

Table of Contents

Invited Papers

FPSOLVE: A Generic Solver for Fixpoint Equations over Semirings	1
<i>Javier Esparza, Michael Luttenberger, and Maximilian Schlund</i>	
Restarting Automata for Picture Languages: A Survey on Recent Developments	16
<i>Friedrich Otto</i>	
Investigations on Automata and Languages over a Unary Alphabet	42
<i>Giovanni Pighizzini</i>	
Cellular Automata for Crowd Dynamics	58
<i>Georgios Ch. Sirakoulis</i>	

Regular Papers

Counting Equivalent Linear Finite Transducers Using a Canonical Form	70
<i>Ivone Amorim, António Machiavelo, and Rogério Reis</i>	
On the Power of One-Way Automata with Quantum and Classical States	84
<i>Maria Paola Bianchi, Carlo Mereghetti, and Beatrice Palano</i>	
On Comparing Deterministic Finite Automata and the Shuffle of Words	98
<i>Franziska Biegler and Ian McQuillan</i>	
Minimal Partial Languages and Automata	110
<i>Francine Blanchet-Sadri, Kira Goldner, and Aidan Shackleton</i>	
Large Aperiodic Semigroups	124
<i>Janusz Brzozowski and Marek Szykuta</i>	
On the Square of Regular Languages	136
<i>Kristína Čevorová, Galina Jirásková, and Ivana Krajňáková</i>	
Unary Languages Recognized by Two-Way One-Counter Automata	148
<i>Marzio De Biasi and Abuzer Yakaryilmaz</i>	
A Type System for Weighted Automata and Rational Expressions	162
<i>Akim Demaille, Alexandre Duret-Lutz, Sylvain Lombardy, Luca Saini, and Jacques Sakarovitch</i>	

Bounded Prefix-Suffix Duplication	176
<i>Marius Dumitran, Javier Gil, Florin Manea, and Victor Mitrana</i>	
Recognition of Labeled Multidigraphs by Spanning Tree Automata	188
<i>Akio Fujiyoshi</i>	
Reset Thresholds of Automata with Two Cycle Lengths	200
<i>Vladimír V. Gusev and Elena V. Pribavkina</i>	
On the Ambiguity, Finite-Valuedness, and Lossiness Problems in Acceptors and Transducers	211
<i>Oscar H. Ibarra</i>	
Kleene Closure on Regular and Prefix-Free Languages	226
<i>Galina Jirásková, Matúš Palmovský, and Juraj Šebej</i>	
Left is Better than Right for Reducing Nondeterminism of NFAs	238
<i>Sang-Ki Ko and Yo-Sub Han</i>	
Analytic Functions Computable by Finite State Transducers	252
<i>Petr Kůrka and Tomáš Vávra</i>	
Partial Derivative and Position Bisimilarity Automata	264
<i>Eva Maia, Nelma Moreira, and Rogério Reis</i>	
The Power of Regularity-Preserving Multi Bottom-up Tree Transducers	278
<i>Andreas Maletti</i>	
Pushdown Machines for Weighted Context-Free Tree Translation	290
<i>Johannes Osterholzer</i>	
Weighted Variable Automata over Infinite Alphabets	304
<i>Maria Pittou and George Rahonis</i>	
Implications of Quantum Automata for Contextuality	318
<i>Jibran Rashid and Abuzer Yakaryılmaz</i>	
Pairwise Rational Kernels Obtained by Automaton Operations	332
<i>Abiel Roche-Lima, Michael Domaratzki, and Brian Fristensky</i>	
Author Index	347
