LIST OF ACRONYMS	xiv

## Introduction

### 1 Geographic Information: Science, Systems, and Society 1

---

1.1	Introduction: What Are GI Science and Systems, and Why Do They Matter?	1
1.1.1	The Importance of Location	2
1.1.2	Spatial Is Special	6
1.2	Data, Information, Evidence, Knowledge, and Wisdom	9
1.3	GI Science and Systems	11
1.4	The Technology of Problem Solving	14
1.5	The Disciplinary Setting of GI Science and Systems (GISS)	16
1.5.1	The Historical Perspective	18
1.5.2	The Business Perspective	19
1.5.3	The Government Perspective	23
1.5.4	Computer-Science and Information-Science Perspectives	24
1.5.5	The Geography Perspective	25
1.5.6	The Societal Perspective	27
1.6	GI Science and Spatial Thinking	30
1.7	GI Systems and Science in Society	31
	Questions for Further Study	32
	Further Reading	32

## 1 Principles

### 2 The Nature of Geographic Data 33

---

2.1	Introduction	33
2.2	The Fundamental Problem	34
2.3	Spatial Autocorrelation and Scale	37

2.4	Spatial Sampling	39
2.5	Sampling and VGI	42
2.6	Distance Decay	43
2.7	Measuring Distance Effects as Spatial Autocorrelation	48
2.8	Taming Geographic Monsters	51
2.9	Induction and Deduction and How It All Comes Together	53
	Questions for Further Study	54
	Further Reading	54

### 3 Representing Geography 55

---

3.1	Introduction	55
3.2	Digital Representation	57
3.3	Representation of What and for Whom?	58
3.4	The Fundamental Problem	61
3.5	Discrete Objects and Continuous Fields	62
3.5.1	Discrete Objects	62
3.5.2	Continuous Fields	64
3.6	Rasters and Vectors	66
3.6.1	Raster Data	67
3.6.2	Vector Data	68
3.6.3	Representing Continuous Fields	68
3.7	The Paper Map	69
3.8	Generalization	71
3.8.1	Generalization about Places	71
3.8.2	Generalization about Properties	74
3.9	Conclusion	76
	Questions for Further Study	76
	Further Reading	76

### 4 Georeferencing 77

---

4.1	Introduction	77
4.2	Place-Names and Points of Interest	80
4.3	Postal Addresses and Postal Codes	82
4.4	IP Addresses	84
4.5	Linear Referencing Systems	84

4.6	Cadastrers and the U.S. Public Land Survey System	85
4.7	Measuring the Earth: Latitude and Longitude	86
4.8	Projections and Coordinates	88
4.8.1	The Plate Carrée or Cylindrical Equidistant Projection	91
4.8.2	The Universal Transverse Mercator (UTM) Projection	92
4.8.3	Web Mercator	93
4.8.4	State Plane Coordinates and Other Local Systems	94
4.9	Measuring Latitude, Longitude, and Elevation: GPS	94
4.10	Converting Georeferences	95
4.11	Geotagging and Mashups	96
4.12	Georegistration	96
4.13	Summary	98
	Questions for Further Study	98
	Further Reading	98

	Questions for Further Study	127
	Further Reading	127

## 2 Techniques

### 6 GI System Software 128

6.1	Introduction	128
6.2	The Evolution of GI System Software	129
6.3	Architecture of GI System Software	131
6.3.1	Project, Departmental, and Enterprise GI Systems	131
6.3.2	The Three-Tier Architecture	131
6.3.3	Software Data Models and Customization	133
6.3.4	GI Systems on the Desktop, on the Web, and in the Cloud	134
6.4	Building GI Software Systems	136
6.5	GI Software Vendors	137
6.5.1	Autodesk	137
6.5.2	Bentley	137
6.5.3	Esri	138
6.5.4	Intergraph	139
6.6	Types of GI Systems	140
6.6.1	Desktop Systems	140
6.6.2	Web Mapping Systems	142
6.6.3	Server GI Systems	142
6.6.4	Virtual Globes	146
6.6.5	Developer GI Systems	147
6.6.6	Mobile GI Systems	148
6.6.7	Other types of GI Software	149
6.7	Conclusion	150
	Questions for Further Study	151
	Further Reading	151

