|--|-----------|--|-----------|
| <i>Preface</i>                                       | xiii      | 2.4 Fourth Week  | 21        |
| <i>About the companion website</i>                   | xv        | 2.4.1 Formation of the Neural Tube   | 21        |
| <b>Chapter 1 Introduction to the Nervous System</b>  | <b>1</b>  | 2.4.2 Rostral and Caudal Neuropores Open                                   | 22        |
| 1.1 Neurons  | 1         | 2.4.3 Neural Crest Cells Emerge  | 23        |
| 1.1.1 Neuronal Cell Body (Soma)                      | 2         | 2.4.4 Neural Canal – the Future Ventricular System                         | 24        |
| 1.1.2 Axon Hillock                                   | 3         | 2.4.5 Neuropores Close and the Neural Tube Forms                           | 24        |
| 1.1.3 Neuronal Processes – Axons and Dendrites       | 3         | 2.4.6 Cervical Flexure Present   | 24        |
| 1.2 Classification of Neurons                        | 4         | 2.5 Fifth Week   | 24        |
| 1.2.1 Neuronal Classification by Function            | 4         | 2.5.1 Simple Tube, Complex Transformation                                  | 24        |
| 1.2.2 Neuronal Classification by Number of Processes | 4         | 2.5.2 Five Subdivisions of the Brain Appear                                | 24        |
| 1.3 The Synapse                                      | 5         | 2.5.3 Brain Vesicles Versus Brain Regions                                  | 25        |
| 1.3.1 Components of a Synapse                        | 5         | 2.6 Vulnerability of the Developing Nervous System                         | 26        |
| 1.3.2 Neurotransmitters and Neuromodulators          | 5         | 2.7 Congenital Malformations of the Nervous System                         | 27        |
| 1.3.3 Neuronal Plasticity                            | 6         | 2.7.1 Spinal Dysraphism  | 27        |
| 1.3.4 The Neuropil                                   | 6         | 2.7.2 Anencephaly  | 28        |
| 1.4 Neuroglial Cells                                 | 6         | 2.7.3 Microcephaly   | 28        |
| 1.4.1 Neuroglial Cells Differ from Neurons           | 6         | Further Reading  | 29        |
| 1.4.2 Identification of Neuroglia                    | 6         | <b>Chapter 3 The Spinal Cord</b>   | <b>31</b> |
| 1.4.3 Neuroglial Function                            | 8         | 3.1 Embryological Considerations   | 31        |
| 1.4.4 Neuroglial Cells and Aging                     | 9         | 3.1.1 Layers of the Developing Spinal Cord                                 | 31        |
| 1.4.5 Neuroglial Cells and Brain Tumors              | 9         | 3.1.2 Formation of Ventral Gray Columns and Ventral Roots                  | 32        |
| 1.5 Axonal Transport                                 | 9         | 3.1.3 Formation of Dorsal Gray Columns                                     | 32        |
| 1.5.1 Functions of Axonal Transport                  | 9         | 3.1.4 Dorsal and Ventral Horns Versus Dorsal and Ventral Gray Columns      | 33        |
| 1.5.2 Defective Axonal Transport                     | 9         | 3.1.5 Development of Neural Crest Cells                                    | 33        |
| 1.6 Degeneration and Regeneration                    | 10        | 3.1.6 Framework of the Adult Cord is Present at Birth                      | 34        |
| 1.6.1 Axon or Retrograde Reaction                    | 10        | 3.2 Gross Anatomy  | 34        |
| 1.6.2 Anterograde Degeneration                       | 11        | 3.2.1 Spinal Cord Weight and Length  | 34        |
| 1.6.3 Retrograde Degeneration                        | 11        | 3.2.2 Spinal Segments, Regions, and Enlargements                           | 34        |
| 1.6.4 Regeneration of Peripheral Nerves              | 11        | 3.2.3 Spinal Segments in Each Region Are of Unequal Length                 | 34        |
| 1.6.5 Regeneration and Neurotrophic Factors          | 13        | 3.2.4 Conus Medullaris, Filum Terminale, and Cauda Equina                  | 35        |
| 1.6.6 Regeneration in the Central Nervous System     | 13        | 3.2.5 Termination of the Adult Spinal Cord                                 | 35        |
