# Contents

1 Introduction .......... 1
   1.1 Compressed Sensing ...... 2
   1.2 Applications of Compressed Sensing ...... 3
   1.3 Extensions of Compressed Sensing ...... 4
   1.4 Organization ...... 6
   References ...... 6

2 Compressed Sensing ...... 9
   2.1 Gelfand’s Width ...... 9
   2.2 Restricted Isometry Property and Coherence ...... 11
   2.3 Spherical Section Property ...... 13
   2.4 Reconstruction Methods ...... 17
      2.4.1 Minimization of $l_1$-norm ...... 17
      2.4.2 Greedy Algorithms ...... 19
      2.4.3 Norm Approximation ...... 19
      2.4.4 Message Passing Reconstruction Algorithms ...... 20
   References ...... 22

3 Compressed Sensing with Side Information on Feasible Region ...... 23
   3.1 Formulation ...... 23
   3.2 Uniqueness and Stability ...... 24
   3.3 Numerical Solution Algorithm ...... 25
      3.3.1 Bregman Iteration and Operator Splitting ...... 26
   3.4 Experimental Study ...... 27
      3.4.1 Source Model ...... 27
      3.4.2 Experiments ...... 28
   References ...... 31

4 Application: Image Deblurring for Optical Imaging ...... 33
   4.1 Background ...... 33
   4.2 Technical Preliminaries ...... 35
      4.2.1 Shack-Hartmann Interferometer ...... 36
## 4.3 Point Spread Function Estimation via Compressive Sampling

4.3.1 Derivative Compressed Sensing

4.3.2 Deconvolution

## 4.4 Experiments

4.4.1 Phase Recovery

4.4.2 Deblurring

## 4.5 Summary

References

---

## 5 Application: Surface Reconstruction in Gradient Field

5.1 Derivative Compressed Sensing for Surface Recovery

5.2 Experimental Results

5.3 Summary

References

---

## 6 Application: Diffusion Fields Reconstruction Under Heat Equation Constraint

6.1 Introduction

6.2 Diffusive Compressive Sensing

6.3 Experimental Results

6.4 Summary

References