### 7 Geographic Data Modeling 152

7.1	Introduction	152
7.1.1	Data Model Overview	152
7.1.2	Levels of Data Model Abstraction	153
7.2	GI Data Models	154
7.2.1	CAD, Graphical, and Image Data Models	155
7.2.2	Raster Data Model	155
7.2.3	Vector Data Model	157
7.2.4	Object Data Model	164
7.3	Example of a Water-Facility Object Data Model	168
7.4	Geographic Data Modeling in Practice	170

### 5 Uncertainty 99

5.1	Introduction	99
5.2	U1: Uncertainty in the Conception of Geographic Phenomena	101
5.2.1	Conceptions of Place: Units of Analysis	101
5.2.2	Conceptions of Attributes: Vagueness and Ambiguity	104
5.2.3	Fuzzy Approaches to Attribute Classification	108
5.3	U2: Further Uncertainty in the Representation of Geographic Phenomena	111
5.3.1	Representation of Place/Location	111
5.3.2	Statistical Models of Uncertainty in Attribute Measures	112
5.3.3	Statistical Models of Uncertainty in Location Measures	117
5.4	U3: Further Uncertainty in the Analysis of Geographic Phenomena	117
5.4.1	Internal and External Validation through Spatial Analysis	117
5.4.2	Validation through Autocorrelation: The Spatial Structure of Errors	118
5.4.3	Validation through Investigating the Effects of Aggregation and Scale	122
5.4.4	Validation with Reference to External Sources: Data Integration and Shared Lineage	123
5.4.5	Internal and External Validation; Induction and Deduction	124
5.5	Consolidation	126

Questions for Further Study 172  
Further Reading 172

## **8 Data Collection** 173

---

- 8.1 Introduction 173
    - 8.1.1 Data Collection Workflow 175
  - 8.2 Primary Geographic Data Capture 175
    - 8.2.1 Raster Data Capture 175
    - 8.2.2 Vector Data Capture 179
  - 8.3 Secondary Geographic Data Capture 181
    - 8.3.1 Raster Data Capture Using Scanners 181
    - 8.3.2 Vector Data Capture 183
  - 8.4 Obtaining Data from External Sources (Data Transfer) 187
    - 8.4.1 Geographic Data Formats 189
  - 8.5 Capturing Attribute Data 190
  - 8.6 Citizen-Centric Web-Based Data Collection 190
  - 8.7 Managing a Data Collection Project 191
- Questions for Further Study 193  
Further Reading 193

## **9 Creating and Maintaining Geographic Databases** 194

---

- 9.1 Introduction 194
  - 9.2 Database Management Systems 195
    - 9.2.1 Types of DBMSs 196
    - 9.2.2 Geographic DBMS Extensions 197
  - 9.3 Storing Data in DBMS Tables 198
  - 9.4 SQL 201
  - 9.5 Geographic Database Types and Functions 202
  - 9.6 Geographic Database Design 205
    - 9.6.1 The Database Design Process 205
  - 9.7 Structuring Geographic Information 206
    - 9.7.1 Topology Creation 206
    - 9.7.2 Indexing 208
  - 9.8 Editing and Data Maintenance 212
  - 9.9 Multiuser Editing of Continuous Databases 213
    - 9.9.1 Transactions 213
    - 9.9.2 Versioning 213
  - 9.10 Conclusion 214
- Questions for Further Study 216  
Further Reading 216

## **10 The GeoWeb** 217

---

- 10.1 Introduction 217
  - 10.2 Distributing the Data 222
    - 10.2.1 Object-Level Metadata 223
    - 10.2.2 Geolibraries and Geoportals 225
  - 10.3 The Mobile User 227
    - 10.3.1 Virtual Reality and Augmented Reality 228
    - 10.3.2 Location-Based Services 230
    - 10.3.3 Issues in Mobile GIS 232
  - 10.4 Distributing the Software: GI Services 233
    - 10.4.1 Service-Oriented Architecture 234
  - 10.5 Prospects 235
- Questions for Further Study 236  
Further Reading 236

