasing the Economic Value of Legume Grain	220
Conclusions	222
Acknowledgements	222
14 Optimizing Legume Cropping: the Policy Questions	226
<i>Tom Kuhlman, John Helming and Vincent Linderhof</i>	
Introduction	226
Legumes and the CAP	227
Policy Scenarios	229
Simulating the Policies: the CAPRI Model	230
Results	232
Discussion and Conclusions	240
15 Developing Legume Cropping: Looking Forward	244
<i>Donal Murphy-Bokern</i>	
Index	251