| 1.7 Neural Transplantation                           | 14        | 3.2.6 Differential Rate of Growth: Vertebral Column Versus the Spinal Cord | 36        |
| Further Reading                                      | 14        | 3.2.7 Relationship Between Spinal Segments and Vertebrae                   | 37        |
| <b>Chapter 2 Development of the Nervous System</b>   | <b>17</b> | 3.3 Nuclear Groups – Gray Matter   | 37        |
| 2.1 First Week                                       | 19        | 3.3.1 General Arrangement of Spinal Cord Gray Matter                       | 37        |
| 2.1.1 Fertilization                                  | 19        | 3.3.2 Gray Matter at Enlargement Levels                                    | 37        |
| 2.1.2 From Two Cells to the Free Blastocyst          | 19        | 3.3.3 Spinal Laminae   | 38        |
| 2.2 Second Week                                      | 20        |  |           |
| 2.2.1 Implantation and Two Distinct Layers of Cells  | 20        |  |           |
| 2.2.2 Primitive Streak and a Third Layer of Cells    | 20        |  |           |
| 2.3 Third Week                                       | 20        |  |           |
| 2.3.1 Primitive Node and Notochordal Process         | 20        |  |           |
| 2.3.2 Neural Plate, Groove, Folds, and Neuromeres    | 21        |  |           |
| 2.3.3 Three Main Divisions of the Brain              | 21        |  |           |
| 2.3.4 Mesencephalic Flexure Appears                  | 21        |  |           |

|  |           |  |           |
|--|-----------|--|-----------|
| 3.3.4 Dorsal Horn  | 38        | 6.2.2 Thermoreceptors  | 83        |
| 3.3.5 Intermediate Zone                                  | 38        | 6.2.3 Nociceptors  | 83        |
| 3.3.6 Ventral Horn                                       | 39        | 6.2.4 Chemoreceptors   | 83        |
| 3.4 Functional Classes of Neurons                        | 39        | 6.2.5 Photoreceptors   | 84        |
| 3.4.1 Four Classes of Neurons in the Spinal Cord         | 39        | 6.2.6 Osmoreceptors  | 84        |
| 3.4.2 Somatic Afferent Versus Visceral Afferent Neurons  | 40        | 6.3 Classification of Receptors by Distribution and Function   | 84        |
| 3.4.3 Somatic Efferent Versus Visceral Efferent Neurons  | 40        | 6.3.1 Exteroceptors  | 84        |
| 3.4.4 Some Ventral Root Axons Are Sensory                | 40        | 6.3.2 Interoceptors  | 84        |
| 3.5 Funiculi/Fasciculi/Tracts – White Matter             | 40        | 6.3.3 Proprioceptors   | 84        |
| 3.6 Spinal Reflexes                                      | 41        | 6.4 Structural Classification of Receptors                     | 84        |
| 3.7 Spinal Meninges and Related Spaces                   | 42        | 6.4.1 Free Nerve Endings                                       | 84        |
| 3.7.1 Spinal Dura Mater                                  | 42        | 6.4.2 Endings in Hair Follicles                                | 85        |
| 3.7.2 Spinal Arachnoid                                   | 43        | 6.4.3 Terminal Endings of Nerves                               | 85        |
| 3.7.3 Spinal Pia Mater                                   | 43        | 6.4.4 Neurotendinous Spindles                                  | 87        |
| 3.8 Spinal Cord Injury                                   | 43        | 6.4.5 Neuromuscular Spindles                                   | 87        |
| 3.8.1 Hemisection of the Spinal Cord                     | 43        | 6.5 Reflex Circuits  | 88        |
| 3.8.2 Syringomyelia                                      | 44        | 6.5.1 The Monosynaptic Reflex                                  | 88        |
| 3.9 Blood Supply to the Spinal Cord                      | 44        | 6.5.2 Complex Reflexes   | 89        |
| Further Reading  | 44        | 6.6 General Sensory Paths                                      | 89        |
| <b>Chapter 4 The Brain Stem</b>                          | <b>47</b> | 6.6.1 Classification of Sensory Paths by Function              | 89        |
| 4.1 External Features                                    | 47        | 6.7 Organization of General Sensory Paths                      | 89        |
| 4.1.1 Medulla Oblongata                                  | 47        | 6.7.1 Receptors  | 89        |
| 4.1.2 Pons   | 50        | 6.7.2 Primary Neurons  | 89        |