## **3 Analysis**

## **11 Cartography and Map Production** 237

---

- 11.1 Introduction 237
  - 11.2 Maps and Cartography 241
    - 11.2.1 Maps and Media 245
  - 11.3 Principles of Map Design 246
    - 11.3.1 Map Composition 247
    - 11.3.2 Map Symbolization 248
  - 11.4 Map Series 257
  - 11.5 Applications 261
  - 11.6 Conclusion 265
- Questions for Further Study 265  
Further Reading 265

## **12 Geovisualization** 266

---

- 12.1 Introduction: Uses, Users, Messages, and Media 266
- 12.2 Geovisualization, Spatial Query, and User Interaction 268
  - 12.2.1 Overview 268
  - 12.2.2 Spatial Query Online and the Geoweb 271
- 12.3 Geovisualization and Transformation 274
  - 12.3.1 Overview 274
  - 12.3.2 Cartograms 276
  - 12.3.3 Remodeling Spatial Distributions as Dasymetric Maps 278
- 12.4 Participation, Interaction, Augmentation, and Dynamic Representation 280

- 12.4.1 Public Participation and Participatory GI Systems (PPGIS) 280
- 12.4.2 User Interaction and Representation in 2.5-D and 3-D 282
- 12.4.3 Handheld Computing and Augmented Reality 284
- 12.4.4 Visualizing Geotemporal Dynamics 285
- 12.5 Consolidation 288
- Questions for Further Study 289
- Further Reading 289

### **13 Spatial Data Analysis 290**

- 13.1 Introduction: What Is Spatial Analysis? 290
  - 13.1.1 Examples 292
- 13.2 Analysis Based on Location 295
  - 13.2.1 Analysis of Attribute Tables 296
  - 13.2.2 Spatial Joins 299
  - 13.2.3 The Point-in-Polygon Operation 300
  - 13.2.4 Polygon Overlay 301
  - 13.2.5 Raster Analysis 303
- 13.3 Analysis Based on Distance 304
  - 13.3.1 Measuring Distance and Length 304
  - 13.3.2 Buffering 306
  - 13.3.3 Cluster Detection 308
  - 13.3.4 Dependence at a Distance 309
  - 13.3.5 Density Estimation 310
  - 13.3.6 Spatial Interpolation 313
- 13.4 Conclusion 317
- Questions for Further Study 318
- Further Reading 318

### **14 Spatial Analysis and Inference 319**

- 14.1 The Purpose of Area-Based Analyses 319
  - 14.1.1 Measurement of Area 319
  - 14.1.2 Measurement of Shape 320
- 14.2 Centrality 321
  - 14.2.1 Centers 322
  - 14.2.2 Dispersion 324
- 14.3 Analysis of Surfaces 324
  - 14.3.1 Slope and Aspect 324
  - 14.3.2 Modeling Travel on a Surface 326
  - 14.3.3 Computing Watersheds and Channels 327
  - 14.3.4 Computing Visibility 328
- 14.4 Design 329
  - 14.4.1 Point Location 330
  - 14.4.2 Routing Problems 332
- 14.5 Hypothesis Testing 334
  - 14.5.1 Hypothesis Tests on Geographic Data 335

- 14.6 Conclusion 337
- Questions for Further Study 338
- Further Reading 338

### **15 Spatial Modeling with GI Systems 339**

- 15.1 Introduction 339
  - 15.1.1 Why Model? 341
  - 15.1.2 To Analyze or to Model? 342
- 15.2 Types of Models 343
  - 15.2.1 Static Models and Indicators 343
  - 15.2.2 Individual and Aggregate Models 343
  - 15.2.3 Cellular Models 347
  - 15.2.4 Cartographic Modeling and Map Algebra 349
- 15.3 Technology for Modeling 351
  - 15.3.1 Operationalizing Models in GI Systems 351
  - 15.3.2 Model Coupling 351
  - 15.3.3 Cataloging and Sharing Models 352
- 15.4 Multicriteria Methods 352
- 15.5 Accuracy and Validity: Testing the Model 354
- 15.6 Conclusion 356
- Questions for Further Study 357
- Further Reading 357

