

Contents

1	Some Aspects in the Mathematical Work of Jerzy Kąkol	1
	Manuel López-Pellicer and Santiago Moll	
2	Weak Barrelledness Versus P-spaces	27
	Stephen A. Saxon	
3	On the Topology of the Sets of the Real Projections of the Zeros of Exponential Polynomials	33
	Gaspar Mora	
4	The Density Character of the Space $C_p(X)$	57
	María Muñoz Guillermo, J. C. Ferrando and M. López-Pellicer	
5	Compactness and Distances to Spaces of Continuous Functions and Fréchet Spaces	75
	Carlos Angosto and Manuel López-Pellicer	
6	Two Classes of Metrizable Spaces ℓ_c-Invariant	95
	Manuel López-Pellicer	
7	Characteristics of the Mackey Topology for Abelian Topological Groups	117
	José Manuel Díaz Nieto and Elena Martín Peinador	
8	Bowen's Entropy for Endomorphisms of Totally Bounded Abelian Groups	143
	Domingo Alcaraz, Dikran Dikranjan and Manuel Sanchis	
9	On Preserved and Unpreserved Extreme Points	163
	Antonio José Guirao, Vicente Montesinos and Václav Zizler	

- 10 Cantor Sets, Bernoulli Shifts and Linear Dynamics 195**
Salud Bartoll, Félix Martínez-Giménez,
Marina Murillo-Arcila and Alfredo Peris
- 11 Some Non-linear Geometrical Properties of Banach Spaces 209**
Domingo García and Manuel Maestre
