

Content

Preface.	xi
Acknowledgements.	13
Abstract	13
1. Chapter	
Introduction to Silver and the Silver Economy of Hedeby	15
Silver and the Vikings.	15
Archaeological Questions and Approach	15
Structure of the Thesis	17
2. Chapter	
Archaeometallurgy of Silver. An Overview of the Early Medieval Period	19
2.1 Introduction	19
2.2 Silver Ore	19
2.2.1 Silver and Lead-Based Ore: Cerussite and Galena.	20
2.2.2 Fahlore as Silver Ore	20
2.2.3 Jarosite as Silver Ore	21
2.2.4 Sphalerite as Silver Ore	21
2.2.5 Comparison of Ore Quality: Texts versus Archaeology	21
2.3 Principles of Smelting Lead and Silver	22
2.3.1 Lead and Lead-Silver Production	22
2.3.2 Complex Smelting: Jarosites and Polymetallic Ore	23
2.4 Cupellation	24
2.4.1 Cupellation and the Refining of Impure Silver.	24
2.4.2 Cupellation of High Grade Ore and Mercury Amalgamation	25
2.4.3 Cupellation: Trace Element Fractionation	25
Lead.	25
Bismuth.	25
Copper.	25
Gold and other Noble Metals.	25
Antimony and Tin.	26
Zinc.	26
Mercury.	26
2.4.4 Cupellation Summary	26
2.5 Alloying, Recycling, and Metalworking	26
2.5.1 Alloys, Impurities, and Working Properties	26
2.5.2 Testing of Purity	28
Pecking, Bending, and Nicking.	28
Touchstones.	28
Specific Gravity.	29
Fire Testing and Assaying.	29
Summary and Conclusion.	30
2.5.3 Adjusting Silver Purity and Recycling Practices.	31
Minting and Cupellation.	31
Minting Recycled Silver without Refining	32
Implications of Recycling Technology in Archaeometallurgy.	33
2.5.4 Surface Treatments – Intentional and Unintentional Implications.	33
2.6 Closing	34

3. Chapter	
Hedeby and the Silver Economy of the Viking Age	35
3.1 Introduction	35
3.2 Hedeby	35
3.3 Money, Exchange, and the Role of Silver in the Viking Age	37
3.3.1 Why Silver?	38
3.3.2 The Development of an Exchange Medium	38
3.4 Coins, Rings, Ingots, and Hacksilver	39
3.4.1 The Development of Coinage in Southern Scandinavia	39
3.4.1.1 Frisians and Sceattes	42
3.4.1.2 The Beginning of Scandinavian Minting	42
3.4.1.3 The 10 th Century: Carolus/Dorestad and Cross Coinage	42
3.4.1.4 Hedeby and Danish Minting in the 11 th Century	43
3.4.1.5 Conclusion	43
3.4.2 The Aurar System, Hacksilver, and the Bullion Economy	43
3.4.2.1 Ring Money and Ingots	43
3.4.2.2 Hacksilver	45
3.4.2.3 The Relationship of the Methods of Payment	46
3.5 Closing	47
4. Chapter	
Silver Mining and the Trade of Silver in the Early Medieval Period	49
4.1 Introduction	49
4.2 Survey of Mining Regions	49
4.2.1 Mining in the Islamic West, in Eastern Europe and in Western Asia	50
4.2.1.1 Lead and Silver Mining in Morocco and Spain	50
4.2.1.2 Silver Mining in the Balkans	51
4.2.1.3 Lead and Silver Mining in Anatolia and Greece	51
4.2.1.4 Lead, Silver, and Gold Mining in the Arabian Peninsula	52
4.2.2 Silver Mines of Iran, Afghanistan, and Central Asia	52
4.2.2.1 Lead and Silver Mining in Iran	52
4.2.2.2 Mining in Afghanistan: Panjīr and Farinjāl	53
4.2.2.3 Silver Mines of Transoxania	53
4.2.2.4 The Pamir and Talas Regions	54
4.2.3 Silver and Lead Mining in Christian Western Europe	54
4.2.3.1 Melle and the Cevennes	54
4.2.3.2 Silver Mining in England and Ireland	55
4.2.4 Silver and Lead Mining in Central Europe	56
4.2.4.1 Silver Mining in the Rhenish Massif	56
4.2.4.2 Silver Mining in the Harz	58
4.2.4.3 The Upper Rhine Valley and Neighboring Regions	58
4.2.4.4 Eastern Central Europe	59
4.2.5 Closing	59
4.3 Coins, Trade Routes, and Chronology	60
4.3.1 Medieval Silver Circulation prior to the 10 th Century	61
4.3.1.1 Circulation of Silver in the 9 th Century: The Carolingians	61
4.3.1.2 Circulation of Silver in the 9 th Century: The Eastern Route	62
4.3.2 Circulation of Silver Coinage in the 10 th and 11 th Centuries	63
4.3.2.1 Changes to the Eastern Trade Route	64
4.3.2.2 Silver of the West: The Harz and Beyond	64
4.4 Closing	66