## **4 Policy, Management, and Action**

### **16 Managing GI Systems 358**

- 16.1 Introduction 359
- 16.2 Managing Risk 359
- 16.3 The Case for the GI System: ROI 360
- 16.4 The Process of Developing a Sustainable GI System 366
  - 16.4.1 Choosing a GI System: The Classical Acquisition Model 368
  - 16.4.2 Implementing a GI System 373
  - 16.4.3 Managing a Sustainable, Operational GI System 375
- 16.5 Sustaining a GI System—The People and Their Competences 378
  - 16.5.1 GI System Staff and the Teams Involved 378
  - 16.5.2 Project Managers 379
  - 16.5.3 Coping with Uncertainty 379
- 16.6 Conclusions 380
- Questions for Further Study 380
- Further Reading 380

## **17** Information and Decision Making 381

---

- 17.1 Why We Need Information 381
  - 17.1.1 Trade-Offs, Uncertainty, and Risk 383
  - 17.1.2 Organizational Drivers 383
- 17.2 Information as Infrastructure 386
  - 17.2.1 Information for Management 387
- 17.3 Different Forms of GI 391
  - 17.3.1 GI about Individuals 394
  - 17.3.2 More Novel Forms of GI 402
  - 17.3.3 The Changing World of GI 402
- 17.4 Open Data and Open Government 404
  - 17.4.1 The Metadata Issue 405
- 17.5 Example of an Information Infrastructure: The Military 406
  - 17.5.1 Technological Change and the Military 406
  - 17.5.2 The Military Information Infrastructure 407
  - 17.5.3 Civilian Spin-Offs 408
- 17.6 Conclusions 409
- Questions for Further Study 410
- Further Reading 410

## **18** Navigating the Risks 411

---

- 18.1 Clashes Between Scientists and the Judiciary 412
- 18.2 Business Models for GI-Related Enterprises 412
- 18.3 Legal and Regulatory Constraints 414
  - 18.3.1 Geography and the Law 414
  - 18.3.2 Three Aspects of the Law and GI 415
- 18.4 Privacy and GI Systems 421
  - 18.4.1 Preserving Privacy without Losing the Use of Personal Information 422
- 18.5 Public Trust, Ethics, and Coping with the Media 424
  - 18.5.1 Public Trust 424
  - 18.5.2 Ethics 425
  - 18.5.3 Coping with the Media 426
- 18.6 Partnerships, Up-Scaling Activities, and Risk Mitigation 426
  - 18.6.1 Spatial Data Infrastructures: The U.S. Experience 427
  - 18.6.2 INSPIRE 429
  - 18.6.3 UN Initiative on Global Geospatial Information Management 430
  - 18.6.4 Have SDIs Worked? 430
- 18.7 Coping with Spatial Stupidity 432

- 18.8 Conclusions 433
- Questions for Further Study 434
- Further Reading 434

## **19** Epilog: GISS in the Service of Humanity 435

---

- 19.1 GISS, the Active Citizen, and Citizen Scientists 435
  - 19.1.1 Who Can Help? 436
  - 19.1.2 Areas Where GISS Contributes 437
- 19.2 Context: Our Differentiated World 437
- 19.3 Context: Our Interdependent World 440
- 19.4 The Process 441
  - 19.4.1 Stage 1: Defining and Describing the Issue 442
  - 19.4.2 Stage 2: Analyzing and Modeling Spatial Interrelationships 442
  - 19.4.3 Stage 3: Devising Possible Solutions 442
  - 19.4.4 Communicating Results and Possible Solutions to Decision Makers 443
  - 19.4.5 Stage 5: Reflect, Learn, and Educate 443
- 19.5 The Grand Challenges 443
- 19.6 Grand Challenges Whose Effects We Can Help to Ameliorate 445
  - 19.6.1 Population Growth 445
  - 19.6.2 Poverty and Hunger 446
  - 19.6.3 Human Health 448
  - 19.6.4 Access to Food, Potable Water, and Boundary Disputes 452
  - 19.6.5 Coping with Natural Disasters 453
  - 19.6.6 Coping with Terrorism, Crime, and Warfare 456
  - 19.6.7 Environmental Sustainability 456
- 19.7 Conclusions 459
- Questions For Further Study 460
- Further Reading 460
