<i>Introduction</i>	xi
Chapter 1 The Orbit Theorem and Lie determined systems	1
1.1 Vector fields and differential forms	2
1.2 Flows and diffeomorphisms	6
1.3 Families of vector fields: the Orbit theorem	9
1.4 Distributions and Lie determined systems	14
Chapter 2 Control systems: accessibility and controllability	19
2.1 Control systems and families of vector fields	19
2.2 The Lie saturate	25
Chapter 3 Lie groups and homogeneous spaces	29
3.1 The Lie algebra and the exponential map	31
3.2 Lie subgroups	34
3.3 Families of left-invariant vector fields and accessibility	39
3.4 Homogeneous spaces	41
Chapter 4 Symplectic manifolds: Hamiltonian vector fields	44
4.1 Symplectic vector spaces	44
4.2 The cotangent bundle of a vector space	47
4.3 Symplectic manifolds	49
Chapter 5 Poisson manifolds, Lie algebras, and coadjoint orbits	55
5.1 Poisson manifolds and Poisson vector fields	55
5.2 The cotangent bundle of a Lie group: coadjoint orbits	57
Chapter 6 Hamiltonians and optimality: the Maximum Principle	64
6.1 Extremal trajectories	65
6.2 Optimal control and the calculus of variations	68

6.3	The Maximum Principle	71
6.4	The Maximum Principle in the presence of symmetries	81
6.5	Abnormal extremals	85
6.6	The Maximum Principle and Weierstrass' excess function	91
Chapter 7 Hamiltonian view of classic geometry		96
7.1	Hyperbolic geometry	96
7.2	Elliptic geometry	101
7.3	Sub-Riemannian view	106
7.4	Elastic curves	113
7.5	Complex overview and integration	115
Chapter 8 Symmetric spaces and sub-Riemannian problems		118
8.1	Lie groups with an involutive automorphism	118
8.2	Symmetric Riemannian pairs	120
8.3	The sub-Riemannian problem	131
8.4	Sub-Riemannian and Riemannian geodesics	135
8.5	Jacobi curves and the curvature	138
8.6	Spaces of constant curvature	142
Chapter 9 Affine-quadratic problem		147
9.1	Affine-quadratic Hamiltonians	152
9.2	Isospectral representations	155
9.3	Integrability	159
Chapter 10 Cotangent bundles of homogeneous spaces as coadjoint orbits		167
10.1	Spheres, hyperboloids, Stiefel and Grassmannian manifolds	168
10.2	Canonical affine Hamiltonians on rank one orbits: Kepler and Newmann	177
10.3	Degenerate case and Kepler's problem	179
10.4	Mechanical problem of C. Newmann	187
10.5	The group of upper triangular matrices and Toda lattices	192
Chapter 11 Elliptic geodesic problem on the sphere		198
11.1	Elliptic Hamiltonian on semi-direct rank one orbits	199
11.2	The Maximum Principle in ambient coordinates	203
11.3	Elliptic problem on the sphere and Jacobi's problem on the ellipsoid	211
11.4	Elliptic coordinates on the sphere	213

Chapter 12 Rigid body and its generalizations	220
12.1 The Euler top and geodesic problems on $SO_n(R)$	221
12.2 Tops in the presence of Newtonian potentials	231
Chapter 13 Isometry groups of space forms and affine systems: Kirchhoff's elastic problem	238
13.1 Elastic curves and the pendulum	241
13.2 Parallel and Serret–Frenet frames and elastic curves	248
13.3 Serret–Frenet frames and the elastic problem	251
13.4 Kirchhoff's elastic problem	256
Chapter 14 Kowalewski–Lyapunov criteria	262
14.1 Complex quaternions and $SO_4(\mathbb{C})$	264
14.2 Complex Poisson structure and left-invariant Hamiltonians	270
14.3 Affine Hamiltonians on $SO_4(\mathbb{C})$ and meromorphic solutions	273
14.4 Kirchhoff–Lagrange equation and its solution	287
Chapter 15 Kirchhoff–Kowalewski equation	296
15.1 Eulers' solutions and addition formulas of A. Weil	304
15.2 The hyperelliptic curve	310
15.3 Kowalewski gyrostat in two constant fields	313
Chapter 16 Elastic problems on symmetric spaces: the Delauney–Dubins problem	326
16.1 The curvature problem	326
16.2 Elastic problem revisited – Dubins–Delauney on space forms	331
16.3 Curvature problem on symmetric spaces	350
16.4 Elastic curves and the rolling sphere problem	358
Chapter 17 The non-linear Schroedinger's equation and Heisenberg's magnetic equation–solitons	368
17.1 Horizontal Darboux curves	369
17.2 Darboux curves and symplectic Fréchet manifolds	376
17.3 Geometric invariants of curves and their Hamiltonian vector fields	386
17.4 Affine Hamiltonians and solitons	399
<i>Concluding remarks</i>	404