| 4.1.3 Midbrain   | 50        | 6.7.3 Secondary Neurons  | 91        |
| 4.2 Cerebellum and Fourth Ventricle                      | 50        | 6.7.4 Thalamic Neurons   | 91        |
| 4.2.1 Cerebellum   | 50        | 6.7.5 Cortical Neurons   | 91        |
| 4.2.2 Fourth Ventricle                                   | 52        | 6.7.6 Modulation of Sensory Paths                              | 91        |
| 4.3 Organization of Brain Stem Neuronal Columns          | 52        | Further Reading  | 92        |
| 4.3.1 Functional Components of the Cranial Nerves        | 52        | <b>Chapter 7 Paths for Pain and Temperature</b>                | <b>95</b> |
| 4.3.2 Efferent Columns                                   | 54        | 7.1 Path for Superficial Pain and Temperature from the Body    | 95        |
| 4.3.3 Afferent Columns                                   | 54        | 7.1.1 Modalities   | 95        |
| 4.4 Internal Features                                    | 54        | 7.1.2 Receptors  | 96        |
| 4.4.1 Endogenous Substances                              | 56        | 7.1.3 Primary Neurons  | 97        |
| 4.4.2 Medulla Oblongata                                  | 56        | 7.1.4 Secondary Neurons  | 98        |
| 4.4.3 Pons   | 59        | 7.1.5 Position of the LST in the Brain Stem                    | 99        |
| 4.4.4 Midbrain   | 63        | 7.1.6 Thalamic Neurons   | 100       |
| Further Reading  | 65        | 7.1.7 Cortical Neurons   | 100       |
| <b>Chapter 5 The Forebrain</b>                           | <b>67</b> | 7.1.8 Modulation of Painful and Thermal Impulses               | 102       |
| 5.1 Telencephalon  | 67        | 7.2 Path for Visceral Pain from the Body                       | 102       |
| 5.1.1 Telencephalon Medium                               | 67        | 7.2.1 Modalities and Receptors                                 | 102       |
| 5.1.2 Cerebral Hemispheres                               | 68        | 7.2.2 Primary Neurons  | 103       |
| 5.1.3 Basal Ganglia (Basal Nuclei)                       | 74        | 7.2.3 Secondary Neurons  | 103       |
| 5.1.4 Rhinencephalon                                     | 77        | 7.2.4 Thalamic Neurons   | 105       |
| 5.2 Diencephalon   | 77        | 7.2.5 Cortical Neurons   | 105       |
| 5.2.1 Epithalamus  | 77        | 7.2.6 Suffering Accompanying Pain                              | 105       |
| 5.2.2 Thalamus   | 78        | 7.2.7 Visceral Pain as Referred Pain                           | 106       |
| 5.2.3 Subthalamus  | 78        | 7.2.8 Transection of Fiber Bundles to Relieve Intractable Pain | 106       |
| 5.2.4 Hypothalamus                                       | 78        | 7.3 The Trigeminal Nuclear Complex                             | 107       |
| 5.3 Cerebral White Matter                                | 78        | 7.3.1 Organization of the Trigeminal Nuclear Complex           | 107       |
| Further Reading  | 79        | 7.3.2 Organization of Entering Trigeminal Sensory Fibers       | 107       |
| <b>Chapter 6 Introduction to Ascending Sensory Paths</b> | <b>81</b> |  |           |
| 6.1 Receptors  | 81        |  |           |
| 6.2 Classification of Receptors by Modality              | 81        |  |           |
| 6.2.1 Mechanoreceptors                                   | 82        |  |           |

|  |            |   |            |
|--|------------|---|------------|
| 7.4 Path for Superficial Pain and Thermal Extremes from the Head                           | 108        | 8.7 Certain Trigeminal Reflexes   | 136        |
| 7.4.1 Modalities and Receptors   | 108        | 8.7.1 “Jaw-Closing” Reflex  | 136        |
| 7.4.2 Primary Neurons  | 108        | 8.7.2 Corneal Reflex  | 137        |
| 7.4.3 Secondary Neurons  | 110        | Further Reading   | 138        |
| 7.4.4 Thalamic Neurons   | 111        | <b>Chapter 9 The Reticular Formation</b>                                  | <b>141</b> |
| 7.5 Path for Thermal Discrimination from the Head  | 111        | 9.1 Structural Aspects  | 141        |
| 7.5.1 Modality and Receptors   | 111        | 9.1.1 Reticular Nuclei in the Medulla                                     | 142        |
| 7.5.2 Primary Neurons  | 111        | 9.1.2 Reticular Nuclei in the Pons  | 143        |