5. Chapter	
Archaeometry and Viking-Age Silver	67
5.1 Introduction	67
5.2 Theory of the Material Science Analysis of Archaeological Silver	67
5.2.1 Elemental Analysis.	67
5.2.2 Lead Isotope Analysis	68
5.3 Themes of Archaeometric Research Regarding Early Medieval Silver.	68
5.3.1 Characterization of Carolingian Silver.	69
5.3.2 The Alloy of Anglo-Saxon Coinages and Irish Silver	70
5.3.3 Silver of the Ottonians.	71
5.3.4 Sassanian and Islamic Silver	72
5.3.5 Viking Silver	75
5.3.6 Conclusions	76
5.4 Development of Sampling Strategy and Analytical Approach	76
5.4.1 Chronological Framework – Hedeby and Danish Coins	76
5.4.2 Comparison Material – Coins, Unminted Silver, and Base Metals	77
5.4.3 Recycling and Refining at Hedeby and the Lead and Tin Finds	77
5.4.4 Ore and Slag from the Islamic World	77
5.5 Closing	78
6. Chapter	
Material Analysis	
Methods, Procedures and Data Quality	79
6.1 Introduction	79
6.2 Qualitative/Semi-Quantitative Analysis: Microscopy and X-ray Techniques	79
6.2.1 Optical Microscopy	79
6.2.2 Scanning Electron Microscopy	80
6.2.3 Portable X-Ray Fluorescence	81
6.2.4 Effects of surface enrichment	81
6.2.5 X-Ray Diffraction.	82
6.2.6 XRF Artifact Scanning	82
6.3 Quantitative Analysis: Mass Spectrometry – Elemental Analysis.	82
6.3.1 SC-ICP-MS	82
6.3.1.1 Sampling Methods.	83
6.3.1.2 Chemical Digestion.	83
6.3.1.3 Analysis and Quantification.	83
6.3.2 Laser Ablation ICP-QMS.	84
6.4 Quantitative Analysis: Mass Spectrometry - Lead Isotope Analysis	84
6.4.1 Lead Isotope Analysis with Multi-Collector ICP-MS	84
6.4.1.1 Lead Separation from Ores and Metals	85
6.4.1.2 Measurement, Data Processing and Quality.	85
6.4.2 Lead Isotope Analysis with Laser Ablation	86
6.4.2.1 Data Quality and Correction of Isotope Data.	86
6.5 Control Points and Data Compatibility	87
6.5.1 Compatibility of Elemental Analysis	87
6.5.2 Compatibility of Lead Isotope Analysis	89
6.6 Closing	89

7. Chapter	
Analytical Results and Discussion	.91
7.1 Introduction	.91
7.2 General Data Trends	.91
7.2.1 Trends in Elemental Composition	.91
7.2.2 Lead Isotope Composition Representation and Trends	.93
7.3 Characterization of the Hedeby/Danish Coin Groups	.93
7.4 Malmer KG 7 (900-920 AD) and Related Silver	.96
7.4.1 Introduction	.96
7.4.2 Malmer KG 7 and Contemporary Western Silver	.96
7.4.3 Eastern Origins of the Malmer KG 7	.99
7.4.4 Malmer KG 7 and Related Ingots, Hacksilver, and Jewelry	.99
7.4.5 Summary and Conclusions	100
7.5 Malmer KG 8-11 (950-980 AD) and Related Silver	100
7.5.1 Introduction	100
7.5.2 Samanid Silver, Bismuth, and the Malmer KG 8-11	100
7.5.3 Ottonian Silver, Sachsenpfennige, and the Malmer KG 8-11	104
7.5.4 Byzantine Miliarisia	105
7.5.5 Summary and Conclusions	105
7.6 Årstad and Harthacnut Coinages (1015-1042 AD) and Related Silver	106
7.6.1 Introduction	106
7.6.2 Otto-Adelheid-pfennige and Harz Silver	106
7.6.3 Colonia-pfennige Alloys and Implications	108
7.6.4 Anglo-Saxon/Hiberno-Norse Silver	108
7.6.5 European Silver and the Årstad/Harthacnut Coinages	110
7.7 Sven Estridsen and Cnut the Holy Coinage (1048-1086 AD)	110
7.7.1 Introduction	110
7.7.2 Interpreting the Lead Isotope Ratios of Group 4	110
7.7.3 Viking-Age Brass and Debasement	112
7.7.4 Summary and Conclusions	113
7.8 Closing	114
8. Chapter	
Conclusions and Recommendations for Future Research	115
8.1 Introduction	115
8.2 Towards the Question of Refining in the Viking Age	115
8.3 Silver of the Islamic World and the Dirham Imitations	115
8.4 Early Medieval Silver Mining – The Analytical Evidence	117
8.5 Composition of Hedeby/Danish Coins and its Implications	117
8.6 Relationship of Non-Minted Silver and Minting at Hedeby	118
8.7 Some Final Thoughts	120
Appendix A	
Catalogue	121
Appendix B	
List of Analyses	171
Appendix C	
Elemental Analysis	181

Appendix D	
Lead Isotope Analysis	193
Appendix E	
Glossary of Minerals and Phases	201
Appendix F	
XRF Artifact Scans	205
Appendix G	
Analysis of Technical Ceramics Related to Gold and Silver Smithing at Hedeby	209
Summary	209
1. Introduction.	209
2. Metalworking and Technical Ceramics at Hedeby	209
3. The Crucibles and Heating Trays.	210
4. Sampling and Analytical Methods	210
5. The Refractory	211
5.1 Local Ceramic: Low Alumina Type	212
5.2 Imported Ceramics: High Alumina Types	213
5.3 Inter-site Comparison	214
6. The Alloys	215
6.1 Crucibles.	215
6.2 Heating Trays	216
7. Function of Cylindrical Crucibles and Heating Trays	216
7.1 Heating Trays and Cupellation	216
7.2 Heating Trays: Crucibles for Small-Scale Refining and Casting	219
7.3 Conclusions	220
8. A Note on Corrosion and the Burial Environment	220
Appendix H	
Elemental and Lead Isotope Analysis of Lead, Tin, and Refining Debris from Hedeby.	223
Summary	223
1. Introduction.	223
2. The Elemental Composition of Lead and Tin Finds	223
3. Evidence for Cupellation or Glass Working	225
4. Lead Isotope Analysis of Lead, Tin, and Refining Debris	226
5. Conclusions and Recommendations for Future Research.	227
Appendix I	
Analysis of Slag and Ore from the Tashkent and Samarqand Areas: Medieval Silver Extraction and the Coinage of Samanid Central Asia.	231
Summary	231
1. Introduction.	231
2. Historical Background of Silver Mining and Production	231
2.1 Samanids and Mining	231
2.2 Mining in the Īlāq and the Metallurgical Center of Tunket.	233
2.3 Pamir and Hindu Kush.	235
2.4 The Samarqand Area, Talas, and other Mining Areas.	235
3. Geological Survey: Tien Shan, Pamir, and Panjhīr	236
3.1 Introduction	236
3.2 Geology and Ore Deposits of the Tien Shan (including the Īlāq)	236
3.3 Geology and Ore Deposits of the Pamir	236

3.4	Geology and Ore Deposits of Panjhir	236
4.	Methodology	237
4.1	Samples and Methodology	237
4.2	Method for the Analysis of Silver Dirhams	237
4.3	Methods for the Analysis of Ore and Slag Samples	237
5.	Results and Discussion of the Analysis of Ore and Slag	237
5.1	Ore Samples.	237
5.2	Slag from Lashkerek and Tunket	239
5.2.1.	.Slag Type 1: Frothy Slag..	239
5.2.2.	.Slag Type 2: Dense Crystalline Slag.	242
5.2.3.	.Slag Type 3: Dense Microcrystalline Slag..	242
5.2.4.	.Slag Type 4: Lead-Barium Glass from Lashkerek (Cat. 250).	242
5.2.5.	.Speiss.	244
5.2.6.	.Silver Antimonide..	246
5.3	Polymetallic Smelting Technology and Silver Production	247
6.	Lead Isotope and Elemental Analyses: Results and Discussion	248
7.	Conclusions	253
References	255
	Historical Sources.	255
	Reference List.	255
	Web References	273
